

Making the impossible packable...

# Protein industry solutions

CPS is since 1988 the specialist in case packing. Especially flexible bags in American style cases and shelf-ready trays, but also all type of trays, skin trays in cardboard trays, plastic crates up to roller containers. No challenge is too crazy for us! Due to our unique, modular systems and the resolving power of our team, we know how to pack the impossible. Our case packers have many options available to create a tailor made case packer for you. We are only satisfied if you are a satisfied customer.

**CPS** CASE  
PACKING  
SYSTEMS

The protein industry, meat, poultry, and fish go hand in hand with high demands. Either in product, logistics, machinery and packaging. That is why the market has high demands on packaging and the packing process. Due to the sustainable packaging, an enormous diversity of different packaging materials and packaging forms are available. Such as bags, map-, skin trays, vacuum skin packs, flatskin packs etc. with all its different materials. Our various high-quality case packer systems have been developed to process all these packages with high capacity.

## HORIZONTAL PACKING

### Our CP201, the best in class in the IQF industry!

The CP 201 gravity casepacker has been especially developed to pack bags horizontal in a very compact way into cases at high speeds.

- Bag speeds up to 160 bags/min.
- Max. case speed up to 20 cases/min.
- Flexible packing patterns
- Maintenance friendly
- Menu controlled, reduced downtime
- Easy to operate
- Standard remote access
