

MeatPad

For longer shelf life and greater appeal
of fresh meat and fish

MeatPad

The key to greater profitability

Higher quality goods · more satisfied customers · fewer markdowns

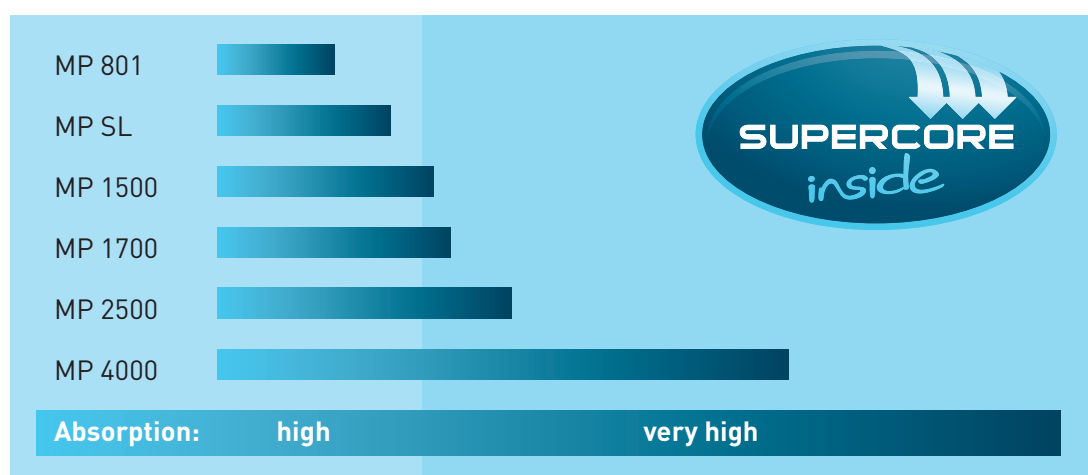

MeatPads from McAirLaid's have been developed for the specific requirements of various meat and fish products. They meet the challenge of absorbing all liquids released within the packaging.

This keeps bacterial growth to a minimum and the goods in the packaging remain fresh and attractive for longer.

The core of all MeatPads consists of pure cellulose, our SuperCore®, which is produced in a special process without synthetic binders or adhesives.

Compared to conventional airlaids, this ensures a significantly higher absorption capacity, as the cellulose fibers are not partially sealed by binders.

For special absorption requirements, superabsorbent fibers (SAF) are added to highly absorbent MeatPads.

Convincing reasons for MeatPad:

- Very high absorption capacity due to SuperCore® cellulose and, if necessary, SAF
- Absorption across the surface and the open edges, even in an inclined position
- Can be used for meat or fish products and also cheese
- Extension of the minimum shelf life by reducing microbial growth
- More attractive packaging without freefloating liquids
- Available in various widths as rolls or cut to size

MeatPad Plus

The high-performance version with even more absorbent cellulose

MeatPad NF

is a completely biodegradable product with a plant fiberbased surface on both sides

A strong partner for powerful ideas

We offer you:

- Development expertise for every technical product requirement.
- A wide range of cellulose-based materials and airlaid specifications with an excellent price/performance ratio.
- Integration of additives such as superabsorbents (SAP/SAF), if required.
- Biodegradability in accordance with EN 13432 and production with low CO₂ emissions.
- Flexible product configurations to optimally support your production processes.
- More than 25 years of experience in the production of high-quality components for the food, hygiene and medical industries.
- Reliable delivery thanks to four high-capacity production facilities.

SuperCore: clean, barrier-free absorption power

Our **SuperCore®** consists of pure cellulose with excellent absorption properties. The special manufacturing technology stands for an **airlaid without synthetic additives or binders**, which leads to significantly better absorption and liquid distribution.

At the same time, our **production takes place without water and without fossil fuels**, thus ensuring a **unrivalled low CO₂ footprint** of our products.
