

# The first bandsaw with a zero-accident track record

Reduce bandsaw injuries to  
zero with Guardian's  
revolutionary vision safety.

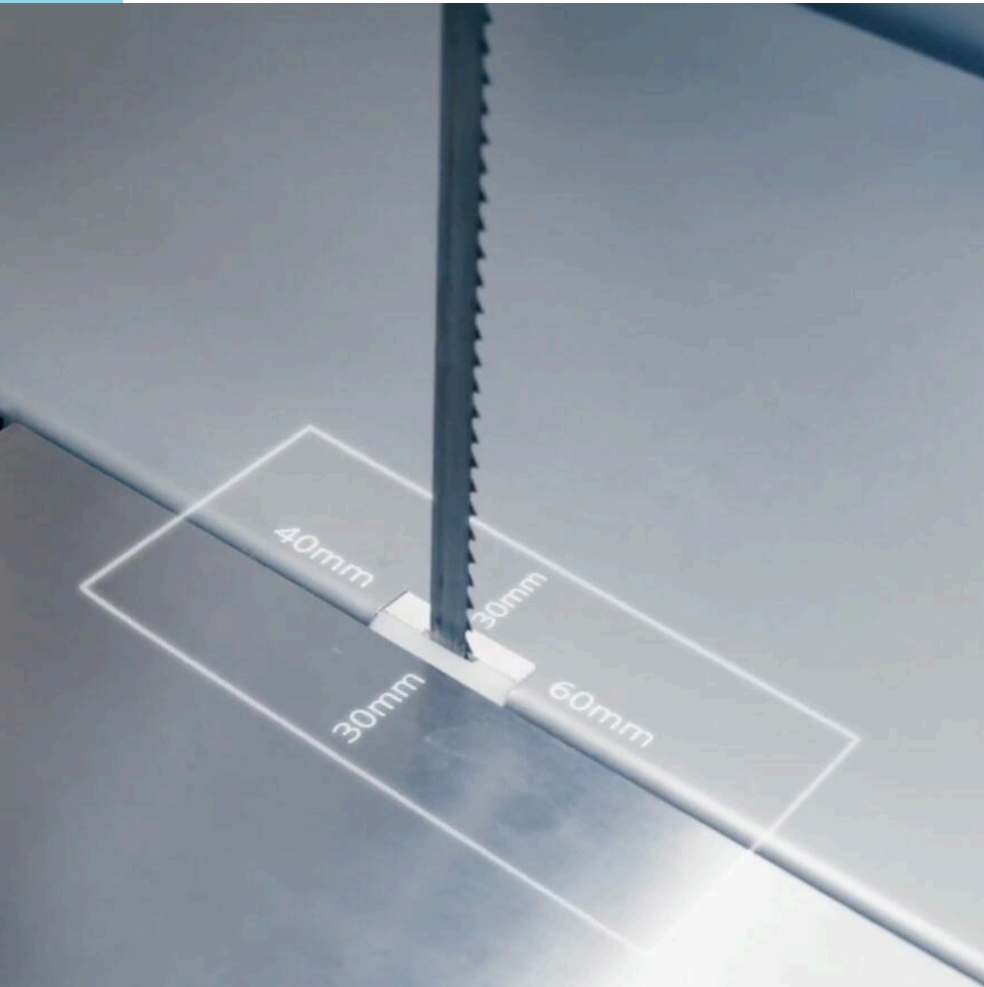

# 3D Vision Technology™ stops the blade before injuries occur

Traditional contact sensing only activates after the operator already made contact with the blade. The Guardian anticipates injuries and stops them in their tracks.

01

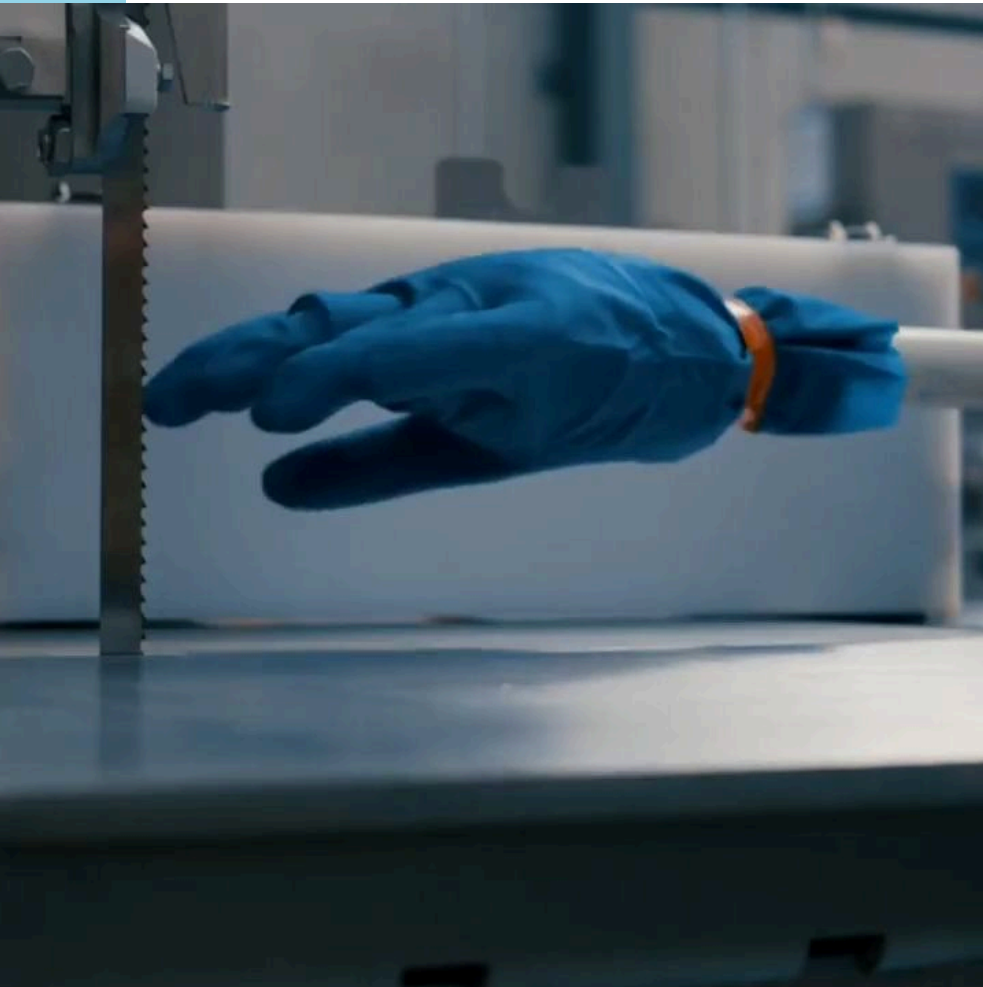

3D Vision Technology

Creates a three-dimensional safety zone that recognizes the operators' gloves.

02

Instant blade stop

Stops the blade within 12 milliseconds, preventing injuries.

03

Lightning-fast reset

Gets you up and running within just eight seconds.

## Zero accidents. Zero fines.

Just preventing one OSHA fine can pay for a safety bandsaw. That's without even accounting for worker's comp, insurance premiums, and injury-related downtime.

01

Worker settlements

Average amputation settlement

\$126,003

02

Government penalties

Maximum for repeat offenders

\$161,323

03

Injury-related downtime

Up to

\$20,000 per hour

# Models

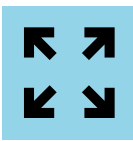

## G300

The G300 is our smallest machine for industrial meat processing applications.

5.5 HP

12"(W) X 14,2"(H)

Scan for more details

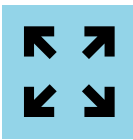

## G400

The G400 is our best-selling production machine, balancing power and floor footprint.

5.5 HP

16"(W) X 16"(H)

Scan for more details

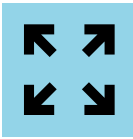

## G600

The G600 is the next step up from the G400, delivering more power and space for larger cuts.

10 HP

24"(W) X 18,5"(H)

Scan for more details

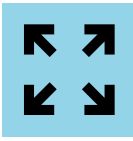

## G900

The G900 is our largest and most powerful bandsaw, equipped to handle your largest cuts.

10 HP

35,4"(W) X 23,6"(H)
