Stainless steel worm gearboxes

When demanded by the environment

Customisation is our standard

Stainless steel worm gearboxes

BJ-Gear A/S manufactures stainless steel worm gearboxes of superior quality. The gearboxes are specifically developed for the food industry and other industries, that continuously make heavier demands to the resistance of material and to a design that is easy-to-clean.

The gearboxes are designed with a smooth, stainless steel gear housing and hollow shaft. The gearboxes are lubricated for life and can be supplied with a lubricant approved for the food industry. The oil sealings are made of nitrile rubber.

In order to reduce the risk of bacteria growth, the design is characterised by smooth surfaces without unnecessary flanges, recesses and mounting holes.

When a completely sanitary gear motor is required, the stainless steel worm gearbox can be fitted with a stainless AC motor or a servo motor.

Type designation

We believe that an unambiguous type designation of our stainless steel gearboxes eases the communication. Therefore, throughout this brochure the position of each item in the type designation will be shown. The number 1 indicates that it is a worm gearbox.

Stainless steel housing

Angular contact ball bearing

Motor flange D-side

Oil sealing

Worm

Worm wheel

**Deep groove ball bearings /
tapered roller bearings**

Hollow shaft

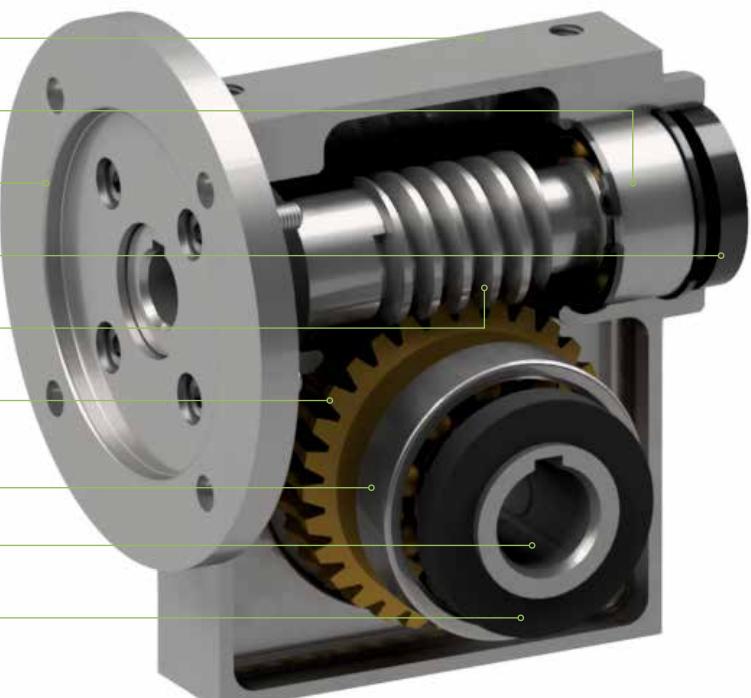

Dust lip oil sealing

IP protection

The protection of the gearboxes are IP65, and IP66 of stainless motors, which ensure that the products can be cleaned with e.g. pressurised water from all directions. To achieve an overall protection of IP66 for the assembly of gearboxes and motors, you need to use a nitrile rubber gasket for the joint.

CONTENT

STANDARD gearbox Page 5

BJ-Gear A/S offers a self-produced stainless gearbox range of high quality. The series is developed specifically for the process line in the food industry and other industries where there are continuously stringent requirements for the resistance of the material and easy-to-clean design.

The protection of the gearboxes is IP65, and for stainless motors it is IP66. This ensures that the products can be cleaned with water under pressure from all directions.

The stainless steel worm gearboxes are as standard made in five sizes: **42, 52, 61, 79 and 99**. The number indicates the centre distance of the axles and thus the gear size.

- Up to 88% efficiency
- Easy-to-clean
- Protection degree of minimum IP65
- Ideal for use in the food industry

PREMIUM gearbox Page 25

The stainless steel gearboxes are made of a smooth stainless gear housing, they are life lubricated, and can of course be supplied with oil approved for the food industry. Oil seals are as standard made of nitrile rubber.

To reduce the risk of bacterial growth, the design is characterised by smooth machined surfaces without unnecessary flanges, recesses and mounting holes. It is also possible to order the gearboxes with torque arm, side flange, free worm and plug-in shaft. Other adjustments are performed on request.

The protection of the gearboxes is IP65, and for stainless motors it is IP66. This ensures that the products can be cleaned with water under pressure from all directions.

The stainless steel worm gearboxes are as standard made in three sizes: **31, 42 and 61**. The number indicates the centre distance of the axles and thus the gear size.

- Up to 88% efficiency
- Smooth surfaces that reduces the risk of bacterial growth
- Unnecessary flanges, recesses and mounting holes
- Hygienic and easy-to-clean
- Protection degree of minimum IP65
- Ideal for use in the food industry

Service factor

The operating conditions are of importance to the durability of the gearbox. The gearbox should therefore be dimensioned according to the service factors.

Please note that the values apply for operation with a standard electric AC motor.

$$\text{Service factor} = \frac{M_{\text{gear}} \text{ [Nm]}}{M_{\text{required}} \text{ [Nm]}}$$

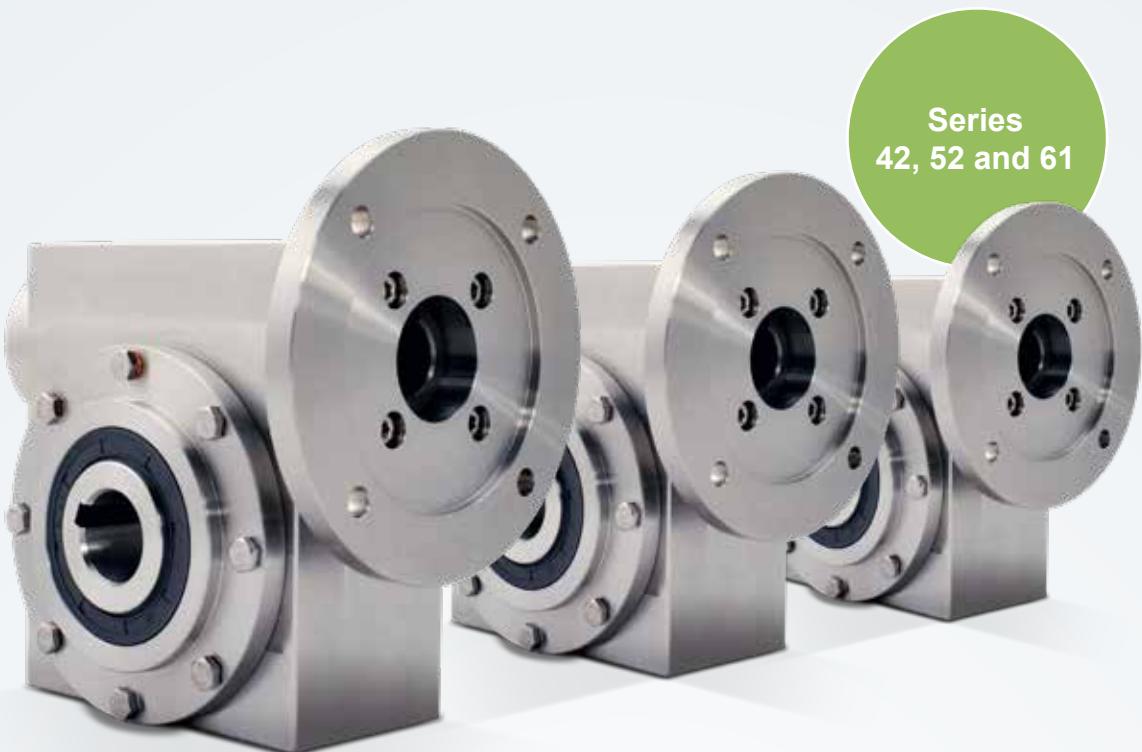

Type of load	Number of starts per hour	Operation time per day			
		2	2-8	8-12	12-24
Uniform, smooth load	<50	0,8	0,9	1,0	1,3
	0-500	0,9	1,1	1,2	1,5
	500<	1,0	1,2	1,4	1,7
Moderate impact load	50	0,9	1,1	1,3	1,5
	50-500	1,1	1,3	1,5	1,8
	500<	1,3	1,5	1,7	2,0
Heavy impact load	<50	1,3	1,5	1,6	1,8
	50-500	1,5	1,7	1,9	2,1
	500<	1,7	2,0	2,1	2,4

Tables of effect

Strength factor

The strength factor is an expression of the durability of the gearing in relation to breakage. The breakage limit is three times the strength factor.

- Normal use: Include the service factor on page 3 and choose a strength factor > 1.
- In case of special demands on safety or other special conditions: Please contact BJ-Gear A/S for further information.

Mounting of the gearbox

1 42 S 0 41 1 12 02 01 30 0 1

	Mounting in gear housing	Mounting in side flange
Stainless housing series 42, 52 and 61		
Stainless housing series 79 and 99		
Standard	40	41

There are different opportunities for types of housing depending on gearbox assembly. "4" indicates that the housing is of stainless steel.

Second digit in the itemnumber is defined by the choice between a bearing cover or a side flange.

For series 42, 52 and 61 there are two options; a standard bearing cover (0) or a side flange (1). For series 79 and 99 the bearing cover is standard.

Output shaft

1 42 S 0 41 1 12 02 01 30 0 1

Mounting holes

	Extra mounting holes, right	Extra mounting holes, left	Without extra mounting holes
Hollow shaft			
Standard, stainless steel shaft	4 (*6 for Ø38)	5 (*7 for Ø38)	0 (*8 for Ø38)

Other mounting solutions available, contact BJ-Gear A/S.

Shaft size

1 42 S 0 41 1 12 02 01 30 0 1

BCD \ Series	42	52	61	79	99

PREMIUM Gearbox

Series 31, 42 and 61

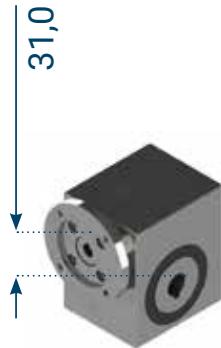

- Up to 88% efficiency
- Smooth surfaces that reduces the risk of bacterial growth
- Unnecessary flanges, recesses and mounting holes
- Hygienic and easy-to-clean
- Protection degree of minimum IP65
- Ideal for use in the food industry

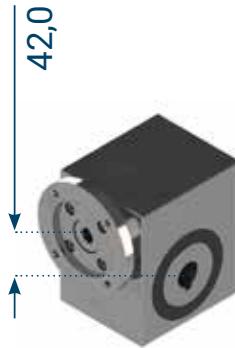

PREMIUM gearbox sizes

1 42 4 0 41 1 12 02 01 30 0 1

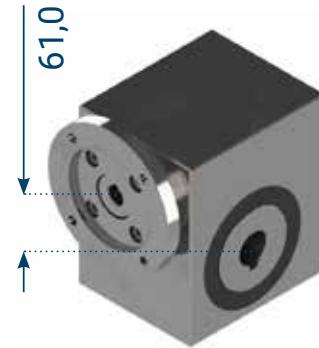

The stainless steel worm gearboxes are as standard made in five sizes: 31, 42 and 61. The number indicates the centre distance of the axles and thus the gear size.

Series 31

Series 42

Series 61

Service factor

The operating conditions are of importance to the durability of the gearbox. The gearbox should therefore be dimensioned according to the service factors.

Please note that the values apply for operation with a standard electric AC motor.

$$\text{Service factor} = \frac{M_{\text{gear}} \text{ [Nm]}}{M_{\text{required}} \text{ [Nm]}}$$

Type of load	Number of starts per hour	Operation time per day			
		2	2-8	8-12	12-24
Uniform, smooth load	<50	0,8	0,9	1,0	1,3
	0-500	0,9	1,1	1,2	1,5
	500<	1,0	1,2	1,4	1,7
Moderate impact load	50	0,9	1,1	1,3	1,5
	50-500	1,1	1,3	1,5	1,8
	500<	1,3	1,5	1,7	2,0
Heavy impact load	<50	1,3	1,5	1,6	1,8
	50-500	1,5	1,7	1,9	2,1
	500<	1,7	2,0	2,1	2,4

Tables of effect

Strength factor

The strength factor is an expression of the durability of the gearing in relation to breakage. The breakage limit is three times the strength factor.

- Normal use: Include the service factor on page 27 and choose a strength factor > 1.
- In case of special demands on safety or other special conditions: Please contact BJ-Gear A/S for further information.

Mounting of the gearbox

1 42 4 0 41 1 12 02 01 30 0 1

	Mounting in gear housing	Mounting in side flange
Stainless housing series 31, 42 and 61		
Standard	40	41

There are different opportunities for types of housing depending on gearbox assembly. "4" indicates that the housing is of stainless steel.

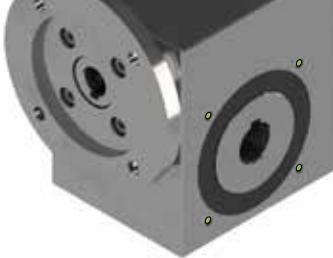

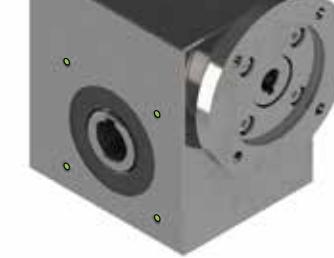

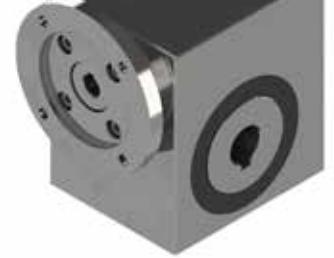

Second digit in the itemnumber is defined by the choice between a bearing cover or a side flange.

For series 31, 42, and 61 there are two options; a standard bearing cover (0) or a side flange (1).

Output shaft

1 42 4 0 41 1 12 02 01 30 0 1

Mounting holes

	Extra mounting holes, right	Extra mounting holes, left	Without extra mounting holes
Hollow shaft			
Standard, stainless steel shaft	4 (*6 for Ø38)	5 (*7 for Ø38)	0 (*8 for Ø38)

BJ-Gear A/S offers different choices of output shafts.

For stainless steel worm gearboxes the options are either right sided, left sided or with no extra mounting holes.

Shaft size

1 42 4 0 41 1 12 02 01 30 0 1

BCD \ Series	31	42	61	
Ø18		7		
Ø20		1		
Ø25			3	
Ø30			4	

The second digit indicates the size of the hollow shaft. If the requested size is not mentioned, please feel free to contact us for further information.

Output shaft material

1	42	4	0	41	1	12	02	01	30	0	1
---	----	---	---	----	---	----	----	----	----	---	---

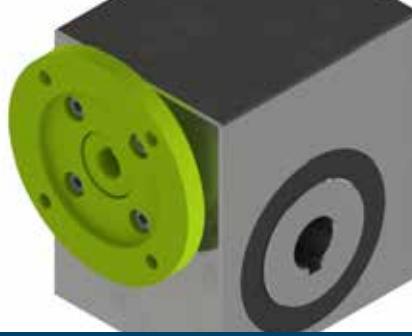

1	Standard, stainless steel shaft										
3	Stainless steel shaft, tapered roller bearings										

This digit indicates the material of the shaft, where "1" is the standard stainless steel shaft. Options are available.

Accessories for complete solutions

BJ-Gear A/S manufactures a wide range of stainless steel products. In addition to our manufactured gearboxes and actuators, we supply transmission components of recognised brands, which makes it possible to supply complete transmission solutions at short notice.

When choosing BJ-Gear A/S as a total supplier, you are guaranteed correct assembly of all components with a functional test subsequently. All components are stocked or manufactured for prompt delivery.

Stainless steel motors

The stainless steel AC motors are of acid-resistant steel and in protection classes from IP66 to IP69K. They are available as TENV (Totally Enclosed Non-Ventilated) up to effects of 0.75 kW or as TEFV up to effects of 7.5 kW (Totally Enclosed Fan Cooled). The motors are equipped with thermistors as standard. The completely smooth surface makes them ideal for use within the food industry or where an easy-to-clean design is paramount.

Brakes of stainless steel

The stainless steel brakes from BJ-Gear A/S meet the high demands and standards required by e.g. the food industry for products to be used directly in a process line. They have a hygienic design with a smooth surface and are easy and simple to incorporate. The brakes are available in three sizes with a torque from 5-20 Nm. They fit IEC motor sizes 63, 71, 80 and 90 (B14). Other sizes can be made on request.

The brakes are designed to be mounted between a flanged motor and a gearbox, where the output shaft is not to be subjected to additional axial or radial loads. The protection is IP68/69 when mounted between gearbox and motor.

Motor frame size	Brake size	MbN* (Nm)	P 20 °C (Watt)	Cable length standard (M)
63,71	08	5	22	1
80	10	10	28	1
90	13	20	24	1

* Braking torque after completion of run-in. The brake is designed to be mounted between a flanged motor and a gearbox, hence the output shaft is not to be subjected to additional axial or radial loads.

Stainless steel products

BJ-Gear A/S manufactures a wide range of stainless steel gearboxes, actuators and worm gear screw jacks. The stainless steel products are developed specifically for the food industry and industries where the requirements for material resistance and an easy-to-clean design are continuously stringent. The gearboxes are life lubricated and can be supplied with lubricants approved for the food industry. The products of stainless steel can be customised according to your needs.

Worm gearboxes

Features and advantages

- Hygienic design
- Sturdy and reliable
- Compact design
- High quality
- Can be equipped with stainless AC motors, servo motors, encoders & brakes
- High efficiency or self locking
- Custom design

Premium stainless steel worm gearbox

Standard stainless steel worm gearbox

Stainless worm gearbox with a special motor flange for DC motor and a stainless motor shiel

Integrated stainless steel worm gearbox with enhanced bearings and special output shaft

Standard stainless steel worm gearbox

Helical and helical bevel gearboxes

The helical bevel gearboxes are characterised by high power density and an efficiency of up to 96%. The compact and modular design makes the gearbox easy to incorporate in numerous applications.

Features and advantages

- Reliable performance
- Compact design. Available in hygienic design
- Quiet, reliable and efficient operation
- High quality
- Can be equipped with AC, DC or servo motors, encoders and brakes
- Custom design

Actuators & worm gear screw jacks

Actuator in stainless steel
with trapezoidal spindle or ball screw

Actuator based on too-
thed belt drive made
of stainless steel with
motor of stainless steel

Stainless steel actuator with
motor and the stainless steel
BJ-Gear brake

Flange bearings

NG bearing units are of high material resistance and a design, that is easy-to-clean. To reduce the risk of bacteria growth the design is characterised by a smooth surface and rounded corners. The bearings are maintenance free and resistant to all cleaning products and to most chemicals.

We also offer bearing units of stainless steel.

Features and advantages

- Solid housings
- Easy assembly
- IP66 & IP67 (IP68 and IP69K on request).
- Maintenance free bearings
- USDA accepted
- Food grade acc. to reg. (EC) No. 1935/2004
- FDA food grade acc. to CFR 175.300
- NSF H1 registered grease

Customisation is our standard
