www.rotogal.com   

Why Rotogal?

Rotogal is specialized in the manufacture of large volume containers, pallets and handling products and has become a reference after almost 20 years of experience in the rotomolding sector.

We manufacture isothermal containers of the highest quality, as well as hygienic containers of high resistance and pallets for different markets, mainly fisheries and food industry. If you can't find what you are looking forwe will make it.

Focus on innovation, we develop new models, using different

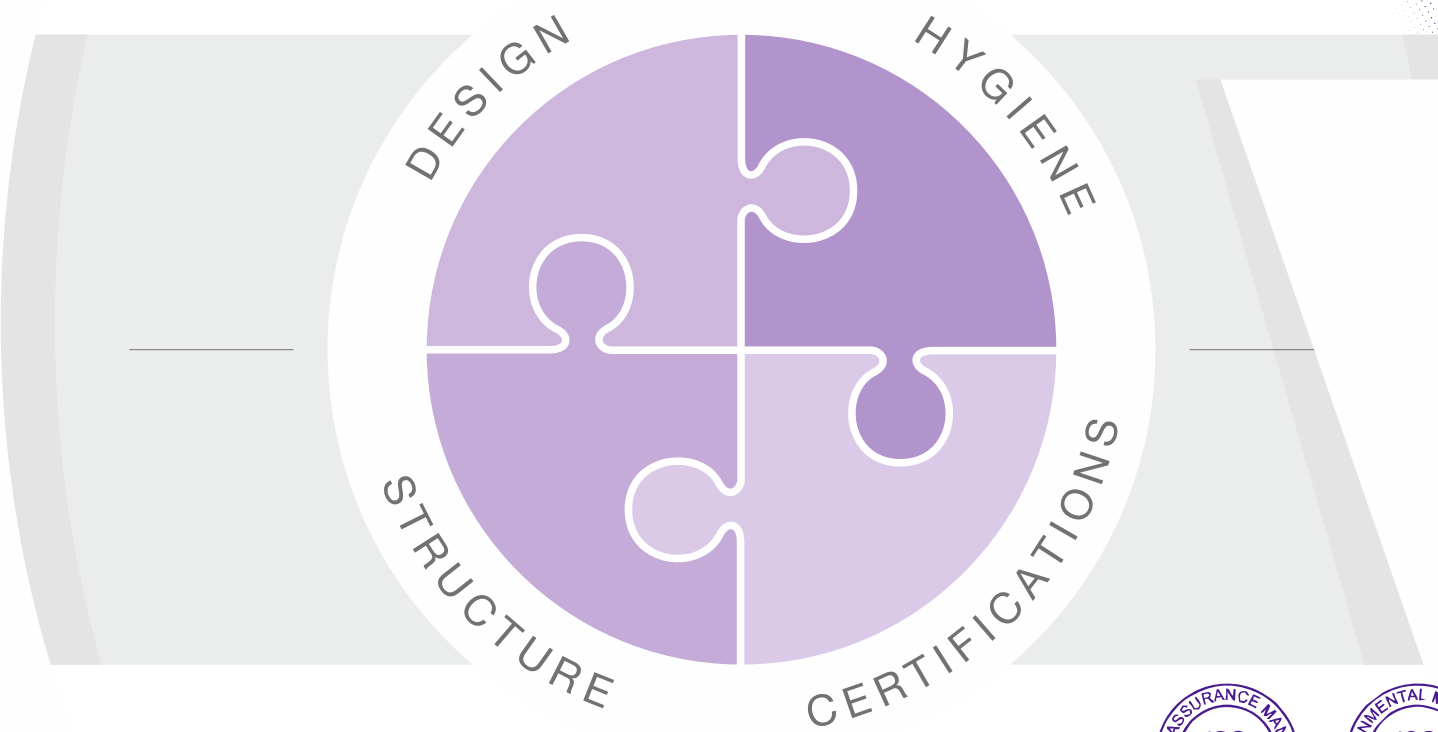

materials and providing much added value to our customers. Our team of industrial designers is specialized in the rotational molding process and we make use of the most advanced technology with the lowest environmental impact.

We are certified to guarantee the highest quality of our products. The ISO standards (9001 / 14001) certifies our quality controls.

This makes us a safe and reliable supplier for the most exigent markets.

- Manufacture in double wall (PUR). High insulated capacity.
- Triple-wall construction (PE) 100% recyclable. High resistance for the food industry.
- Development of tailored containers and pallets. Custom molding service.
- Completely smooth surfaces, internally and externally.
- Reduces cleaning costs and resources.
- Avoid cross-contamination. Guaranteed safety and peace of mind.

- Robust, resistant and durable.
- Lasting investment. Save on costs and continuous replacements.
- Great tensile strength and excellent mechanical behavior.
- Certificates of food suitability
- Plastic food contact materials
- Overall migration test

Operating on 5 continents

48 countries

Sectors

EPE

High resistance containers

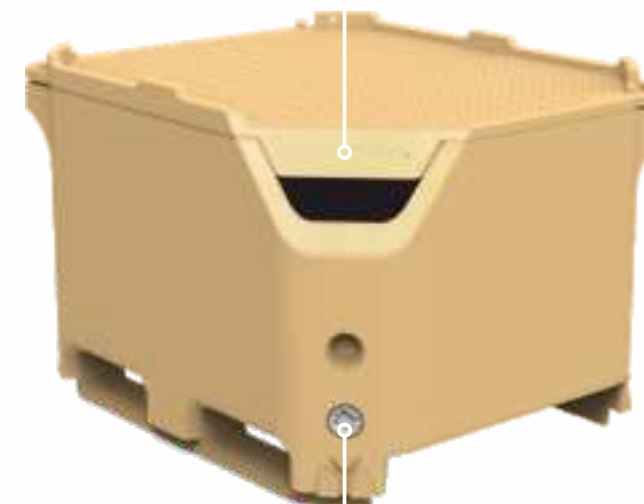

Triple wall

◀ maximum resistance

keeping freshness ▶

Insulated tubs

PUR

Threaded drains for easy cleaning and draining.

CONSERVATION

Its construction and the PUR foam allow preserving the quality of the contents while maintaining its temperature.

SMOOTH SURFACE

Ensures perfect hygiene and prevents cross-contamination.

DOUBLE-WALL

Providing extra strength, extending the service life.

ONE SINGLE PIECE

Durability and handling safety with traction vehicles such as forklift trucks or elevators.

PUR = polyurethane foam

Polyurethane insulation injected into the walls of the containers, guarantees a very high insulation factor. The main advantage of PUR containers is the temperature maintenance and control. A safe cold chain supply solution.

TRIPLE-WALL

Triple plastic wall construction (avoids possible spills during transport or storage).

LONG SERVICE LIFE

Multiplies the usability of traditional containers as it is made of triple-wall EPE.

100%HYGIENIC

100% smooth surfaces internally and externally, avoids residue accumulation and prevents cross-contamination.

FOOD SAFETY

Integrated pallet made in one piece reduces the risk of contamination with plastic debris on the feet of the container.

HIGH IMPACT RESISTANCE

Guarantees peace of mind, avoiding loss of liquids and protein.

FUNCTIONALITY

Stacking compatibility with traditional single-wall containers. Makes it easy to switch to a higher quality container.

Available with or without insoles

RECYCLABLE AND DURABLE

EPE = polyethylene foam. Closed-cell foam with extreme strength, durability and mechanical behaviour. used in the construction of triple-walled polyethylene parts, providing high impact resistance. Recyclable and durable

Smooth walls

Products

Lids are available for most of the references in our catalog.

Accessories

Accessories available to add value to our containers: wheels for transport, safety locks, unloading hooks, threaded drains...

Brand

Get your containers branded with your company name or logo, or have them numbered for easy identification.

Traceability

Make your containers easily traceable with the addition of barcodes (on the mold itself), QR codes, RFID (radio frequency identification) tags, or GPS devices.

Custom

Cannot find what you are looking for? We are pioneers in the production of custom-made parts and pallets upon request. We will discuss your needs and study your project, always reaching the objectives of personalized development requested.
