

DGS provides complete slaughter systems and primary meat processing lines, prioritizing animal welfare at every stage. Our approach goes beyond technology, encompassing the entire journey from animal reception to the humane stun and slaughter process. This commitment not only aligns with ethical principles but also guarantees the highest meat quality. Additionally, our registration software enables precise tracking of each animal's journey, ensuring transparency and traceability from reception to product dispatch.

Dirty slaughter lines

- Stun box
- Bleeding line
- Leg transfer systems
- Dehider
- Empty hook systems
- Sanitation and hygiene

Clean slaughter lines

- Conveyor systems
- Platforms
- Organ conveyors

- Deboning
- Tracking and tracing
- Weighing and scanning
- Crate logistics

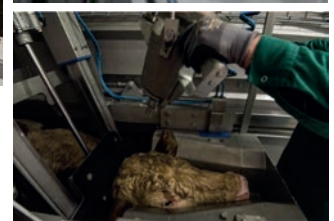

Cold stores

- Automatic conveyor systems
- Buffer conveyor
- Expedition and loading
- Quick chiller
- Organ chilling

Featured solution **DGS Stun box**

- Pneumatically driven
- Electrically driven
- Ergonomic design
- High regards to animal welfare

Our LEH stun box has been designed to prioritize animal welfare throughout the stunning process. Its innovative construction minimizes stress on the animals, ensuring their comfort and well-being. The specifically crafted chin box enhances this stress-reduction feature. Furthermore, the DGS design guarantees that animals maintain no visual contact with the operator, supporting their peacefulness.
