High Performance Circular Slicer Blades

No Matter How You Slice It, PRIMEdge Makes the Cut!

Through four generations, PRIMEdge has met creative and strategic meat and cheese slicing challenges with breakthrough solutions. It pays to put PRIMEdge knowledge to work in your slicing operations.

Choose from Teflon® and various other coatings to best suit your most challenging slicing applications including sticky cheeses, ultra-thin-slice meats, etc.

PRIMEdge circular slicer blades are ideal for high-speed slicing of processed and whole muscle meats as well as a wide variety of soft cheeses.

Our blades are precision ground out of premium quality stainless steel or hard-chromed carbon steel for a perfect fit and superior performance. They are available for all makes and models of popular slicers in a variety of bevel styles to suit your application perfectly. Custom blades are available as well for your specific needs.
