

# eSKINNER

**ELECTRIC. EASY. EFFICIENT.**

**Made in  
Germany**

**MORE MEAT - LESS COSTS**  
Discover the advantages of the innovative  
eSkinner technology

**50%**

**Lower  
Noise**

Due to silent electric  
drive for a convenient  
working environment

**30%**

**Higher  
Yield**

Due to precise and  
razor-thin cut and  
minimized fat on  
the skin

**80%**

**Lower Energy  
Consumption**

Due to electric  
motor in relation to  
pneumatic drive

# PRECISION MEETS ECONOMY

## Revolutionary efficiency for the deboning industry

See Video

The **eSkinner from GECO** sets new standards in the deboning industry. With its innovative design and the latest technology it gives you unbeatable advantages in terms of **efficiency, cost savings, Comfort and durability.**

## RAISE OF EFFICIENCY IN ALL AREAS

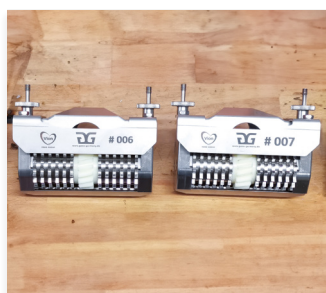

### More Yield

Due to precise and thin cut there is less fat on the skin which leads to **significantly increased yields.**

### Energy Saving:

The electric Skinner from GECO is consuming up to **80% less energy** than pneumatic equivalents.

### Low Maintenance

The electric motor with flexshaft drive makes high & costly maintenance **planetary gearboxes and air motors obsolete.**

### Process-optimization

For blade change there are no tools needed, simple 1-hand on/off operation for efficient and **quick working processes.**

## More Benefits of the GECO eSkinner:

### Hygiene Design:

Avoiding dead spots and contamination due to oiled compressed air

### Easy Washdown:

Complete disassembly with one tool

### Higher Line Speed:

Due to innovative handling and powerful motor

### Low noise:

Convenient working environment due to low noise

### Safety Features:

Low wearing 1-Hand safety system

### Versatile Usage:

Suitable for many jobs in deboning

# INVEST IN SAVING

## Thin cut, high precision & maximum yield

Due to its precise cutting technology the **GECO eSkinner** allows to cut razorthin. This cut is approximately 30% thinner than comparable machines. This leads to **less fat on the skin**.

### Example thin cut:

\*As 400 kg less rind per day, with the same rind weight.

Calculate  
your  
personal  
higher yield!

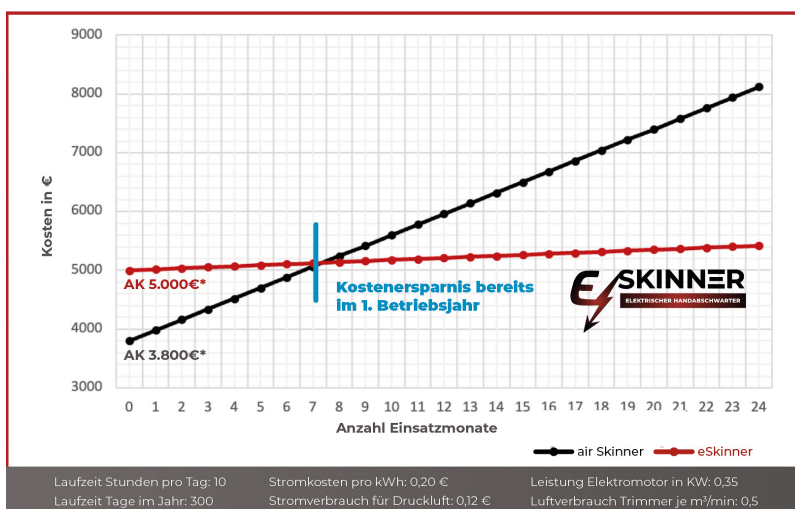

### Minimal fat residue:

The thin cut ensures that hardly any fat remains on the rind remains.

### Fast ROI

Due to the significant yield increase the machines return on investment is only a few weeks.

## UP TO 80% ENERGY SAVINGS in comparison to pneumatic machines!

With the most **innovative eSkinner** of the world You don't just save money, but also help protecting the environment. calculate it with our simple savings calculator. The GECO eSkinner will already be profitable for you in the first year.

Calculate your savings

THE CUT**

# **GECO SERVO SPEED ST**

## **The future drive for cutting rooms!**

The Servo Speed ST provides power and precision for perfect results at the same time high ease of use. The high water protection and robust Stainless steel housing makes the motor the ideal universal motor in every deboning.

With its automatic hybrid function It is the first engine that is suitable for both eSkinners and trimmers with round knives. The engine is impressing with its low maintenance and long-lasting through its reliability. Comprehensive Security features ensure Operator protection.

### **Discover the Versatility of the new Hybrid Motor Drive**

#### **Automatic Hybrid Function:**

Switches automatically from Skinner to Trimmer parameters.

#### **Powerful and precise:**

High output, energy efficient, low maintenance.

#### **Low weight and silent:**

Less-fatigue working, pleasant vicinity.

### **Invest in Saving today and benefit from:**

Higher Yield

Energy Savings

High Productivity

Effective noise reduction

Comfortable operation

Low maintenance & durable
