

Paper barrier trays

In harmony with nature

Up to 90% less plastic

FREE
Combination of cardboard and foil without glues and chemical additives

High-barrier film lining considerably extends shelf life relative to PET and PP packaging (in some products*).

Recyclable tray.

Possibility of any printing on the outside and inside of the package.

**80-90%
plastic
less**

*Ask our sales advisors for details.

- Application: red meat, poultry, fish and seafood, plant products, ready meals and delicatessen, lettuces and salads, etc.
- Suitable for following conditions: MAP, SKiN systems, frozen, chilled.
- Well designed construction prevents unsealing of the package.
- Recommended for packaging with tray sealer and flow-pack methods.
- Can be stored in the fridge, freezer, microwave and oven reheating (optional).
- Well-thought-out, robust, stable package design.
- No need to change the tools in the packaging machines. Dimensions compatible with the most popular dimensions of plastic trays.
- Easy separation of foil liner and cardboard.
- Various sizes, volume, shapes and formats.
