

## EFFICIENCY THAT DRIVES RESULTS

Horizontal packaging machine manufactured in Brazil  
with efficiency and technology to conquer the world.

✓ **Robust design  
and high-speed  
operation**

✓ **Production indicators:  
OEE, Availability, and  
Performance.**

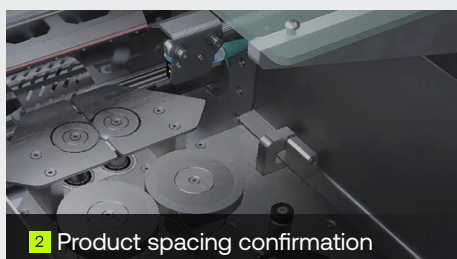

## Standard Items:

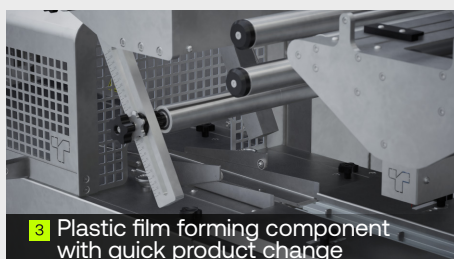

### 1 Function: No product, no bag

Identifies when there is no product feeding, pausing the process and automatically restarting when a product is detected.

### 2 Product spacing confirmation

The automatic product spacing configuration ensures precision and consistency in packaging, preventing waste and ensuring the quality of the final product.

### 3 Plastic film forming component with quick product change

This component allows the film to fit perfectly around the hamburger, ensuring a secure and uniform sealing.

### 4 Dual Support for the coil

### 5 OEE reports generation

### 6 Operating system with TRT interface

## Optional Items:

### 1 Automatic knife cleaning

The automatic knife cleaning ensures hygiene and efficiency, preventing contamination and maintaining the quality of the packed products.

### 2 Air removal from the package

By minimizing the burger's exposure to air, it preserves its texture, flavor, and aroma, ensuring the final product maintains its quality.

### 3 Automatic product rejection

The product rejection mechanism ensures the absence of empty packages and the integrity of the packaged products.

### 4 Automatic film splicing

### 5 Set for metalized BOPP film

### 6 Manual feeding cup

### 7 Printmark reading and synchronization system
