

Technology

PHT

stands for Partnership, Hygiene and Technology

To help you find your way around the PHT world, we have organized our portfolio according to three business units:

Partnership

Service

From conceptualization, detailed technical planning to total hygiene packages

After-Sales-Service

From delivery and installation, training and commissioning, as well as start-up, up to maintenance and a service contracts

Hygiene

Employee hygiene

We cover all hygiene-relevant points in your workflow starting with access control, from change rooms and canteens to hygiene lobbies and all necessary hygiene equipment for your facility.

Facility hygiene

Everything you need for cleaning your facility and machines: from high-quality brush ware to low-pressure foam cleaning technology, coupled with all the required accessories for drainage systems, and complete furnishing of your chemicals room.

Technology

Cleaning and drainage technology

We offer innovative cleaning and drying technology for all tubs, containers, trolleys and transfer systems in your facility. And because thinking about hygiene does not end at the wastewater outlet of a machine, we also offer appropriate drainage technology.

Handling and logistics systems

From the design and installation of high-quality, hygienic stainless steel equipment to automated lifting and tilting systems and technology for conveyor, racking and commissioning systems. Modern systems protect your products and reduce the time spent on the production floor, and so promote hygiene.

We further design customized hygienic slaughtering, deboning and cutting as well as smoking and cooking systems. Modern systems, for example UV and Microwave technology, protect your products, shorten the time required for manual input and thereby increase the overall hygiene.

PHT Products of Technology

Image 01

Leading through innovation

Modern technologies for hygiene-sensitive areas.

Food manufacturers and companies with hygiene-sensitive areas have a particular special responsibility for hygienic and safe processes. PHT offers modern technologies that optimise the workflow and ensure hygiene. This begins with innovative cleaning systems for containers and extends to professional floor drainage.

Modern conveying technology, ergonomic systems and well thought-out operating equipment make work processes efficient and protect your products.

Innovative Technology for your production

- ▶ Crate washing machines
- ▶ Vibration dryers
- ▶ Cleaning of lifting and charging trolleys
- ▶ Washing machines
- ▶ Turntables for packaging
- ▶ Conveyor systems
- ▶ Lifting and tipping devices
- ▶ Swingloaders
- ▶ Weighing devices
- ▶ Working belts
- ▶ Charging systems
- ▶ Drain technology

- ▶ Stainless steel shelves
- ▶ Smoking trolleys
- ▶ Stainless steel pallets

Image 80

Innovative technology

More efficient in daily production.

For the success of companies with hygiene-sensitive areas, it is crucial that all areas complement each other and function as a whole. This protects employees and hygienically safeguards products in your company. Efficient crate cleaning systems, conveyor technology tailored to your company, ergonomics and the right operating equipment facilitate the workflow and complete your overall concept, in which personnel and operating hygiene as well as technology interlock.

Would you like to have a partner at your side who both develops the right concept for you and provides fast service afterwards? Get in touch with us.
