FINISH. FOLD.**

**AS INDIVIDUAL AS
OUR CUSTOMERS!**

OUR PROMISE

More flexible than ever. Whether it's an ultra-light polo shirt or heavy overall: every single garment is perfectly hung and finished with the Fintec automatic hanger Vario.

Thanks to its modular design, it adjusts to the requirements and enables a dimensionally stable finish process up to automatic component feeding on the folding machine.

IDEAL SHAPE FOR ALL GARMENTS

The automatic hanger for a fully automatic quality finish of garments

FINTEC AUTOMATIC HANGER VARIO

THE MORE FLEXIBLE THE HANGER, THE MORE STABLE THE FINISH

As an elementary component of the optional fully automatic system, the Fintec automatic hanger guarantees the continuous flow of garments in all kinds of packings. Tailored to appropriate folding and sorting, all pieces of laundry are hung up mechanically and the empty hangers are automatically fed back to the loading station.

In line with Fintec's modular principle every component is interchangeable, the hanger fixed or refitted quickly. With just a few steps it can be adjusted to the respective type of garment: the special version for overalls, with proven trouser clips or the exclusive Fintec shoulder pads for polo shirts. With its solid construction and contemporary extras, the Fintec automatic hanger is an economically attractive all-rounder in garment finishing.

BASICS AND EXTRAS AT A GLANCE

- Comfortable hanging of individual garments
- Dimensionally stable transportation
- Durability thanks to modular design
- Chip assembly left or right
- Compatible with other brand systems
- Easy retrofitting e.g. of switch lugs and barcode holders
