Wash & Dry

S.wash[®]t

S.wash-t is a top performing and versatile tunnel washer, tuned for high production laundries.

The lowest possible downtime has been reached thanks to a direct connection between each S.wash-t tunnel washer and CLM-Textfinity and a fast response time.

The tunnel washer is available in 8 up to 16 compartments of 60kg or 80kg each.

S.press[®]

The S.press is a robust water extraction press design with top quality parts. This results in the excellent proces and extends the lifetime of the water extraction press.

18/25/40/60 100/120

100/120-T
15° tilted

S.wash^e

New generation high quality Washer Extractor with 18, 25, 40, 60, 100 and 120kg capacity.

Our continuous efforts in maximising the reliability of the S.wash-e has led to a robust design with top quality parts. This results in the excellent washing proces and extends the lifetime of the washer extractor

S.dry^p Gas or Steam heated

High Efficiency Passthrough Gas or Steam Dryers, 60/120kg

Thanks to the advanced engineering and the use of intelligent technology, the S.dry-p is a top performing and versatile transfer dryer, tuned for high production laundries.

S.dry^f

The stand-alone tumble dryer for small to medium volumes. Available in loads of 30, 50, 70 and 100kg.

Thanks to the highly optimised process, drying times for the dryer are reduced to a minimum, with the lowest possible use of energy.

Flatwork Finish

S.feed^s

High quality and high speed Feeder, 3 or 4 stations !

Our continuous efforts in maximising the reliability of the S.feed-s has led to a robust feeder design with top quality parts. This results in the excellent feeding precision and makes the S.feed-s a top performing feeder, tuned for high production laundries.

S.feed^m

High quality and high speed Manual Feeder !

Our continuous efforts in maximising the reliability of the S.feed-m manual feeder has led to a robust design with top quality parts.

S.iron^c

With 3-pass heat exchanger

The reference ironer steam or gas heated !

Thanks to advanced engineering and the use of intelligent technology, the S.iron-c is a top performing industrial ironer, tuned for high production laundries.

Sfold°s

Ideal solution for high quality folding of small items (napkins, pillow cases, kitchen towels etc). This small pieces folder will deliver you nice stacked and folded items.

Sfold°m

The versatile high quality and high speed folder, that folds and automaticall stacks on 4 or 5 lanes, thus avoiding a range of stackers at the side of the machine.

Sfold°/

The versatile high quality and high speed large pieces folder that folds and stacks. Again and again, without giving in on quality.

The sheet folder is available in different versions:

- 2 or 3 long folds
- 3 cross folds on 1 or 2 lanes
- 3.000mm up to 4.000mm working width
- 1 or 2 stackers

Full Dry Finish

Stowel^a

Folding machine

The fast, versatile Towel Folder, for high speed folding and stacking. Thanks to advanced engineering and the use of intelligent technology, the S.towel a is a top performing Towel Folder, tuned for high production laundries.

Somni^a

Folding machine

The fast, versatile Folder, for high speed folding and stacking of all sorts of garments, t-shirts, incontinence pads, airline blankets, fitted sheets, etc ...

Sort & Handle

xpack®

The X.pack is a top performing and versatile packaging machine tuned for high production laundries. The design of the X.pack and its user interface makes it easy to understand, easy to use and easy to maintain.

- S.load c** loading conveyor without compartments
- S.load l** when space is an issue: a lift for loading the tunnel washer

Sbelt®

Single or double load shuttle/lift/conveyor for moving the cake(s) from the press to the dryers and automatically unload into the dryers.

Scontrol®

New controls for your existing machines.

Is your control broken or outdated ? We replace any control from any brand with a new state of the art PLC and Touchscreen.

And this for all tunnel washers, presses, drying systems, feeders, folders, ironers, bag systems, conveyor systems, etc...

Support, the next level

We keep your textiles moving

Introducing the CLMTextfinity Service

In 2010, CLMTextfinity made a promise: to personally ensure the safety, reliability and functionality of every machine – without compromise. And they signed their name to it.

This vow is more than ever alive today through our dedicated and passionate people. And we're building upon their personal commitment with investments in new technology.

Our name is CLMTextfinity – and count on our next level service

A more personalized experience

We put you and your customers at the center of everything we do

Personalized contracts

Flexible service packages offer maintenance and connectivity options to suit your needs.

Custom notifications

Easily customise your communication preferences to access real-time notifications and simplified, faster reporting.

Event alerts

Event-driven alerts keep you in the loop on important updates about your equipment.

Academy

Tailor made education for your technicians help you avoid downtimes, increase product lifespans and plan for the future.

We are committed to being easy to do business with. That means giving you a single place to find all the information you need when you need it. Contact our teams directly via phone, chat or email, and track maintenance and equipment health in real-time.

CLMTextfinity designs, develops, manufactures, implements and services a full range of industrial laundry solutions.

Our customers range from industrial laundries and textile rental suppliers as well as hospital and hotel on-premise laundries.

The equipment is constructed in our 3 production factories in China, covering around 133.000 square meters of working space.

Customers highly value our strict standards in production, people and quality management according to ISO9001 norms and we are experienced in both Western and Asian industry cultures, standards and languages.

Let's emphasize that during the production of our CLM Textfinity machines, their ecological footprint is already accounted for. Our commitment to sustainability begins at the inception of these machines, ensuring that they leave a minimal impact on our planet.
