HOTEL GROUP

"We decided to make this investment because a lot of laundries were disappearing. Since then, annual purchases have been halved."

Director of the AP-HP laundry

ASSISTANCE
PUBLIQUE HÔPITAUX
DE PARIS

"We have been working on traceability since 2013. After a lot of research, we finally found a service provider in Paris with whom we set up a system that has enabled us to increase our turnover by 7%."

Director of the Senecal slaughterhouse

SENECAL
QUALITÉ - TRACÉABILITÉ - PROXIMITÉ

"Today, we are successfully deploying this technology at many sites around the world, which has given us better visibility of our business."

Transformation project manager
at Faurecia

faurecia

"The solution implemented allows us to carry out fast and reliable inventories, which has enabled us to consolidate our DCIM within the data centre."

Head of Proximity and Logistics
at the Orange Normandy data centre

European leader in innovative RFID/IoT traceability solutions

Since 2008, we have deployed:

- + more than **600** customised applications in **more than 30 countries** with the most demanding manufacturers.
- + More than **15 000** RFID devices installed to support our customers' growth.

Today, more than **1 billion** transactions, each year, are carried out on our cloud-based platforms.

OUR MISSION AND VALUES

RETHINK PROCESSES

Faced with complex production, operational and management challenges, UBI Solutions streamlines processes to drive efficiencies and reduce costs.

BRINGING TRANSPARENCY

Promote information and data sharing to build strong relationships and trust.

INNOVATE CONTINUOUSLY

Innovation is at the heart of UBI Solutions' history, with 30% of turnover devoted to R&D and new product development.

A COMPANY COMMITTED

UBI Solutions aims to achieve social and environmental best practice throughout our operations wherever possible.
