COMPANY HISTORY

In 1960 Mr. Baratelli founded Sidi Mondial . In the early stages, the company produced manual and pneumatic presses, form finishers, vacuum and up-steam ironing tables. In 1983 Sidi was sold to an American company CISSEL, known and famous all around the world for the manufacturing of laundry and dry cleaning equipment.

COMPANY HISTORY

This partnership lasted until 1990, when Sidi was acquired by the 3 new owners; I am one of these owners and the CEO of SIDI MONDIAL together with financial manager and an external partner. At the beginning SIDI MONDIAL was more known on domestic market, but in 1990 it became an international company reaching more than 50 countries.

GLOBAL COMPANY

- 80% of our production is exported all over the world with a network of more than 100 distributors

GLOBAL COMPANY

Clients and distributors all over the world allowed us to get the knowledge and the experience needed to improve the functionality and reliability of our equipment.

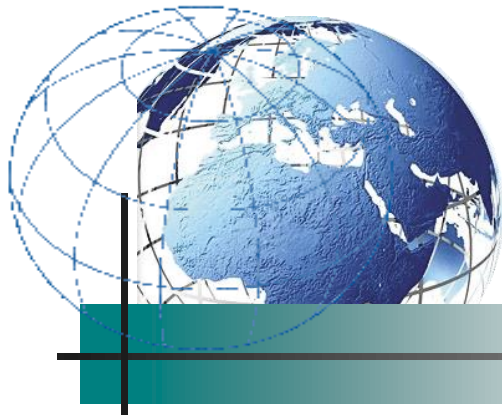

MARKETS

Sidi Mondial produces and sells its products in three different markets:

- LAUNDRY AND DRY CLEANING (40%)
- TEXTILE INDUSTRY (25%)
- COMMUNITIES like hotels, hospitals and retired home (35%)

**GENERAL OVERVIEW OF
LAUNDRY AND
DRY-CLEANING EQUIPMENT**

Thanks to our experience, we can suggest our laundry and dry-cleaning customers the following equipment models:

IRONING TABLES

Table NOVA is available with fixed height or with adjustable height.

IRONING TABLES

- The most required option is the cold table, the operator can quickly iron the garment with a consistent energy saving and a better quality.

IRONING TABLES

- As an alternative, we propose another vacuum and blowing table with innovative features to better satisfy customers' requirements in terms of quality, design and productivity.

IRONING TABLES

Vacuum and blowing Model TA-792/SF, our top of the range table available with a maxi or bottleneck buck shape, set for finishing with the point on the right or point on the left or both sides.

- Height adjustable
- Vacuum through a photocell
- Cold, electrical or steam heated board

IRONING TABLES

- These two tables are defined Cold Finishing tables, due to the fact that we can work without heating elements, thanks to a silicon padding, special cover and a special anti-condensate paint inside the board. In this way the eventual condensates are expelled.

FORM FINISHERS

- Form finisher with or without boiler, for jackets, coats, outerwear and raincoats.

FORM FINISHERS - TOPPERS

- Topper for finishing trousers.

FORM FINISHERS - CABINET

- As an alternative to the form finisher or the topper , Sidi offers a rotating cabinet to finish jackets and trousers, assuring an excellent heat insulation.
- It is available with 2 jackets forms or with 2 trousers devices. These options can be easily installed and removed in few minutes

PRESSES

SIDI offers the widest range of finishing presses and shapes such as universal, mushroom and legger shapes, besides the collar and cuff presses, trousers presses and those with polished head, specially designed for wet garments.

PRESSES

The press compared to the traditional finishing table offers a number of advantages , like :

- excellent finishing quality
- chance of regulating the finishing pressure according to the garment
- higher productivity and ease of use for the operator

PRESSES

MUSHROOM SHAPE

The mushroom press is great for pants tops, small garments, and shirt touch-ups.

UTILITY/LEGGER SHAPE

The most flexible air operated Legger Utility on the market.

PRESSES

- SIDI pneumatic press represents the most used universal machine , allowing to finish a very high number of garments per hour.

COLLAR AND CUFF PRESSES

COMPACT

CT-CP

TAURUS

LYBRA

TROUSERS PRESSES

POLARIS

ANTARES (NEW)

PRESSES FOR WET GARMENTS

LV-800/BB

LV-800/F

SPOTTING

The spotting cabinet EKO is the ideal unit to complete the dry cleaning, for the pre- and post-spotting facilities:

- small size of the cabinet
- winning aesthetics
- high-grade components (stainless steel)

SPOTTING

- Besides the spotting cabinet, SIDI offers cold spotting table
- It can be supplied with suction cap and ECO-FRIENDLY activated carbon filter

SPOTTING

- ... Or hot spotting table with the use of steam.

MULTI-FINISHERS

EASYFORM 2000

Manual trolley, rear, and side clamps.
Pneumatic closing of the front paddle
and side clamps.

**OUR OFFER FOR
HOSPITALITY INDUSTRY
AND OPL's**

SEMI-PROFESSIONAL TABLES (NEW)

Electrically heated vacuum utility tables, ideal for domestic use, communities and as a finishing station in laundries. Height adjustable, can be folded to save space.

■ FENIX / FENIX-S

■ DORADO / DORADO-R

IRONING TABLES

- Vacuum tables
& vacuum-blowing
tables with built-in
boiler.

GARMENT FORMERS

- Formers for jackets with built-in boiler.

PRESSES

- The pneumatic press Model CT-750 is sold basically to communities (OPL) like hospitals, clinics or hotels , where the lenght of the cycle is not essential as in the laundry shop.

PRESSES

- Sidi has a complete line of laundry presses with stainless steel polished head, which are highly appreciated in this sector.

SANITISING WITH OZONE

■ OZOCAB

Two products suitable for sanitisation by means of ozone production: OZOCAB cabin ideal for clothing and various objects, and OZOCUBO which is a professional portable unit ideal for sanitising closed spaces.

■ NEW OZOCUBO

SANITISING WITH STEAM

■ ARIES CARE

Specific series of electric steam generators with manual water supply and a comprehensive series of accessories, that allow vertical ironing through steam spray, thus sanitising hanging garment, or placed on a horizontal plane.

STEAM GENERATORS

Our range of electrically heated, external steam generators:

BR-2 with tank

**BR-50/65/90
with tank**

BR 1+1

**Thank you for your
attention and interest.**
