

New Wash Machine For Moduls

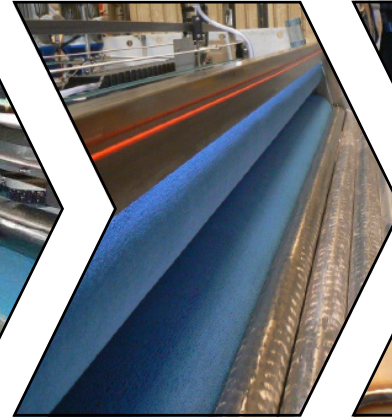

Continuous washing

Bottom wash

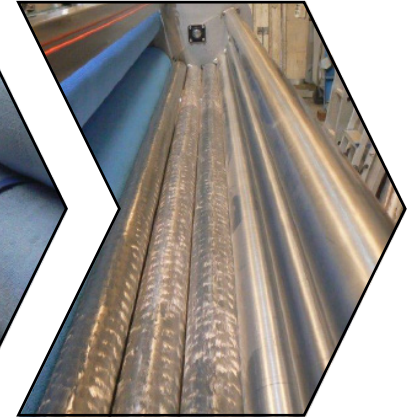

Rinse

Pre-centrifuge

Manual winder

Automatic winder

Assemble the machine to your present needs.

Standard modules can be combined with each other, there is no limitation on the number of modules or the number of them.

The modules are independent.

They can be purchased separately.

Assemble them with ease, easily.

It doesn't matter the order or quantity.

Multiple modules of the same type can be installed.

There are modules that can be added sub modules.

Modular system advantages:

Production can be increased without changing machines. Just by adding one or more modules.

Flexibility, change the machine settings according to the present needs.

Now the size of the machine is limited by the width of the truck, for transport. With the modular system, it is possible to send separate modules that exceed 2.5m when joined together.

A large machine can be shipped in 1m pieces that can be assembled in premises with small access doors.

You can start with a small machine and modify it according to future needs.

A lifetime purchase adaptable to changing needs.
