

Manufacturer of Textile Laundry Equipment

HOW DO WE MAKE OUR OVERHEAD TRANSPORT BAGS?

The monorail bag is the key element in automated conveyor systems used in large scale industrial laundries. Failure of a monorail bag can have financial implications in case of downtime and in the worst cases become a health and safety risk for the workers below. Several hundred kilos of laundry are being transported above the heads of employees so the quality of every monorail bag has to be 100% reliable. Regular inspection of the monorail bags for damages are therefore part of the daily routine within a large scale industrial laundry.

Precision

Specially selected threads and seams for heavy loads

Materials selection

Best materials to ensure the highest quality of our products

Durability

Modern, ultra-durable fabrics
100% nylon or polyester

Bespoke items

We can produce bags for any conveyor system

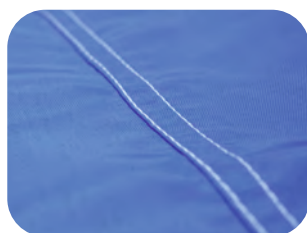

RTP understand and takes on the responsibility that comes with the manufacturing of monorail bags. Thanks to our keen eye for detail, technical highly skilled sewers and through the cooperation with suppliers that continuously produce high quality materials are we, at RTP in the position to supply our customers with high quality and reliable monorail bags. Simply give us a call or send us an Email with the monorail conveying system you are running and we will send you a free of charge sample so you can convince yourself of our quality.

Metal D-rings

Strong double hems

Numbers and company logo

Pockets for weights

Sizes

- Tailor made for any conveyor system
- Capacity from 50 to 150 kg

Fabrics

- 100% Polyester 190-220 g/m.²
- 100% Nylon 160-200 g/m.²
- Range of available colours
- Robust & Easy care
- Heat set

Handling/Closure

- Extra strong YKK zips
- Cord and metal or plastic D-rings
- Extra reinforcement

LINERS FOR ROLL CONTAINERS

Trolley liners are affixed on the inside of a trolley or roll container that are used for the collection of dirty laundry. They protect the laundry of further dirt and damage and improve the appearance of a filled roll container/trolley.

Product features

- robust and easy care
- abrasion resistant
- resistant to discoloration
- designed to fit any roll container
- washable heat transfer logo
- high tear strength
- range of available colours

Available colors

COVERS FOR ROLL CONTAINERS

Trolley covers are mainly used for the transport of clean laundry in trolley or roll containers and secured on the outside.

For trolley covers that have to withstand high demand a so called high tenacity yarn can be used. This gives you an increased abrasion resistance and tear strength that can be used for either the whole trolley cover or just as patches on known wear areas to increase the life of the trolley cover.

Sizes

- can be designed to fit any roll container

Fabrics

- polyester 160-220 g/m.²
- nylon 125-260 g/m.²
- waterproof or water-permeable
- heat set
- possibility of printing logo

Colors

- white, gray, black
- yellow, orange, red
- purple, blue
- green, dark green

Fastenings

- zips
- toggles
- naps
- cord and eyelets
