## With correct stapling you will have more reliable machines.

Our stapling service is  
“Professionally”  
performed, with care,  
precision and with  
the use of materials  
High Quality!

**EFFICIENCY** - the reliability of a machine, be it a folder or feeder, must always be at the highest levels. the cost of a machine downtime is very high, often overlooked in its value. overhaul your bending machines, improve their efficiency by replacing all the bands at the same time; fine-tuning your machine will optimize its operation and the simultaneous replacement of all bands will reduce machine downtime caused by sudden breakages to a minimum.

**QUALITY AND TECHNIQUE** - Our machinery for applying staples and cutting ribbons are professional to guarantee excellent sealing and maximum precision in measurement. The choice of staples is CAREFUL. Long leg, reinforced, standard, stainless steel, etc., etc.: there is no IDEAL staple, there is the ideal staple for that belt in that use. The staple is applied pneumatically, the edge is finished with a Thermograf whose application is suitable for the type of belt (high or low temperature), in the case of rubberized belts the edge is prepared according to the type of rubber design.

**SAVINGS** - Entrusting the creation of transport belts means:

Reduce material waste: how many unused tape reel residues have been lying in your warehouses for years?

Certain maintenance times: it is very different to commission the belts to dress a folder and face the complete replacement, rather than stopping many times and having to deal with the creation of the bands, the measurement, the cutting, etc. etc. with all the possible risks of error.

Savings in technical manpower: your specialized maintenance workers will be able to dedicate their time to more important and profitable activities for the laundry.

**HOW DOES IT WORK?** Please tell us the quantity, type and size of the tapes you need. We will create a sample for you which we will submit to you for verification. With your confirmation we will proceed with the creation of the entire quantity.

Planning, production, distribution and assistance of accessories and equipment for industrial, artisan and hospital laundries and for confectioners
