24 LINEN

SELF-SERVICE DISTRIBUTION

24 Linen is a tool addressed to Laundry Units that rent linen to clients and sanitize them and to Linen Rental Centers that sanitize their linen in various external Laundry Units.

The 24 Linen concept offers the possibility of **24/7 Self-Service Distribution** of sanitized linen, benefiting both Aparthotel / Airbnb owners and Laundry Units/Linen Rental Centers.

A complete solution that integrates current technologies so you can successfully approach new customers from trending market segments (Aparthotels, Airbnb, villas, guesthouses, and others).

Use technology to control your business activity: online, real-time reports about the textiles you rent (track&trace, collections & deliveries, inventory counting, and more).

Whether you are a laundry unit or a professional textile rental center, we collaborate to find the best solution to grow your business in the Apart-Hotels and Airbnb market.

Improve customer satisfaction through convenience: linen self-service is available 24/7 at your customers' fingertips.

Extend your textiles' lifetime and reduce waste. Streamline your supply chain operations for a safer environment.

We provide an intelligent solution suitable for companies that aim to serve small-capacity accommodation units such as Airbnb units, Aparthotels, villas, guesthouses, or units with a small quantitative need for linens.

The distribution of clean linens, as well as the collection of soiled linens to/from customers, is carried out by placing **Distribution Units (DU)**, fully digitized and automated, capable of supplying clean linens and collecting soiled linens from customers, without human assistance.

Key Features

- Complete All in the Box solution
- Easy to implement and operate, with no advanced IT&C knowledge
- Clear overview of your linen through Track&Trace features
- Manage many users simultaneously
- Real-time online reporting system
- Easy-to-navigate interface for customers
- Inventory management.
- Flexibility & Scalability
