Extremely flexible and versatile, KTS Cloud RFID Management System has industry-specific benefits for businesses that implement this solution.

Laundry:

- Reduce textile losses and make accurate decisions regarding stock refreshment
- Gain real-time visibility over your textile inventory
- Monitor and track the textiles usage level in an accurate way
- Save on labor costs
- Accurate and reliable info on your laundry cycle (collection of soiled items, sorting, deliveries, etc)
- Make real-time operational and business decisions
- No need for heavy investments in IT&C infrastructure and knowledge.

Healthcare:

- A necessary tool to ensure compliance with existing standards (EN 14065) for biocontamination control.
- Reduce Time and Cost to Manage the medical textiles
- Quick installation with no major investments or IT&C knowledge needed.
- Accurate information on textile items. Know where your textiles are at any time.
- Share and deliver the textile articles by departments.
- Easily monitor the valid time of action of the biocide impregnated on textiles.
- No need for large investments in IT&C infrastructure and knowledge

Hospitality:

- Reduce textile losses and make accurate decisions regarding stock refreshment.
- Optimize operations in your housekeeping department and reduce linen management labor costs.
- Accurate information on textile items. Know where your textiles are at any time.
- Calculate your cost-efficiency and ROI with high accuracy.
- No need for major investments in IT&C infrastructure and knowledge.

KTS Cloud
RFID Management System

Complete RFID Solutions
for Laundry, Hospitals, Hotels

KTS
CLOUD

At KTS RFID, we bring together RFID Hardware and Software products and capabilities as complete RFID solutions to successfully identify, track, inventory and secure textiles and related items.

We address our solutions to:

Laundry Businesses:

- ✓ Commercial & On-Premises Laundry Units processing textile articles belonging to their clients;
- ✓ Laundry Units that provide textile rental services to their clients.

End Users:

- ✓ Hospitals, Medical Centres, Clinics, Elderly Houses which need to identify and monitor their textile assets, mops, and other cleaning cloths.
- ✓ Hotels, Spa Centres, Accommodation, and Leisure Units that maintain textiles on their own or in external Laundry Units.
- ✓ Companies needing to track and inventory their workwear.

To address these businesses in the simplest, easiest yet efficient way, we developed **KTS Cloud RFID Management System**, an IoT real-time management solution, based on RFID technology, combining textile management software, RFID tags and reading devices, and Microsoft Cloud services to identify, track and manage linen and textile assets.

As a Cloud-based solution, the KTS Cloud RFID Management System comes with unbeatable advantages:

No investment
burden on IT&C own resources

Immediate installation
with no need for advanced IT&C skills.

Data security
is professionally ensured and with no need for major investments.

It's possible to work offline:
KTS CLOUD gives you the possibility to work offline, with data security and synchronization when possible. In case of an unstable internet connection, you can opt for pre-set synchronization sessions.

Advantages of server-based solutions, now in the Cloud:
you can verify the accuracy and correctness of the RFID scans locally, with no need to collect data in Cloud beforehand.

Flexibility & outstanding versatility:
the same RFID Reading Device can play any role in the textiles' flow in the laundry by accessing the specific software modules.

24/7 monitoring
and technical support.

KTS original RFID Tags

KTS RFID Reading Devices

Safe Data Storage

KTS Cloud App

KTS Cloud RFID Management System combines original KTS RFID tags RFID Reading Devices, safe Data Storage and Processing Media, and high-performing Software Suites, creating an integrated system that allows the efficient identification, traceability, security, and inventory of textiles.

It has never been easier to have visibility over your textile inventory, anywhere, anytime. KTS Cloud App provides real-time analytics and reports for the optimization of your business operations:

- ✓ Clean Textiles Report
- ✓ Soiled Textiles Report
- ✓ Items in processing phase
- ✓ Inventory
- ✓ Wear Level Report
- ✓ Delivery Notes
- ✓ Delivery Confirmation from Client
