

JLT facility in South Korea

Our galvanized wire hangers are crafted using advanced, automated equipment at our high-tech facility in Miryang-si, located less than an hour from the Port of Busan. The plant is meticulously maintained and operates in strict compliance with local environmental and safety regulations, as well as the rigorous standards of our clients. Its proximity to the port facilitates swift shipments, minimizing lead time from order to ship.

DRY CLEANING

Our galvanized wire hangers are a trusted favorite among laundry and dry cleaning clients, offering both durability and reliability for seamless operations. Designed with strength and aesthetics in mind, these hangers provide a consistently high-quality experience for your customers. We also offer customization options, tailoring the hangers to your specific needs to ensure they align perfectly with your operational requirements.

INDUSTRIAL

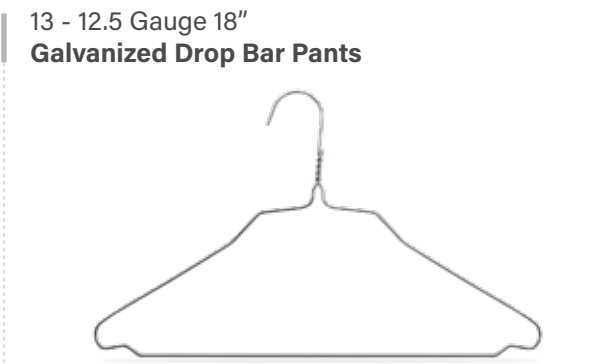

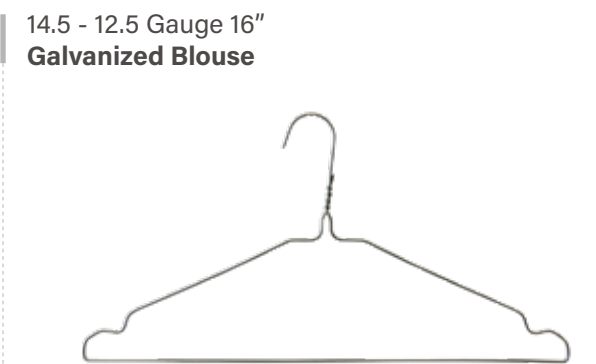

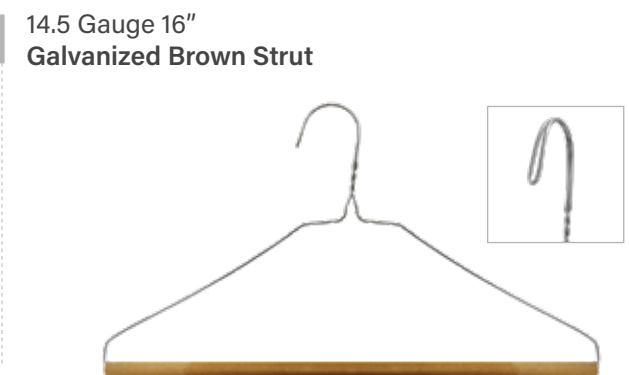

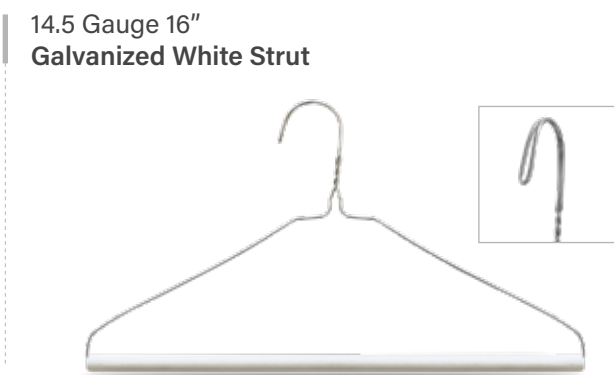

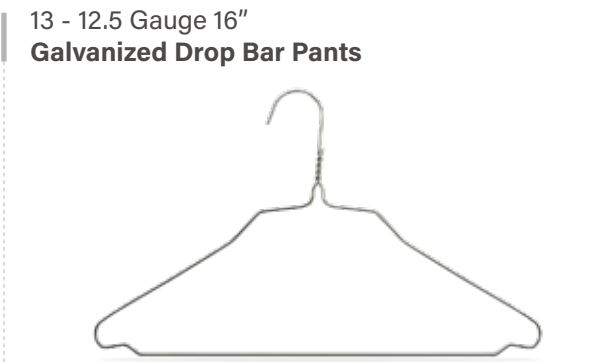

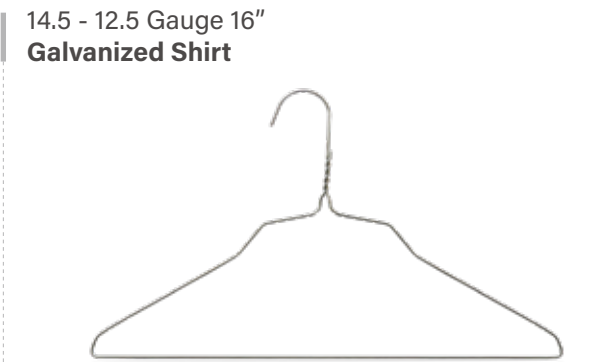

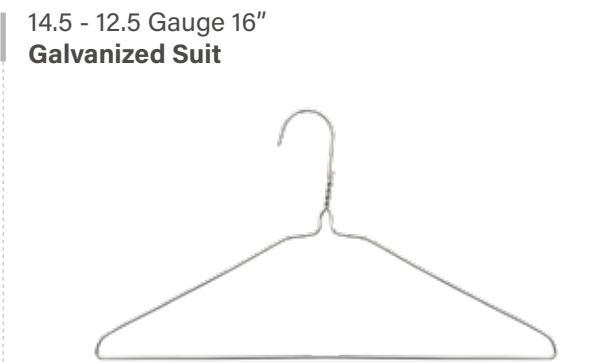

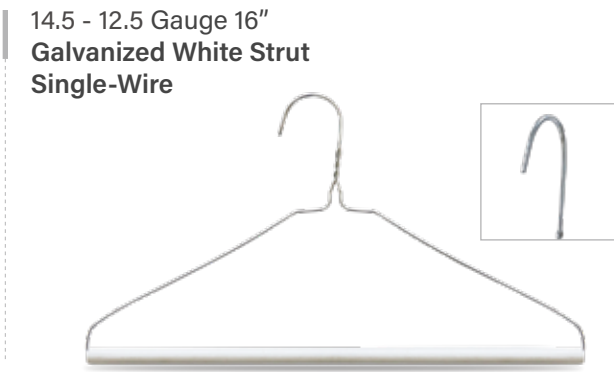

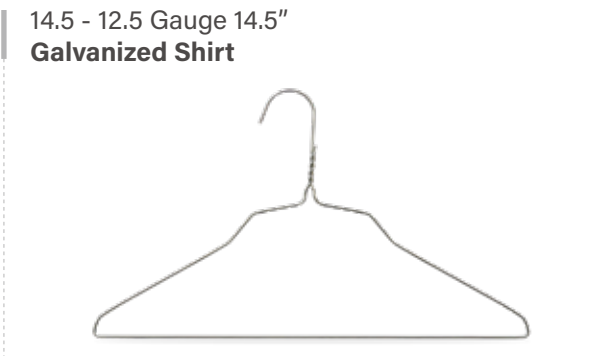

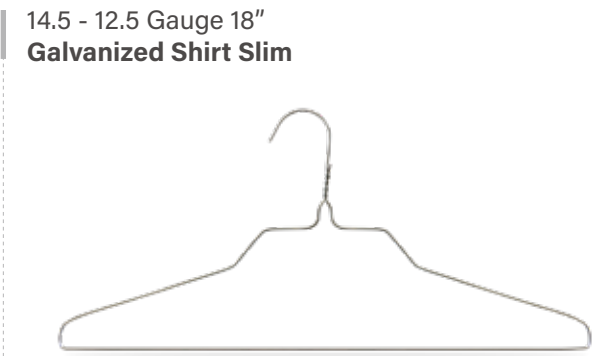

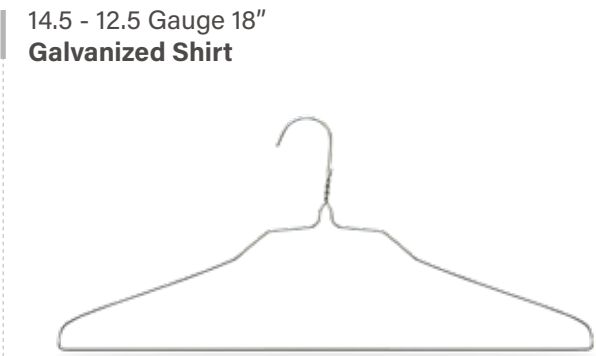

With over a decade of experience serving industrial clients, we produce hangers to the highest standards of quality and consistency, optimizing them for efficient sortation operations and minimizing inefficiencies. Our automated production lines, combined with our strategic proximity to the port, ensure fast lead times. We also operate in full compliance with the environmental and social standards set by our clients.

STRUT & CAPED

Our strut and caped hangers are crafted from high-quality galvanized wire. Strut hangers come in both single- and double-wire designs. The single-wire option is threaded through a paper tube for added support, preventing wire hooks from slipping and securely holding heavier garments. Alongside our standard plain and “WE LOVE” hangers, the cape paper design can be fully customized to reflect your unique branding.

Wire diameter
12.5 Gauge: 2.41mm
13 Gauge: 2.20mm
14 Gauge: 1.88mm
14.5 Gauge: 1.80mm

Neck length
Short Neck: 100mm
Long Neck: 115mm
