PREMIUM MICROFIBERS

bellanet[®]
PREMIUM MICROFIBERS

Many years of experience have made bellanet GmbH a specialist in textiles made from the highest quality Microfibers. Since 1987 we have been producing high-quality Microfiber products such as cleaning cloths, spectacle cloths, sponges, towels and pet products for cleaning, care and advertising. We have a selection of more than 500 different Microfiber qualities to choose from. If you need something out of the ordinary or a special problem solver made of Microfiber - we will develop a Microfiber product to meet your exact requirements.

In various production facilities in Europe and Asia, we produce Microfiber qualities in all possible colors and sizes - naturally with individual finishing and packaging options.

With our comprehensive stock range in different sizes, qualities and colors, you will always have a solution for your cleaning problem. This ensures that around 800.000 items are always available quickly and at short notice.

An extract from our mission statement

Excellence

Striving for excellence is an active part of our day-to-day business and helps us to continuously put our quality & expertise and our processes & services to the test.
That little extra is the minimum for us!

Enthusiasm

Satisfaction is not enough for us.
We create enthusiasm - from the team to the customer.
We aim to exceed our customers' expectations - always!
Our enthusiasm is contagious!

Dynamics

We act agilely, flexibly and consciously on the basis of today with a creative, sustainable view of tomorrow.
We keep on moving!

MICROFIBER EQUALS MICROPLASTIC ?

Microfiber cloths are made from synthetic fibres such as polyester, polyamide or polyacrylic. When these cloths are used and washed, fine synthetic fibers are released into the wastewater and thus into the environment. However, Microfiber cloths still have a major ecological advantage: they clean without chemicals and therefore help to reduce the use of cleaning agents.

Alongside cosmetics, microplastics from textiles are one of the smaller sources of plastic waste. Every year, around 500 to 2.500 tons of synthetic fibres are released from textiles in Europe. However, the figures relating to the release of synthetic fibers from textiles are controversial and more research is needed to estimate the actual amount.

WHAT WE DO ABOUT IT

Careful selection of raw materials for top quality

In the manufacture of our products, we attach great importance to the careful selection of only the highest quality raw materials. This premise ensures that our products are not only durable and robust, but also that they exhibit minimal fiber shedding during washing. This approach guarantees the exceptional quality and sustainability of our products by reducing our environmental impact while maximizing the lifespan of our products.

Production according to world-class standards for sustainability and ethics

We work exclusively with production facilities that are committed to manufacturing to the highest globally recognized standards. This commitment guarantees that each of our Microfiber products is manufactured under conditions that are not only environmentally conscious, but also respect the dignity and safety of workers. Our strict selection criteria ensure that you receive products that are ethically sound and contribute to responsible consumption.

Comprehensive quality controls for unshakeable confidence

Our motto is: Trust is essential, but systematic controls are crucial. That's why we rely on regular, detailed checks of our production partners, quality standards and the finished product itself. These close controls ensure that every aspect of our production meets our high standards. This in-depth monitoring enables us to guarantee compliance with our ethical, quality and environmental standards, so you can have confidence in the integrity and quality of our products with every purchase.

Minimum Standards

These are always guaranteed at bellanet GmbH.

- BSCI To improve social standards in the global value chain
- REACH EU-Chemicals Regulation
- FSC FORESTS FOR ALL FOREVER Internationally recognized standard for sustainable wood and paper products
- Global Recycled Standard International standard for the certification of recycled materials and sustainable production processes

On-Top Standards

Partly guaranteed by bellanet GmbH and can be optionally selected by private label customers.

- ISO 9001 Quality management systems in German and English
- ISO 14001 Internationally recognized environmental management standard
- OEKO-TEX STANDARD 100 Internationally recognized seal for testing for harmful substances

All currently valid certifications can be found at www.microfaser.de under the respective product.

CLEANING CLOTHS

Our Microfiber cloths are particularly suitable for thorough cleaning due to their structure and absorbency. They are the preferred choice for household use, but they have also become indispensable in industry. Whether as a dust cloth, window cloth or polishing cloth, Microfiber is impressive in all areas of application thanks to its enormous dirt absorption capacity and is also good for the environment as it saves on cleaning agents!

In addition to universal cloths, our range also includes special automotive cloths that have been specially developed for use on vehicles. Whether with or without a coating, the silicone-free Microfiber cloths are proven helpers in the German vehicle industry.

At bellanet GmbH, we have a total of around 800.000 items permanently in stock for you and can therefore quickly meet even

short-term requirements. These articles are standard items from the universal, glass & window, automotive and accessories for cleaning with Microfiber articles.

If you are looking for a special Microfiber product, you can choose from over 500 different Microfiber fabrics for all cleaning purposes. On request, we can produce your very own customized product according to your personal requirements.

There are no limits to the design possibilities. Shapes from cloth to pad or sponge are possible, as are individual sizes, special weaves and knits or special colors and patterns. The minimum production quantities are 2.000-10.000 pieces, depending on the quality. Please do not hesitate to contact us!

REFINEMENT OF OUR STOCK GOODS

We offer a wide range of finishing options to give a product from our stock range a permanently individual look. Turn our product into your unmistakable, personalized advertising medium. By means of printing, embossing, packaging or personalized satin or woven labels with your own logo, we can fulfil your very personal wishes.

Logo printing

Microfiber qualities with a short pile length are particularly suitable for a one- or two-colour logo print. The print is very effective on these. It should also be noted that the print color must always be darker than the color of the fabric on which it is to be printed.

Logo embroidery

Logo embroidery is a particularly high-quality way of presenting your logo in a permanent wash. However, high-gloss surfaces should be avoided with this type of finish.

Washing label

The Textile Labeling Act stipulates that the composition of textiles must be indicated for the end user. The standard version for this label is a satin label with a single-color logo print. If you want a particularly high-quality version, a single or multi-colored satin or woven label is a good choice. If our stock items are subsequently finished, the original label is removed and the new wash label is sewn on afterwards.

Packaging in polybag

A very classic variant for packaging Microfiber cloths is packaging in polybags. These polybags are available in different sizes so that you can pack your product individually or in different sets. You can also add an insert to this polybag. In most cases, an insert is a kind of sturdy flyer that contains information about the product, instructions for use or simply a visually appealing graphic.

Cornstarch bag

Cornstarch bags are a sustainable version of a polybag. They keep the cloths safe, protect them from soiling and are also good for the environment. The cornstarch bags last up to 1.5 years and are compostable. The bags are less transparent than conventional plastic polybags, which makes them very attractive.

Cardboard packaging

Another packaging option is cardboard or a cardboard box. Here, too, there are a wide variety of options and cardboard packaging can be designed entirely according to your ideas. There are both high-priced and more affordable variants. In most cases, this depends on the quantity.

Private Label

Would you like to design your cleaning cloths completely according to your ideas? Or perhaps you need a custom-made product for which our stock items are not suitable? Then take a look at our customized products from page 24 onwards.

Individually manufactured products
Read more on page 24

PRIVATE LABEL

In all industries, it is important to have a product that exactly matches the planned area of application and your own requirements. As individual as these wishes and ideas can be, we can manufacture your own personalized product. When developing your own product, you are free to choose the material, size and color and can also decide on special refinement and packaging options. The result is a product that is 100% tailored to you, your project and your wishes.

ANIMAL PRODUCTS

The Microfiber pet mat is a classic. The cleaning glove is also very popular and the paw cloth is just the thing after a walk. Special neck and belly strap protectors have been developed for the well-being of horses. In addition to these classics, it is also possible to realize individual projects in the field of animal products.

CLEANING STRAPS

Developed for a special area of application in the automotive sector, these Microfiber straps work extremely precisely, consistently and reliably.

Different Microfiber qualities ensure perfect cleaning results, depending on the type of soiling.

They can be used in highly technical areas and in automation with large numbers of pieces.

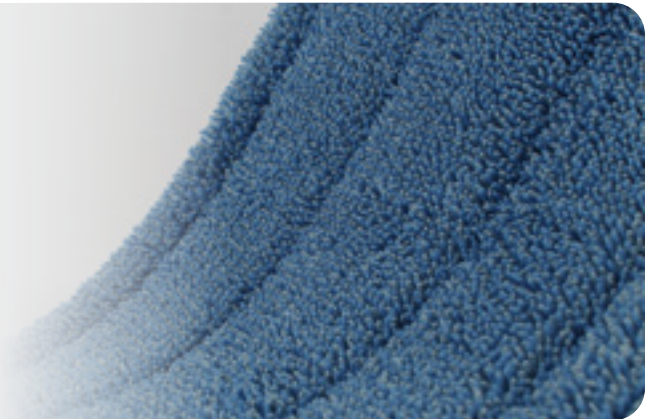

SPORT & BODY CARE

Depending on the type of sport or area of application, a sports towel can be customized with various adaptation options. From an anti-slip coating to a closable pocket, there are various options. But there are also various Microfiber products for the wellness sector, such as the hair towel or the face glove. Of course, individual projects for new products can also be realized.

METER GOODS

You can choose from over 500 different Microfiber qualities. On the one hand, you have the option of buying glasses cloths by the meter. On the other hand, you can also purchase the raw material for our cleaning cloths. We also offer plush fabrics, which are often used for the production of wipe covers and animal articles.

ADVERTISING MATERIAL

We offer you a wide range of customized promotional items. In addition to eyewear cloths printed in full color, we also offer eyewear cloths with logo printing and embossing as well as sticky cleaners that you can customize. We also offer you various packaging options to present your finished glasses and display cloths in an appealing way.

EVEN MORE PRIVATE LABELS

Would you like to find out more about private labels, custom-made products and customized products? Then request our private label brochure now or make an appointment with one of our sales representatives. **We will be happy to advise you!**

ASSUMING SOCIAL RESPONSIBILITY

Why CSR?

bellanet GmbH has set itself the goal of being the market leader for cleaning solutions with special fibers by 2030. In order to achieve this goal, it is important to ensure and expand the company's future viability. It is equally important to find, keep and retain good employees. Only with a committed team and satisfied employees is it possible to build a brand and achieve the company's goal together.

Following a self-assessment, bellanet GmbH developed a program of measures in 2020 with the aim of acting sustainably in all areas of its business activities in the future.

In the 4 operational fields of action "Workplace & Employees", "Operational Environmental Protection", "Product Responsibility & Market" and "Community & Civic Engagement", bellanet GmbH will continuously implement the measures developed in the future.

bellanet GmbH was awarded the title "CSR Unternehmen Westmünsterland" by the Münsterland Competence Center following an award audit.
