WE ARE DR.SCHNELL

DR.SCHNELL means family. After all, we are a family business in three senses. The company is managed by the Schnell family, now in its seventh generation. 320 employees in Europe, of which 85 are sales staff and 40 are service technicians, always make us feel as though we are part of a large family. This also includes you, our customers. We're there for you when you need us and are committed to learning more about you. We understand your requirements and aim to find the right solution. That's why you are assigned a personal contact and have access to a wide range of services as part of our family. We are fast-acting, qualified and dedicated to all matters involving cleaning and hygiene.

The management

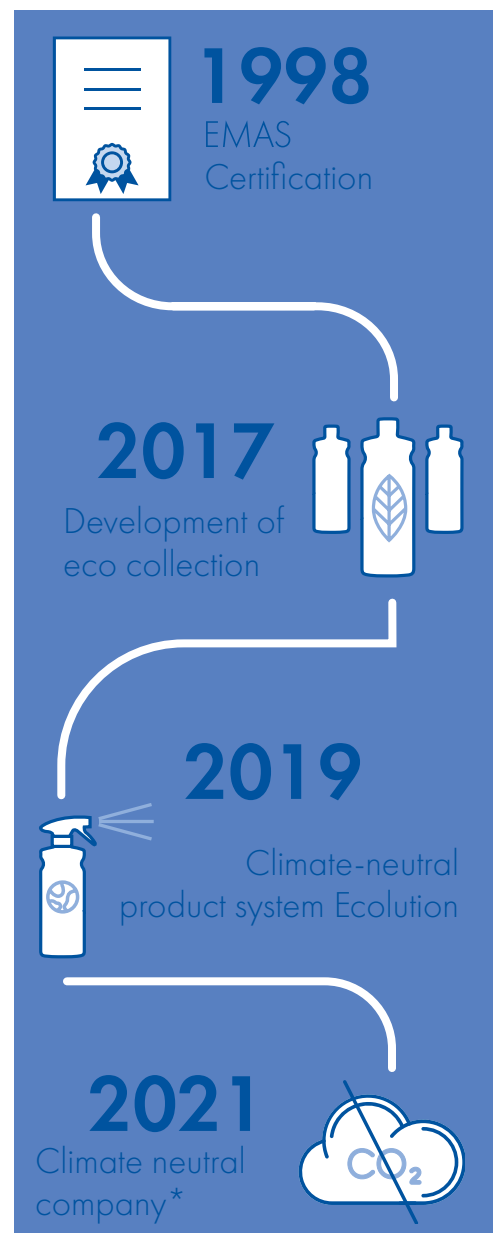

Dr. Thomas Schnell, jurist, joined in 2003, manages the company in its seventh generation together with an experienced management team. Dr Wolfgang Schnell, who celebrated his 60th company anniversary in 2023, continues to enthusiastically support the company as Chairman of the Board. Together, we are

shaping the future and focussing on our customers' needs, real sustainability and effective digitalisation. Our family and company have cherished these values for decades and will continue to do so.

Quality products made in Germany

Our top-quality DR.SCHNELL branded products meet the highest quality standards in terms of health, material and environmental safety along with excellent efficacy. DR.SCHNELL is certified pursuant to DIN EN ISO 9001 (quality management) and 14001 (environmental management).

OUR PATH TO MORE SUSTAINABLE HYGIENE

WE TAKE RESPONSIBILITY

Sustainability has a long tradition at DR.SCHNELL and is an integral part of our company philosophy. We have committed ourselves to the Paris Agreement and European Green Deal and their objectives to limit global warming to below 2°C and achieve a climate-neutral EU by 2050. Going forwards, our contribution will be as follows:

“Every innovation must be eco-friendlier than anything we have ever produced before, which means going far beyond the actual product itself.”

— Dr Thomas Schnell

1

To no longer bring new products onto the market without a Type I ecolabel (EU Ecolabel, Blue Angel, Nordic Swan, etc.) provided a category for this exists

2

To improve our recycling ratio and carbon footprint each year

3

Increase the use of renewable raw materials

4

Increase the use of digital solutions for training, dosing and management of maintenance and service requirements

EcoVadis Gold

EcoVadis lets you compare a company's sustainability with others in the same industry. The Gold certificate highlights our excellent rating in the areas of environment, ethics, labour law and procurement.

EMAS

We have been EMAS-certified since 1998 and perform annual reviews of all environment-related parameters within the company to find areas for improvement. The findings are published in our environmental statement.

KLIMANEUTRALES^{*} UNTERNEHMEN

certified by Fokus Zukunft

Klimaneutral durch Kompensation
mit Klimaschutzzertifikaten

DR.SCHNELL has been climate-neutral since 2021! We have analysed the climate impact of our supply chain and developed and implemented measures across all areas in order to continually reduce our greenhouse gas emissions. Unavoidable emissions are voluntarily offset. DR.SCHNELL is certified by the independent environmental consultancy *Fokus Zukunft*.

^{*} More information about the methods for calculating our carbon footprint, supporting projects and measures taken to reduce CO₂ is available at www.dr-schnell.com/co2.

HOW WE REDUCE CO2

Reducing emissions is a long-term project that will involve years of continuous effort across all company areas. During this time, products and processes will be scrutinised from a sustainability standpoint and any potential for improvement identified.

Raw materials

Our suppliers are bound by our Code of Conduct for environmental protection. We also pay attention to how, and in particular from where, we procure our raw materials in order to avoid delivery-related emissions. The proportion of renewable raw materials used in our brand products is increasing year on year.

Packaging

We are aiming to increase the eco-friendliness of our product packaging as part of our packaging offensive. Over the years, the amount of recycled and neutral-coloured packaging in our range has increased, which in turn positively impacts its recyclability. Canisters and innovative product designs (sticks and ultra-highly concentrated solutions) reduce waste volumes.

Production

Since 1998, our commitment to environmental protection at our production site in Munich is recognisable by the EU EMAS seal of quality.

Disposal

On-site disposal is being incorporated into our environmental management assessment. Through comprehensive measures and investments, we meet the strictest requirements in Germany which are reviewed and documented on a daily basis.

OUR MEASURES TO REDUCE CO2

Closed-loop recycling

In 2020, our ECO collection was awarded Cradle-to-Cradle Gold certification and thus meets the highest standards in terms of material compatibility and responsible use of resources. This covers all aspects from manufacturing and application to recycling and product disposal.

Sustainable cleaning system

Our highly concentrated solutions are typically more sustainable than ready-to-use products. The ECO collection comes in bottles and canisters made from up to 100% recycled PCR plastic (excluding hazardous goods), our ECOLUTION range reduces packaging waste by 80%* through liquid, ultra-highly concentrated solutions and avoids waste with self-dissolving granulate sticks in compostable packets. We encourage the refilling of large containers.

** 5-times higher product concentration with 5-times greater coverage based on the 1-litre DR.SCHNELL bottle of highly concentrated solution

Eco-friendly production site

Since 2013, our photovoltaics plant at the Munich site has generated more than half of our production-related electricity requirements and partially feeds in to the public grid. By expanding our osmosis plant in 2020, we were able to optimise the production water supply. A water treatment plant relieves the burden on public drainage services with regard to the use of chemicals and energy, and reduces the formation of ecologically harmful gases.

Shorter routes, less effort

The transportation of our highly concentrated and ultra-highly concentrated solutions result in far fewer emissions than for ready-to-use products as less water is transported. Our ECOLUTION sticks avoid water transportation altogether.

CLIMATE PROTECTION IS EVERYBODY'S BUSINESS

ANALYSE, REDUCE, OFFSET

Our research and development department forms the heart of our company. Environmental protection is one of the main premises when developing new products and cleaning processes. Our developers work hard to reduce the carbon footprint of our products. This includes using alternative ingredients, optimising the combination of raw materials and consciously choosing suppliers from Germany, Austria and Europe.

Analyse

DR.SCHNELL analyses the CO₂ emissions of DR.SCHNELL products using our certified CO₂ calculator (pursuant to ISO 14067).

Reduce

Together we define savings potential and derive corresponding measures.

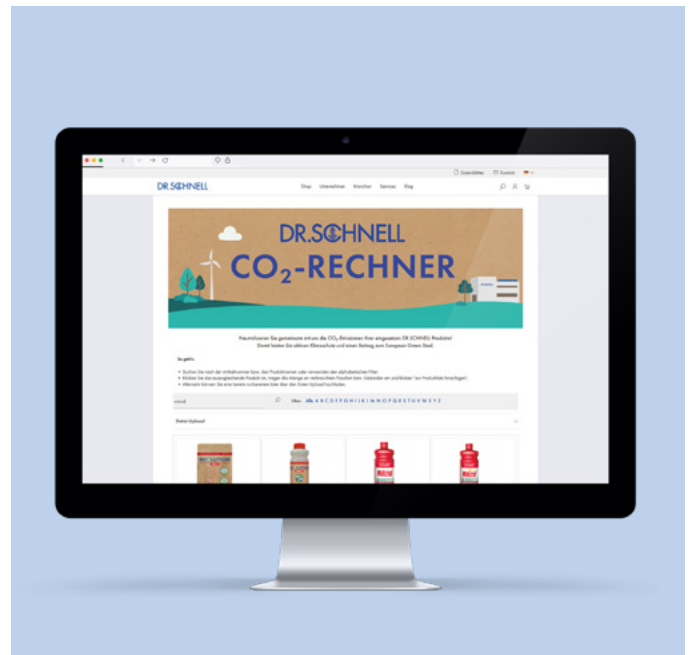

Offset

Remaining emissions are offset using the calculation methods as certified by ISO 14067.

YOU CAN NOW OFFSET YOUR CARBON EMISSIONS WITH DR.SCHNELL

To reduce emissions, information and an awareness of their levels is crucial. We fully offset all raw materials, packaging, stickers and dosing units using various recognised databases. This creates transparency and enables us to precisely break down and offset the CO₂ emissions of DR.SCHNELL products down to the gram.

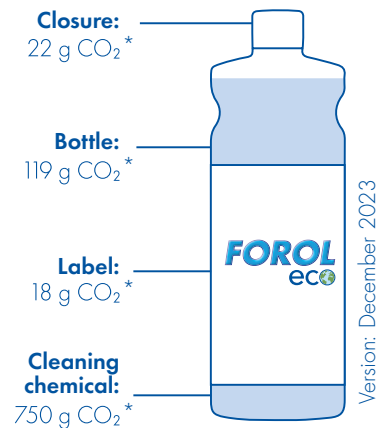

Our DR.SCHNELL CO₂ calculator is based on a certified ISO 14067 calculation method. It calculates the emissions of your purchased products and enables you to compensate for this through a voluntary payment. Your contribution to more sustainability is documented with a certificate.

YOUR PATH TO MORE SUSTAINABLE CLEANING

1. Precise calculation of your carbon footprint

The DR.SCHNELL CO₂ product calculator transparently and accurately calculates the emissions of your purchase down to the gram using the "Cradle to grave" principle. For this, we have built up a large, continuously expanding database of all our raw materials and packaging. You can either upload your product list to the calculator in .csv format or enter comparable products and used bottles and containers into the search: <https://www.dr-schnell.com/Co2calculator>

2. We offer more sustainable alternatives!

Benefit from DR.SCHNELL's sustainability advice. Your expert advisor will support you on your journey to more sustainable cleaning by providing a personalised, climate-optimised shopping basket for you. Together we can reduce emissions!

3. Offsetting residual emissions

Unavoidable emissions can be compensated for through voluntary offset payments. In doing so, you will be supporting the Chacayes Hydroelectric Project in Chile, a run-of-river hydropower plant in the Cachapoal Valley. This project creates additional capacity for renewable energies and replaces the grid energy that is partially generated by fossil-fuelled power plants. This saves approximately 357,000 tonnes of CO₂ each year.

Verified Carbon Standard
A VERRA STANDARD
Tuev Nord Cert GmbH
VALIDIERER

4. Proof of your CO₂ compensation with a unique certificate

- ✓ More sustainable cleaning chemicals for your tenders
- ✓ Transparent visualisation of CO₂ savings in line with ISO 14067 including certificate
- ✓ Company or property-related offsetting of your CO₂ emissions is also possible retrospectively

5. Climate Alliance (optional)

The Climate Alliance is a joint effort to promote climate protection. The aim of the Climate Alliance is to reduce the CO₂ produced by DR.SCHNELL cleaning and disinfection products and offset any residual CO₂. In doing so, we offer more sustainable hygiene from DR.SCHNELL. By subscribing to this objective for two years, you'll receive a reduced rate on the CO₂ price. You can also use this to highlight your company's commitment to sustainability to your customers.

DR.SCHNELL - MORE SUSTAINABLE AND COMPREHENSIVE HYGIENE

DR.SCHNELL is not just a manufacturer of cleaning products; we consider ourselves a comprehensive partner for all areas of professional cleaning and hygiene. From cleaning products and application technology to digital tools, tailored services and further training in the hygiene sector, we support you every step of the way to achieving perfect cleanliness.

Cleaning agents

We produce high-quality brand products for professional cleaning and disinfection. Our modular system allows you to find the right product for every requirement, whether it be building cleaning, textile or kitchen hygiene and many other areas.

Digital solutions

From digital cleaning schedules to usage and temperature measurements and HACCP concepts, our digital tools support your processes.

Sustainability

As a modern chemicals company, we are committed to our environment and fellow people.

Consultancy and service

85 sales employees including your personal point of contact plus 40 service technicians are on hand to provide competent advice.

Academy

Whether in the online CAMPUS or in person at ALEGRIA seminars, you can obtain all of the necessary qualifications for your trade through DR.SCHNELL.

Technology and dosing

Our technical equipment supports the safe and economical use of our professional products with precise manual or automated dosing for building cleaning, laundry and commercial dishwashing machines.

ECO COLLECTION

THE LOW-CARBON* PRODUCT SYSTEM

The ECO collection from DR.SCHNELL is a comprehensive, environmentally friendly package for daily maintenance cleaning. This has been awarded the EU Ecolabel for particularly eco-friendly products and Cradle-to-Cradle Gold status for excellent recyclability. Maximum performance with low-carbon* product design in containers made from 100% recycled plastic (excluding 10l hazardous goods).

MILIZID ECO

Ecological sanitary cleaner & descaler

Suitable for all acid-resistant surfaces. Good descaling, degreasing and fat-dissolving properties. Pleasant, natural fragrance. Can be used for all cleaning processes, including soft foam cleaning. RK-listed (100%).

1-litre bottle
Order no. 00992
10-litre canister
Order no. 30997

FOROL ECO

Ecological universal cleaner

Suitable for all waterproof surfaces. Removes fat and oil-based dirt. For damp and wet mopping, automatic machine and spray cleaning. Pleasant fragrance.

1-litre bottle
Order no. 00993
10-litre canister
Order no. 30998

FLOORTOP ECO

Ecological high-performance floor cleaner

Suitable for all waterproof and coated flooring. Also suitable for anti-static floor coverings. For damp and wet mopping, automatic machine and spray cleaning.

1-litre bottle
Order no. 00994
10-litre canister
Order no. 30999

MILIZID CITROFRESH ECO

Ecological sanitary cleaner & descaler

Suitable for all acid-resistant, washable surfaces. No special labelling required (according to GHS). Good descaling, degreasing and fat-dissolving properties. Can be used for all cleaning processes, including soft foam cleaning. Special run-off effect.

1-litre bottle
Order no. 00995
10-litre canister
Order no. 30998

GLASFEE ECO

Ecological fast-acting surface cleaner

For all waterproof surfaces. Ready-to-use, residue-free, fast-acting cleaner. Dries quickly leaving no streaks. Fragrance-free.

500 ml bottle
with spray head
Order no. 00989
1-litre bottle
Order no. 00990
10-litre canister
Order no. 30995

LEVANTE ECO

Ecological alcohol-gloss cleaner

For all waterproof surfaces. Dries leaving no residue or streaks. Fruity, fresh lemon and ginger fragrance. Suitable for all cleaning methods. No special labelling required (according to GHS).

1-litre bottle
Order no. DR500215
10-litre canister
Order no. DR500216

GASTRO PUR ECO

Ecological oil and grease remover for kitchens

For all water and alkali-resistant surfaces and floors in professional kitchens and food-processing areas. Free from fragrances, chlorine and phosphate. Optimised for wastewater because quickly re-emulsifying in the oil and grease separator.

1-litre bottle
Order no. 36904
10-litre canister
Order no. 36907

PEROCID ECO

Ecological descaler for kitchens

For all water and acid-resistant surfaces and floors in professional kitchens and food-processing areas. Effortlessly removes limescale. Free from hydrochloric acid, acetic acid and phosphoric acid.

1-litre bottle
Order no. 36914
10-litre canister
Order no. 36917

GRÜN & MILD ECO

Ecological washing-up liquid

Thoroughly and gently cleans dishes, glasses and cutlery. Extremely mild on skin. Fragrance-free. Extremely economical due to high concentration.

1-litre bottle
Order no. 36924
10-litre canister
Order no. 36927

THE CARBON-OPTIMISED* PRODUCT SYSTEM

ECOLUTION stands for carbon-optimised* maintenance cleaning in sanitary areas and buildings. The highly effective formula ensures top-quality cleaning results while conserving resources and reducing environmental impact.

THE PRODUCT BENEFITS:

- **Carbon-optimised***
- **Sustainable, innovative packaging**
- **Top performance due to excellent product performance**
- **Significantly less storage space and transport requirements**
- **Cost certainty due to precise and extremely safe dosing**
- **Minimal set-up time prior to use**

ECOLUTION STICKS

Pouch containing 20 sticks
Order no. 31200
500 ml hand spray bottle
Order no. 31205

Pouch containing 20 sticks
Order no. 31202
500 ml hand spray bottle
Order no. 31207

- 3 grams of ecological granulate in water-soluble packaging produces 500 ml of cleaning solution
- Pre-dosed sticks in a compostable envelope, self-dissolving without waste
- Use in a refillable hand spray with bottles made from 100% recycled material
- Maximum user safety as no contact with product

ECOLUTION ULTRA-HIGH CONCENTRATE

1-litre bottle
Order no. 31210

1-litre bottle
Order no. 31212

- Heavy canisters and incorrect dosing is a thing of the past
- 1-litre ultra-high concentrate produces up to 2,000 litres of cleaning solution
- Product is accurately mixed with water using the designated dosing unit
- Use in a refillable hand spray with bottles made from 100% recycled material
- EU Ecolabel and Cradle-to-Cradle Gold certification

TRANSPORT VOLUME INTELLIGENTLY REDUCED

Instead of 5 bottles of concentrate, only 1 bottle of ULTRA-HIGH CONCENTRATE is transported. This reduces the transport volume by 80%***.

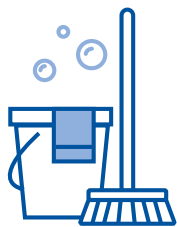

One packet of STICKS replaces 20 ready-to-use spray bottles, thus reducing transport volumes and packaging waste by up to 98%**.

* in the DR.SCHNELL product range | The carbon footprint of ECOLUTION products was calculated by Climate Partner in line with the GHG Protocol Product Life Cycle Accounting and Reporting Standard and offset through funding of a Gold Standard-certified climate protection project.
More information at: www.climatepartner.com/13351-1906-1001.

** based on the packaging weight of 20 units of 500 ml DR.SCHNELL ready-to-use bottles with spray head

*** with 5-times higher product concentration and 5-times greater coverage based on a 1-litre highly concentrated DR.SCHNELL bottle

BUILDING CLEANING AND SANITARY FACILITIES

From daily maintenance cleaning in office buildings and sanitary areas in hotels to regular basic floor cleaning in schools, building and sanitary cleaning is one of the most diverse and demanding areas of professional cleaning. DR.SCHNELL finds solutions to any challenge with its strong brand products and comprehensive service.

Sustainable, award-winning packaging.
The Green Dot label confirms the excellent recyclability of our packaging. The body of our bottles and canisters are 100% recyclable.

MILIZID

Disinfectant and descaler

Highly concentrated liquid solution. Removes mineral and organic dirt. For effective cleaning of all acid-resistant materials in sanitary facilities and wet rooms. Effective without mechanical processes. Shines without the need for polishing.

1-litre bottle
Order no. 00104
10-litre canister
Order no. 3000

FOROL

Universal cleaner

Highly concentrated liquid solution. Synergistic surfactant combination, excellent wettability and dirt-dissolving properties. For effective cleaning of water-resistant, anti-static, coated and non-coated materials.

1-litre bottle
Order no. 00114
10-litre canister
Order no. 30017

FLOORTOP

High-performance floor cleaner

Highly concentrated liquid solution. For cleaning and maintenance of water-resistant, anti-static, coated and non-coated floors. Cleaning, maintenance and revitalisation all in one. Excellent wettability and dirt-dissolving properties.

1-litre bottle
Order no. 00157
10-litre canister
Order no. 30154

MILIFEE

Ready-to-use disinfectant and descaler

Autonomous sanitary maintenance cleaning thanks to ready-to-use solution. Awarded the European Union Ecolabel (EU Ecolabel).

500 ml bottle with spray head
Order no. 30354
10-litre canister
Order no. 30357

FOROLFEE

Ready-to-use universal cleaner

Autonomous maintenance cleaning thanks to ready-to-use solution. Awarded the European Union Ecolabel (EU Ecolabel).

500 ml bottle with spray head
Order no. 30342
10-litre canister
Order no. 30347

GLASFEE

Ready-to-use, fast-acting surface cleaner

Streak-free, fast and gentle cleaning. Removes all dirt deposits and greasy residues. No wiping off required. Sparkling cleanliness and shine. Skin-compatible.

500 ml bottle with spray head
Order no. 00156

1-litre bottle
Order no. 00137
10-litre canister
Order no. 30147

UNIMAGIC

Microfluid for cleaning with modern cleaning materials

Particularly suitable for use with microfibre textiles. Awarded the European Union Ecolabel (EU Ecolabel).

1-litre bottle
Order no. 00380
10-litre canister
Order no. 30387

LEVANTE

Alcohol-gloss cleaner

Highly concentrated liquid solution. Material compatibility on all waterproof surfaces. Dries leaving no streaks or residue. Excellent wetting properties, even on waterproof surfaces, e.g. PUR; ideal for one-step mopping.

1-litre bottle
Order no. 00292
10-litre canister
Order no. 30170

SCHIROCCO CLEAN

Maintenance, intensive and basic cleaner

For removal of dirt and water-soluble care films from all waterproof floors. Dries residue-free. Excellent cleaning performance. No wiping off required. Awarded the European Union Ecolabel (EU Ecolabel).

1-litre bottle
Order no. 00724
10-litre canister
Order no. 30726

NOVO PEN-OFF

Ready-to-use special surface cleaner

Removes ink, stamp ink, felt-tip pen, stubborn sticker residue, permanent marker, ballpoint pens, heel marks. Ready-to-use spray solution with excellent cleaning performance.

500 ml bottle
with spray head
Order no. 00807
10-litre canister
Order no. 30803

EASY QUICK A

Alkaline, surfactant-free maintenance and intensive cleaner

Highly concentrated liquid with highly active cleaning performance for water-proof, microporous floors and walls. Awarded the European Union Ecolabel (EU Ecolabel).

1-litre bottle
Order no. DR500356
10-litre canister
Order no. DR500357

EASY QUICK N

Neutral, surfactant-free universal cleaner

Highly concentrated liquid for maintenance and intensive cleaning. Suitable for all waterproof, roughened and microporous surfaces. Awarded the European Union Ecolabel (EU Ecolabel).

1-litre bottle
Order no. DR500324
10-litre canister
Order no. DR500327

SC SENSITIV

Graffiti remover for sensitive surfaces

For gentle removal of graffiti caused by spray paint, ink and felt-tip pens on all sensitive and solvent-resistant surfaces, painted and plastic surfaces such as plexiglass. Ready to use. Free from NMP/NEP & orange terpene. No special labelling required (according to GHS).

500 ml bottle w. spray head
Order no. DR500065
5-litre canister
Order no. DR500225

MILIZID KRAFTGEL

Acid-based sanitary cleaner

For basic cleaning of all water-proof and acid-resistant surfaces in sanitary areas and wet rooms. Synergistic acid combination also effective on rust and manganese dioxide deposits. RK-listed for ceramic finishes.

1-litre bottle
Order no. 00366
10-litre canister
Order no. 30367

MILOR

Non-acidic cleansing lotion for all waterproof materials

Intensive, gentle cleaning. Excellent grease/oil, rust and dirt-dissolving properties. For removal of limescale on acid-sensitive surfaces such as marble and terrazzo (e.g. window sills, wall cladding).

500 ml bottle
Order no. 00158

TEMPEX ECO

Ecological basic cleaner and decoater

Highly concentrated liquid for removing dirt and care films from waterproof flooring. For use in double trolleys, automatic scrubbers and single-disc machines. Awarded the Austrian Ecolabel.

10-litre canister
Order no. 30874

TOPCARE ECO

Ecological universal dispersion

Ready-to-use, modern coating without polishing. For all waterproof coverings such as resilient hard floor coverings and absorbent natural and artificial stone. Free from metallic salts. Fragrance-free. Awarded the Austrian Ecolabel.

10-litre canister
Order no. 30876

FOREX

Pore-deep maintenance and basic cleaner for porcelain stoneware and ceramic finishes

Highly concentrated, alkaline liquid solution. For heavily soiled, waterproof and alkali-resistant floorings, in particular tiles and porcelain stoneware.

1-litre bottle
Order no. 00261
10-litre canister
Order no. 30250

REFILLING NOT ONLY PROTECTS THE ENVIRONMENT BUT IS ALSO KINDER ON YOUR WALLET

It makes a difference whether you use 10 x 1-litre bottles or a 10-litre canister poured 10 x into the same bottle. By refilling the 1-litre container from the 10-litre canister, you'll save in three regards.

- 125 g
Plastic

- 308 g
CO₂

Up to -17%
price advantage
depending on the product

HYGIENE IN THE KITCHEN AND FOOD INDUSTRY

Maximum cleanliness and hygiene standards are required in food preparation areas. Even slight deviations or mistakes can lead to health consequences for consumers. The DR.SCHNELL branded products for kitchens and food-processing areas ensure safe, economical processes in the food sector.

GASTRO PUR

Oil and grease solvent

Highly concentrated liquid. Optimised for wastewater because quickly re-emulsifying in the oil and grease separator. Odourless. Extremely eco-friendly as chlorine and phosphate-free.

1-litre bottle
Order no. 00147
10-litre canister
Order no. 36047

PEROCID

Limescale remover

Highly concentrated liquid. Excellent descaling properties. Effortlessly removes limescale, rust and cement residue. Effective without mechanical processes. Meets the requirements of the German Food and Feed Code.

1-litre bottle
Order no. 00615
10-litre canister
Order no. 36017

GRÜN & MILD

Highly effective washing-up liquid

Highly concentrated liquid. Extremely economical due to high concentration. Cleans dishes, glasses, cutlery etc. thoroughly and gently. Sparkling dishes without towel drying. Particularly mild on skin.

1-litre bottle
Order no. 00134
10-litre canister
Order no. 20037

GASTROFEE

Ready-to-use oil and grease remover

Fully autonomous maintenance cleaning due to ready-to-use solution. Reduction of set-up and travel times. User-friendly. Material compatibility on all water-resistant and alkali-resistant surfaces.

500 ml bottle with
spray head
Order no. 36300
10-litre canister
Order no. 36301

PEROFEE

Ready-to-use descaler

Fully autonomous maintenance cleaning due to ready-to-use solution. Reduction of set-up and travel times. User-friendly. HACCP certification available. Suitable for soft foam cleaning.

500 ml bottle
with spray head
Order no. 36305
10-litre canister
Order no. 36306

AMIDOL

Stainless steel surface protection

Material compatibility with metal protection (stainless steel). Removes traces of graffiti, eliminates fingerprints. Uniform, sparkling finish without the need for polishing.

500 ml bottle with
spray head
Order no. 00340

PERO FROST

Deep freezer cleaner

Excellent cleaning performance. Excellent germ reduction. Material compatibility with metal protection (stainless steel). Low consumption.

1-litre bottle
Order no. 30126

PERO CHLOR

Chlorine-based special cleaner

Removes grease/oil and protein contamination. Excellent adhesive properties resulting in intensive cleaning. Bleaching effect on surfaces prone to mould.

1-litre bottle
Order no. 36138

ATTILA DER KRUSTENBRECHER

Powerful cleaner for burnt-on food

Excellent results on burnt-on fried, baked or grilled residue. Maximum product safety. Ready-to-use spray solution with excellent cleaning performance. Easily rinsed off pursuant to Food and Feed Code (LFGB).

1-litre bottle
Order no. 00212

PEROJET smart ECO

Chlorine-free, ecological, extra-strong detergent for all types of water hardness

For commercial dishwashers. Optimum rinsing results for all types of water hardness. Removes tea and coffee stains. Highly effective on burnt-on residue. Odourless application.

12 kg canister
Order no. DRS00058
25 kg canister
Order no. DRS00059

MAFOR smart ECO

Acidic high-performance rinsing agent for all types of water hardness

Guarantees sparkling, streak-free crockery. Excellent anti-foaming effect in the machine, even with heavily soiled items. Excellent drying properties for all crockery and materials, particularly plastic parts.

10 kg canister
Order no. DR500060
20 kg canister
Order no. DR5000610

MAFOR ECO

Acidic, ecological rinsing agent for all types of water hardness

Fragrance-free. Guarantees sparkling, streak-free crockery. Gentle on decorations and glasses. Balanced combination of wetting and foam-inhibiting ingredients achieves self-acting, streak and residue-free drying.

1-litre bottle
Order no. 36944
20 kg canister
Order no. 36948

PEROJET PULVER 5

Chlorine and phosphate-based detergent for soft to medium-hard water

Powder detergent for all commercial dishwashers. Optimum rinsing results including for medium-hard water. Highly effective on burnt-on residue.

3 kg cartridge
Order no. 36365

PEROJET BLOC 3 ECO

Chlorine and phosphate-free, ecological detergent for all types of water hardness

Ecological detergent in block form for all commercial dishwashers. Extremely eco-friendly as chlorine and phosphate-free. Optimum rinsing results for all extremely hard water. High material compatibility.

4 kg cartridge
Order no. 36142

PEROJET PULVER 9

Chlorine and phosphate-free detergent for all types of water hardness

Optimum rinsing results for all extremely hard water. Highly effective on burnt-on residue. Optimally removes tea and coffee stains.

3 kg cartridge
Order no. 36363

PEROTEX OXYGEN

Chlorine and phosphate-free, active oxygen-based cleaning booster

Active oxygen-based cleaning booster for commercial dishwashers. Use in combination with automatically dosed DR.SCHNELL liquid and powder cleaners. For removing extremely stubborn coffee and tea stains.

30 kg canister
Order no. 36028

MAFOR FLÜSSIG 3 ECO

Acidic, ecological SAFESYSTEM rinsing agent for all types of water hardness

Ecological rinsing agent for all commercial dishwashers. The rinsing agent is automatically added via the DR.SCHNELL PerojetTec dosing system.

3 kg SAFE bottle
Order no. 36340
10 kg SAFE canister
Order no. 36341

PERO TABS

Chlorine and phosphate-free cleaning tabs

Gentle and effective cleaning of porcelain and ceramic crockery, cutlery and glasses. Excellent dirt removal including stubborn tea and coffee stains. Fast-dissolving tabs for short program run times in commercial under-counter dishwashers.

Pack of 200 tabs
Order no. 36000

DIGITAL DOSING TECHNOLOGY AND ECOLABEL-CERTIFIED CLEANER FOR SPARKLING CLEAN DISHES

Ecolabel-certified cleaner + smart dosing technology

MORE ABOUT THE PEROJET SMART TEC ON PAGE 20

SURFACE DISINFECTION

Regular surface disinfection is an important measure for preventing the transfer of diseases. Pathogens can survive on surfaces for months. DR.SCHNELL disinfectants break down chains of infection and minimise bacteria on the treated surface. They are VAH and IHO-listed as well as HACCP-compliant.

DESIFOR-ONE

Surface disinfection | effective against viruses PLUS

Highly concentrated liquid. Free from fragrances and colourings. Excellent cleaning performance.

1-litre bottle with dosing unit
Order no. 20558
10-litre canister
Order no. 20558

DESIFOR-QUICK WIPES

Biodegradable surface disinfection wipes | effective against viruses

Certified biodegradable wet wipes. Excellent cleaning performance. For residue-free disinfection of alcohol-resistant surfaces in medical facilities and food processing areas, industrial areas and public buildings. Free from fragrances and colourings.

Soft pack of 80 wipes
Order no. 20610

DESIFOR-forte AF NEU

Surface disinfection | effective against viruses PLUS | medical product

Highly concentrated liquid. Free from fragrances and colourings. Excellent cleaning performance.

1-litre bottle with dosing unit
Order no. 20491
10-litre canister
Order no. 20493

DESIFOR-PLEXIFEE

Surface disinfection | effective against viruses PLUS

Ready to use. Free from fragrances and colourings. DEKRA-certified material compatibility for acrylic glass.

500ml bottle with spray head

TEXTILE HYGIENE

Excellent hygiene is particularly important when it comes to textiles. This cannot only be seen, but also felt, on the skin. Bathrobes and towels along with tablecloths, bed linen and employee clothing act as business cards. DR.SCHNELL products not only ensure cleanliness and hygiene but also a feel-good factor.

POWDER LAUNDRY DETERGENT FOR MANUAL DOSING

Powder-based detergent remains the first stop for sparkling white laundry or bright colours. Free from preservatives, this detergent focusses on textile washing performance. In addition to its own branded products, DR.SCHNELL also exclusively offers the ARIEL products from PROCTER & GAMBLE.

RAPA EXTRA

Phosphate-free, disinfecting all-purpose laundry detergent powder at 60° C

Excellent stain removal due to special formula. Pleasant, fresh fragrance. Extremely gentle on fibres and materials due to selected ingredients. Extremely economical.

12 kg sack
Order no. 60421
20 kg sack
Order no. 60420

DOSING TECHNOLOGY FOR PROFESSIONAL KITCHEN HYGIENE

The PEROJET smart system offers sparkling clean crockery with full cost transparency. The system comprises the two components of ecological cleaning chemicals and digital dosing technology for professional kitchens. The PEROJET smart system is ideal for retirement and care homes, hospitals, hotels, restaurants, catering companies and canteens.

PEROJET smart TEC Dosing unit

- Next-generation, digital dosing technology
- Automatic, consistent dosing of detergents and rinsing agents for top-quality, hygienic cleaning results
- Economical due to digital dosing and automatic pump
- Online access to service technicians minimises downtime and maintenance requirements
- Free assistance while under contract

PEROJET smart ECO and MAFOR smart ECO

- Optimum cleaning performance with just two products
- PEROJET smart ECO dishwashing detergent removes the most stubborn of stains
- MAFOR smart ECO rinsing agent gives crockery and cutlery a sparkling shine
- Economical, suitable for all water hardness ranges
- Minimises deposits and thus protects dishwashers
- Certified as eco-friendly by the Nordic Swan Label

TEXTILE HYGIENE DOSING TECHNOLOGY

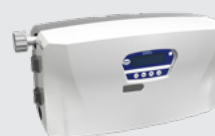

DR.SCHNELL dosing technology ensures clean, fresh laundry with transparent consumption and cost control. Whether for individual washing machines or centrally managed, machines and programmes can be monitored and evaluated around the clock thanks to this technology.

SmartTec digital central dosing unit

- Central, digital control unit for up to 5 washing machines
- Consistent dosing for clean laundry with minimal consumption
- Online monitoring of dosing process around the clock
- Consumption evaluations for desired time period
- Remote maintenance for rapid customer support in the event of problems

PrimaTec compact, individual dosing unit

- Compact dosing unit for individual washing machines
- Water-powered unit with energy-saving Venturi technology
- Precise dosing with large dosing range
- Easy assembly, no wear parts, low maintenance

SERVICES

Technical service

Personal contact, trustworthy collaboration

Customer satisfaction is our main priority. That's why numerous service technicians are on hand to assist you at all times. Whether online or directly on site, our employees handle your technical requirements for building cleaning, textile hygiene and dishwashing. Use our value-adding services for every industry. Simply get in touch with us.

Hygiene check

The hygiene check allows us to ensure that your dishwasher or washing machine passes the biological indicator test and that you comply with annual disinfection requirements. Laboratory analysis, protocol and inspection sticker included. The check can be performed during normal operation, no emptying or draining required.

System check

The system check ensures that your washing machine is energy-efficient and sustainable.

Through professional descaling and adaptation of wash programs, you can optimise cleaning results, reduce energy consumption and costs and significantly increase the service life of your machine. DR.SCHNELL recommends descaling and having your machine inspected at least once a year.

Service check

We take care of your dosing technology. Our employees are always available to assist you via our service hotline. Our service technicians analyse your dishwasher and washing machine, maintain your dosing units, take care of replacement parts management and offer expert cleaning and care advice.

MX-Check dosing centre

During the hygiene check, our technicians check the relevant system parameters and dosing for the MX dosing centre, inspection sticker included. Parts can be replaced as required (chargeable: hose change).

SERVICECOCKPIT 2.0 – Everything with a single click

The DR.SCHNELL ServiceCockpit allows digital self-management of all your product documents containing relevant information and services - pooled into ONE digital location.

- Locate individual buildings and products used and easily access associated documents (e.g. product and safety data sheets, cleaning and disinfection plans) at a glance and in their latest version.
- Use our templates for cleaning and disinfection plans as well as dosing plans for textile laundry or create individual plans in just a few clicks.
- Hazardous substance register for product requiring labelling are always to hand in the ServiceCockpit.
- Whether dosing charts, cleaning recommendations and process instructions or emergency plans, you'll find all the information you need in the ServiceCockpit presented in a comprehensive, clear format.

Electronic ordering platform

The ordering process is made easier and more transparent with our DR.SCHNELL web shop, digital product catalogue and EDI. We transfer data from multiple sources into a single view, revise them and convert them into a target system and in doing so create meaningful, useful information. This lets you order directly from us. The right system for every customer.

- All product data currently visible (availability, documentation, hazardous data, specifications)
- Electronic connectivity of customers EDI; completely paperless data exchange in EDIFACT, Odette, XML formats and transfer protocols X.400, OFTP, OFTP2, SFTP, AS2 plus support for XRechnung
- Manage frequently ordered items with order lists, use the fast ordering option via XLSX/CSV and manage your entire organisation in the B2B area of the web shop
- Digital product catalogue: Excel, BMECat formats
- Platforms on which DR.SCHNELL can be found: GDSN Datenpool, HCDB, Metro Markets, Mercateo

TRAINING COURSES

Sustainable progress through expertise

Increasing hygiene standards, ever-changing legal requirements and technical advancements pose a permanent challenge to the cleaning industry. Regular training is essential for keeping up with the latest developments in cleaning processes and technologies.

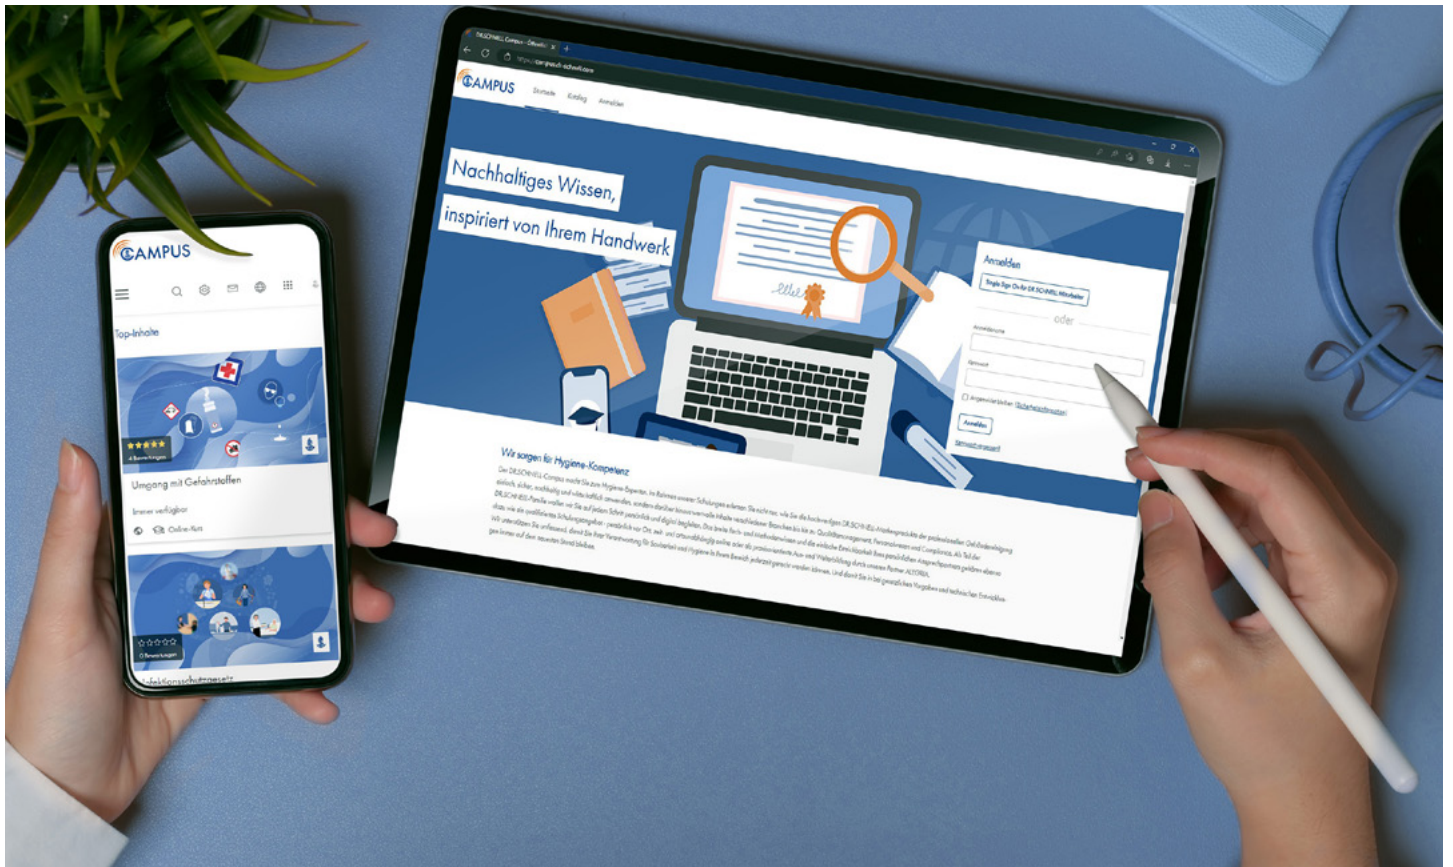

The ALEGRIA team is on hand to assist you. The trainers at ALEGRIA are committed to teaching theoretical knowledge about the topic of hygiene in an understandable way along with practical exercises. In a positive learning environment, the knowledge acquired can be immediately implemented in practice for the long term using modern, didactic methods.

As a comprehensive service provider, ALEGRIA teaches the necessary content for staff and management training in the areas of building cleaning, healthcare, hotel and housekeeping industry or food sector. This covers everything from legal requirements and the latest developments to instructions on professional employee training and implementing hygiene and HACCP concepts. Tailored to your specific requirements.

Each year, thousands of participants attend training at our 2,000 m² training site in Munich equipped with state-of-the-art cleaning machines, appliances and products, or at our sites in Cologne, Hamburg or online by our Academy staff. As a certified climate-neutral company, ALEGRIA offers climate-neutral seminars for all participants.

The DR.SCHNELL CAMPUS:

The DR.SCHNELL CAMPUS turns you into a hygiene expert. As part of our new, intuitive e-learning module, you'll not only learn how to easily, safely, sustainably and economically use the high-quality DR.SCHNELL branded products for professional building cleaning but you'll also discover useful content for various industries.

Professional training and easy access to your personal contact enhances the broad range of subject and method knowledge. At the DR.SCHNELL CAMPUS, we help you fulfil your responsibility for cleanliness and hygiene in your area. Your employees can learn straight from the workplace and at their own pace.

Based on the latest legal requirements and no matter your location, you can easily and flexibly manage instructions for the cleaning industry such as the handling of hazardous substances or follow-up instructions on the Infection Protection Act and Ordinance on Biological Substances. With the DR.SCHNELL CAMPUS, you'll always have digital proof of your accomplishments to hand.

All certificates and training sessions can be retrieved from one location at any time and in various languages. The integrated DR.SCHNELL media library gives you access to training videos and fact sheets. The CAMPUS services are always being updated for the areas of occupational safety, products and applications as well as compliance and management.
