## AUTOMATION THROUGH INNOVATION

### ABOUT US

---

FETCHTECH is a dynamic and rapidly growing Singapore company dedicated to innovation in the commercial and retail laundry markets. In 2016, FETCHTECH partnered with HMC Solutions, a US-based company, to develop the 'Fetch!' intelligent dry-cleaning technology to address manpower issues in dry-cleaning stores. This strategic collaboration propelled FETCHTECH to the forefront of the 24/7 automated dry-cleaning sector, establishing it as a market leader.

Our business operations encompass the research, development, manufacturing, and support of our patented **Fetch! The Anytime Cleaning Retriever**. We also engage in retail and franchise operations within the dry-cleaning industry. In addition to these services, FETCHTECH expanded its offerings last year with the introduction of **AutoSort**, an innovative auto-sorting system designed to revolutionize laundry operations.
