DIVUS CTP04

Shaping the future of
Room Controllers with VISION.

DIVUS CTP04

Shaping the future of Room Controllers with VISION.

The DIVUS **room controller CTP04** is an innovative solution for building automation. This **4-inch** room controller serves not only as an indoor intercom but also as a room control device **seamlessly integrated into our DIVUS KNX IQ08**. With its versatile functions, the CTP04 meets the requirements of **various environments**, from **residential homes** and **villas** to **offices**, **conference rooms**, **bars**, and **medical practices**.

In its **function as a room control device**, the CTP04 provides a **switch-like** user interface with a **button layout from 1 to 9 buttons**, expandable to a **maximum of 6 pages**. This provides an impressive **54 functions** and commands. The visualization interface can be displayed in **different colors**, allowing for **individual customization** to the user's needs.

A particular note is the special ability of the CTP04 to function as an **indoor intercom**. In this function, any **SIP standard compatible outdoor intercom** can be integrated and displayed in the **in-house DIVUS videophone software**. The optimal synergy is achieved in connection with the **DIVUS complete solution**, where the **CTP04** harmonizes with the **DIVUS CIRCLE** as an outdoor intercom and the **KNX IQ08** as a server/master.

The versatile applications of the CTP04 make it an ideal solution for **intercom applications** and **intelligent building solutions**. Whether in residential homes, villas, offices, bars, meeting rooms, or medical practices, the DIVUS room controller CTP04 offers reliable and efficient control for smart building automation.
