PES Pro

Universal and trend-setting

The front-door station for every property and users of all ages. Compact, functional and for systems with up to 120 call destinations, the PES Pro defines new standards in barrier-free door communication, video recording and functional expandability. With illuminated buttons, name fields and coloured symbols for function display, these front-door stations are trend-setting.

TREND-SETTING LIGHTING

- Name field and contour of the bell buttons
- coloured barrier-free symbols in accordance with DIN18040-1

VIDEO FUNCTIONALITY

- Large detection area with 130°
- ePTZ function: 3 image sections from 9 sectors
- automatic day/ night switch

WITH UP TO 24 BUTTONS

- (video) front-door station up to 24 bell buttons
- for systems with up to 120 call destinations
- variants for surface-/ flush-mount

DIGITAL AUDIO COMMUNICATION

- full-duplex voice transmission
- noise filtering and echo cancellation

EASY TO MAINTAIN AND SERVICE

- easy nameplate change with just one screw from the front
- error display - red symbol flashes
- audio/ video module can be replaced without dismantling the front-door station
- replaceable configuration memory

Senso Pro

The modular indoor stations

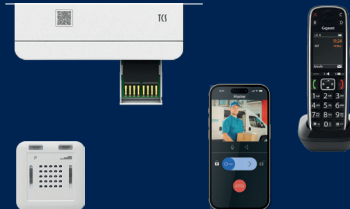

... are committed to maximum flexibility. Whether with handset or hands-free, whether audio or video function - any initial configuration can be changed and extended at a later date. In any case, sensory buttons form a modern user interface. Thanks to smart sticks, these indoor stations can also fulfil future requirements: for example, an additional radio chime or mobile door communication via app.

CUSTOMISE FOR INDIVIDUAL RESIDENTS

TCS Mobil

For mobile door communication

Use the Smart Sticks to expand the new Pro indoor stations in order to forward mobile door communication to cordless DECT telephones or to mobile phones via an app. Existing TCS systems can also be functionally expanded and can thus be operated on an IP telephone system, on a Fritz!Fon, on a PC or via a smartphone app.

SMART STICK FOR YOUR DECT PHONE

- for forwarding of door calls to an existing cordless DECT telephone

DECT SETS FOR HOME & OFFICE

- door communication via DECT cordless phone
- for telephone variant for the home or office

SMART STICKS PHONE / MOBILE PHONE

- mobile door communication via mobile phone, landline or telephone systems
- with TCS snipdoo App & snipdoo cloud Service

IP GATEWAY

- System extension for video door communication to mobile phones, PC or IP telephone system
