

Toad

Toad harmoniously brings together functionality, acoustics and aesthetics. The design is inspired by natural and round shapes. The spherical shade with high-quality LED panel emits a soft and diffused light, creating a warm and inviting atmosphere.

The shape of the lamp with an inner side of organically shaped slats offers high acoustic efficiency and a nice diffusion of light. Toad also has a large mass and plenty of surface area. This is the perfect recipe for a high-quality acoustic lamp.

Toad is available in different shapes, sizes and colours of PET Felt taking into account that the inside is always finished in a light colour. The high-quality LED panel gives an even light, and is available in different colour temperatures and dimming options.
