

# THE FIRE RATED DOWNLIGHT YOU ASKED FOR

## ULTIMUM EXPRESS

We talked to electrical contractors in the UK and Ireland to define the perfect fire rated downlight. Then we created the ULTIMUM EXPRESS. Quick-release 2 part connector? Check! Colour-coded lever terminals? Check! Transparent connector cover? Check! Loop in, loop out terminal block? Check! This easy-to-connect downlight adapts to your needs with 5W and 7W power options, as well as CCT4 selectable in 2700K, 3000K, 4000K, and 6000K. Need to make a last-minute tweak? No problem, we ensured that the dual wattage switch is readily accessible at the base and the CCT4 switch is close at hand just under the trim. You told us what you wanted, and we listened - the definition of contractor-led design.

### KEY FEATURES

- Market-leading transparent 2 part connector for a super easy installation.
- Colour-coded lever terminals with loop in, loop out connections to express your wiring time.
- Front access CCT4 switch featuring 2700K, 3000K, 4000K and 6000K.
- Two downlights in one with dual wattage 5W and 7W power options. · Energy efficient with a market-leading efficacy of 125Lm/W - 130Lm/W and a lumen output of 660Lm/W – 820Lm/W.
- Features high-quality steel fixing springs with PVC protectors.
- Features dimmable options, compatible with select trailing-edge dimmers.
- Tested for fire resistance with metal web joists and certified for 30/60/90 minutes in solid timber joists. Also rated for moisture resistance and acoustic performance.
- IP65 rating secured with a rubber seal, making this downlight suitable for domestic dining, living, bathroom and bedroom spaces as well as hotel and office reception areas.
- Designed with a replaceable LED light source for ultimate convenience.
