

Tri-Head Light—TL6

Product Introduction

[360° Adjustable Multi-Directional Lighting]: Three-head design. Each head supports 120° vertical tilt for precise aiming. The beam angle can be adjusted freely for camping, DIY, and auto repair.

[High Output & Long Runtime]: Delivers up to 2000 lumens of bright light with adjustable color temperature (2700K–6500K). Built-in 4000mAh rechargeable battery delivers up to 40 hours in ECO mode for extended use.

[Multi-Mode Safety Beacon]: Integrated independent warning light with three flashing/alert modes, ideal for roadside assistance, jobsite alerts, and emergency signaling.

[Hook & Magnetic Mount]: The hook uses a unlock-button to switch quickly between a closed anti-drop mode and an open quick-hang mode. The open design increases the hook diameter for more hanging options. Paired with a 200° rotating strong magnet base, it mounts securely on tent poles, metal workbenches.

[Tripod Compatible]: The base features a standard 1/4" threaded hole for mounting on tripods, providing higher and more stable lighting for campsites, garages, work-shops, and photo setups.

Specification

Item	Specification				
Mode	Turbo	High	Med	Low	Eco
Lumen	2000	1000Lm	600Lm	200Lm	40Lm
Runtime	-	3H	6H	15H	40H
CCT	2700K-6500K (Stepless Adjustment)				
CRI	≥80				
IP Grade	IP 54				
Dimension	82*84*125 mm				
Weight	245g				
Battery Capacity	3.7V/4000mAh, 14.8Wh				
Input	Max 5V2A
