

YOUR SENSES

Your Senses. Our Passion.

ART

YourSenses

YourSenses is a design philosophy centered on experience. Light, sound, material, and form are not treated as separate disciplines, but as interconnected elements that shape how a space is felt. Every design begins with perception — how an object influences atmosphere, emotion, and presence.

Rather than adding more, YourSenses focuses on reduction: fewer elements, stronger intent. The result is work that feels quiet, deliberate, and timeless.

YourSenses Art

YourSenses Art is the artistic extension of this philosophy. It is a space for sculptural objects where meaning takes precedence over function. Here, light becomes material, and material becomes narrative. Each piece is conceived as an object of contemplation — something that invites stillness and attention.

Within YourSenses Art, objects are developed slowly, with respect for craftsmanship, proportion, and material honesty.

NACRE

NACRE was created within this context.

A collaboration between **Ferdinand Verbeek** and **Alain van Dijk**, born from a shared fascination with balance, restraint, and revelation.

The design is reduced to its essence: two shells and a protected core.

Nothing more is needed.

NACRE exists in multiple scales — from sculptural lighting pieces to intimate, jewel-like objects. Whether executed in aluminum, deep black finishes, gold, or marble, each version carries the same quiet tension between protection and exposure.

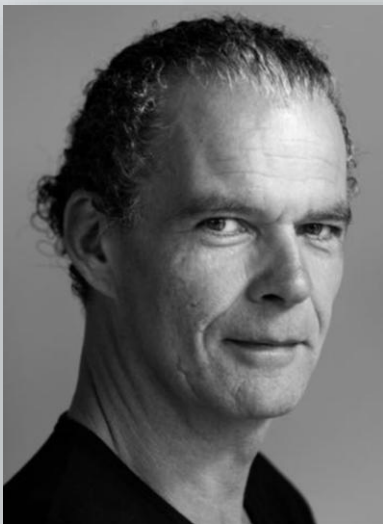

NACRE does not seek attention.

It waits to be discovered.

With regards

Ferdinand Verbeek

COPER - RGB

The image features two identical lamps in a modern interior setting. Each lamp consists of a black, square pedestal supporting a black, flower-shaped shade with three petals. The central part of the shade is a glowing, spherical light source. The lamp on the right is illuminated, casting a warm, orange glow, while the lamp on the left is unlit. The background shows a blurred interior with columns and recessed lighting.
