Dare to be different

ABOUT US

We are proud to introduce the "CURVE" product series, a project that brings together our passions and expertise. Matthijs Wateler, a dedicated interior designer with a sharp eye for the harmony between form and function, has shaped the aesthetics and organic flows of CURVE.

Our goal is to create spaces that are both visually stunning and functional, seamlessly integrating the beauty of nature. Alain van Dijk, as an LED Specialist, has contributed to the sustainability of CURVE.

Sustainability is a core value in our design, and Alain's expertise has ensured innovative LED solutions that make our projects both environmentally friendly and energy-efficient.

With CURVE DESIGN, we aim to embrace and integrate the elegance of nature into everyday spaces, and we are excited to share more about our projects and designs with you soon. Stay tuned, as there is much more exciting news to come!

Warm regards,

Matthijs Wateler, Interior Designer
LED Specialist, Alain van Dijk

CURVE PLANTS

Bringing Nature Indoors

At CURVE DESIGN, we are committed to integrating nature seamlessly into modern living spaces.

Our latest innovation – the Plant Growth Lighting System for the CURVE Magnet Rail – is designed to ensure your plants thrive even in rooms without natural sunlight.

Special Lighting for Plant Growth

Our cutting-edge lighting solution replicates natural sunlight, providing the essential spectrum of light required for healthy plant growth.

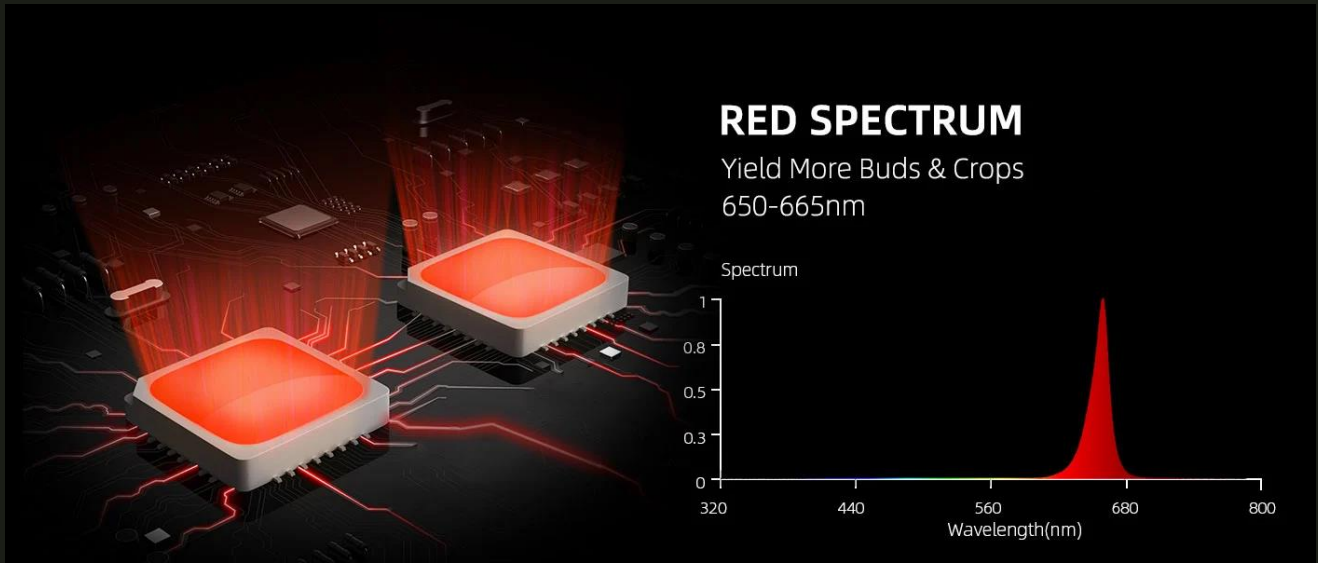

This technology ensures that your indoor plants receive the necessary energy to flourish, no matter their location within your home or office.

Full Spectrum LED: Mimics the natural sunlight essential for photosynthesis, promoting healthy plant growth.

Energy Efficient: Uses less power while delivering optimal light for your plants.

Adjustable Angles: Allows you to direct light precisely where your plants need it, ensuring even light distribution.

CURVE PLANTS

Our Tracklight for Plant GrowthOur tracklight system with integrated white (4000K) and red (650-665nm) LEDs is the perfect solution for plant growth lighting.

This specialized system uses optimal wavelengths to support healthy plant development and ensure maximum yield.

Key Benefits:

White LED (4000K): Provides the necessary spectrum for healthy, vibrant plant growth.

RED LED (650-665nm): Perfect for stimulating blooming and fruit production by mimicking the natural conditions plants need during their flowering phase.

Multiple Installation Options:

- The tracklight can be installed in various orientations—bottom, side, under, or top lighting—allowing flexible use in different plant growth environments.
Energy Efficient: This system offers a low energy consumption solution while promoting faster and healthier growth cycles.

CURVE PLANT BASICS

Special raillights for making the plants grow without daylight or sun.

Bringing Nature Indoors

Innovative Connectors for Plant Baskets Complementing our advanced lighting system, we offer specially designed connectors that allow you to hang plant baskets effortlessly on the CURVE Magnet Rail.

These connectors are easy to install and provide a secure and stylish way to display your plants.

Easy Installation: The connectors attach and detach effortlessly from the magnet rail, providing convenience and flexibility.

Versatile Design: Suitable for various sizes and styles of plant baskets, enhancing your interior design options.

Secure Hold: Ensures your plants are safely and elegantly displayed, adding a touch of nature to your space.

CURVE PLANTS

Bringing Nature Indoors

Transform Your Space:

Whether you're aiming to create a lush green wall or simply add a touch of greenery to your room, our Plant Growth Lighting System and connectors offer the perfect solution.

Elevate your interior decor with vibrant, healthy plants, regardless of the natural light conditions.

Explore the Possibilities:

Living Rooms: Add a refreshing touch of nature to your living area.

Offices: Enhance productivity and creativity with indoor greenery.

Commercial Spaces: Create a welcoming and stylish environment in hotels, restaurants, and more.

Experience the beauty and benefits of indoor gardening with CURVE DESIGN's innovative solutions. Transform any room into a thriving green oasis with our state-of-the-art lighting system and versatile plant basket connectors..
