h y l i g h t O N E

the modular smart lighting system

www.hilight.one

build your own light

combine the core unit with interchangeable sensor and light modules

compatibility

- smart home ready
- matter-compatible
- controlled with hylight ONE App
- connection via WiFi or Bluetooth
-

monitoring environmental conditions and live sensor data

- presence
- temperature
- humidity
- brightness
- air quality
- CO2
- etc.
-

modularity

attach, twist and go!

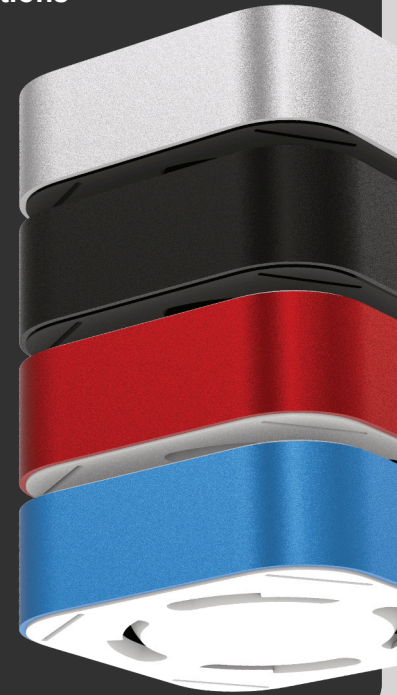

color options

silver

sensing and processing modules

core unit

power management
central control and connectivity unit
sensors and diagnostics

sensor & notification module

ambient sensing
status communication
360° indication lighting

radar cap

radar sensing
presence detection
that's it

lighting modules

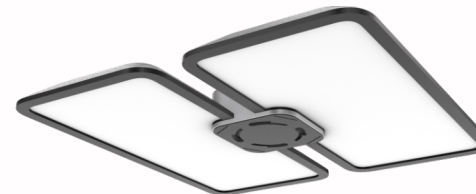

panel light

compact light surface
tunable white 2.700K - 6.500 K
CRI(Ra) > 90, PWM dimmable
presence detection

spot light

360° rotatable spot light
tunable white 2.700K - 6.500 K
CRI(Ra) > 90, PWM dimmable
presence detection

wing lights

dual large-area lighting
tunable white 2.700K - 6.500 K
CRI(Ra) > 90, PWM dimmable

adapt to your needs

gestalte Dir Dein Licht für Deine based on your needs.

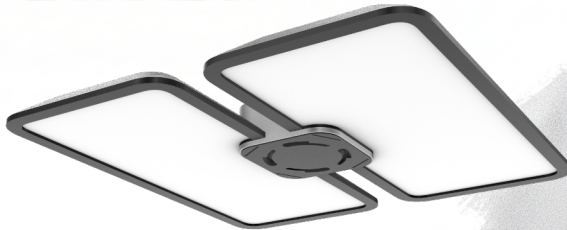

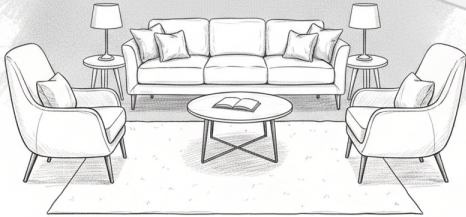

focus on your task at hand, supported by hylight ONE.

* human centric lighting, spot lighting for focused illumination

relax and rewind, accompanied* by hylight ONE.

* ambient lighting, soft panel lighting for reduced stress

indulge body and mind, invigorated* by hylight ONE.

* environmental sensing, spot lighting for focused illumination
