Our love

for wood

We only use selected European wood, which was dried for at least two years.

In each of our nutcrackers there are different kinds of wood.

Every piece that we process in our factory is unique, because wood is a vivid material and each and every piece has its own history.

We will continue this history.

With passion

for detail

You can find the love for this handicraft and for our work in each of our nutcrackers.

Each step, each detail and brush stroke is completed with diligence and devotion.

The whole production process, starting with designing and sampling, until final production takes places in our factory in Marienberg.

With creativity

we sketch and design

With passion
