

CLEANROOM SOLUTIONS FROM VISSMANN TECHNOLOGIES

INNOVATIVE CLEANROOM SOLUTIONS FOR
LIFE SCIENCE, PHARMA, HIGH TECH INDUS-
TRY, INDOOR GROWING AND MANY MORE

Diverse industry
expertise and
innovative hygienic
concepts

Viessmann Technologies - Founded on experience

Where we come from

In 1917, Johann Viessmann opened his small independent locksmith in the city of Hof in Bavaria and so started a great development process. Since then, Viessmann has developed into a leading player in energy and climate solutions.

The cleanroom product line was conceptualised in 2003 and is today successfully marketed and developed by Viessmann Technologies GmbH from its Hof headquarters. A team of international experts is in charge of ambitious projects throughout the world.

Holistic partners for cleanrooms

Viessmann Technologies is not just an innovative supplier of components but places the focus above all on customer-oriented system solutions – from individual development to an integrated approach. Sustainability in the sense of economic, environmental and social responsibility and the use of durable and reusable materials is very important.

Added to this, we give top priority to reliability and forming a cooperative partnership with customers, suppliers and employees, while maximising efficiency in our use of labour, materials and energy is one of our core corporate principles.

BENEFIT FROM:

- + Uncompromising customer focus
- + Diverse industry expertise
- + Innovative hygienic concepts
- + Highest quality standards right from the start
- + Local roots- international activity

Cleanroom expertise for every segment - Standards in protecting people and the environment

PHARMA / BIOTECH

- + Pharmaceutical Industry
- + Medical device manufacturing
- + Food processing
- + Cosmetics manufacturing
- + Research and development laboratories

HEALTHCARE

- + Operating rooms
- + Intensive care rooms
- + Isolation and quarantine
- + Pathology
- + Laboratories and GMP pharmacies
- + Blood banks

INDUSTRY

- + Battery factories
- + Semiconductors
- + Aerospace industry
- + Plastics
- + Optics
- + Precision mechanics
- + Fine chemistry

SPECIAL APPLICATIONS

- + Stability test chambers
- + Sampling cabins in pharmaceutical production
- + Horizontal-flow cooling locks
- + Product protection in sterile filling
- + Workstations for precision-weighing
- + Active material and personnel locks

INDOOR GROWING

- + Midsize and mega farms
- + Grow tower
- + Cleanroom greenhouses
- + Cannabis farms
- + Protein production

■ We are a competent partner for industry-specific requirements in all applications of cleanroom technology. Our multidisciplinary system solutions make us one of the leading companies in the industry and we incorporate the ever-increasing demands of quality, precision and complexity of products into our development processes. No two projects are alike – this means that our customers benefit from individual solutions that protect people, processes and products from harmful or undesirable environmental influences. ■

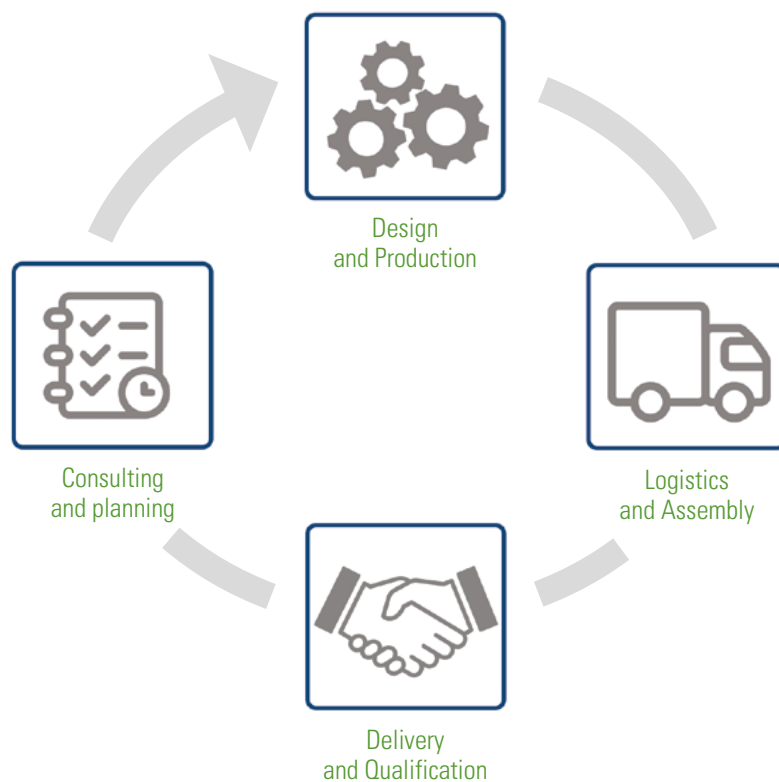

All-in-one service provider for cleanrooms

Consulting and planning

- Optional needs-based consulting and design
- Technical execution planning for cleanrooms and hospital functional rooms
- Individual project consulting from the start by a personal project manager
- Individually hand-picked project team

Design and production

- Development of individual solutions based on modular Viessmann components and precise technologies
- Certified “Made in Germany” quality
- Modular design for fast and easy assembly and flexible adjustments in case of changes in medical technology and room layouts
- Flush-mounted installation of diagnostics technology

Logistics and assembly

- Professional employees with practical experience and our logistics partners ensure fast and seamless delivery processing
- Our experienced assembly teams quickly install premium clean rooms with consistent quality around the world
- Expert in handling a project from logistics packaging and customer clearance

Delivery and qualification

- Complete verification of physical and microbiological parameters
- Professional commissioning and handover

Hygienic concepts and quality made in Germany

Excellent protection included

Our room components and system solutions offer your products and processes reliable protection from external influences. Areas of applications include, for example, septic and aseptic hospital functional areas, sterile and semi-sterile production facilities for the pharmaceutical industry and cleanrooms for precision manufacturing of microelements. Their modular design ensures that they remain cost-effective even for renovation projects and guarantees durability and reusability of components.

Antimicrobial powder coating Smart Protec

+ Antimicrobial Smart Protec powder coating

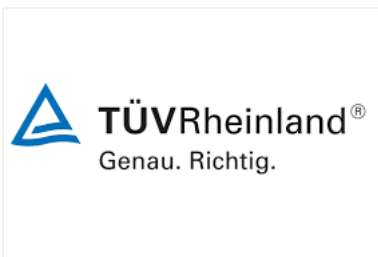

Smart Protec powder coating provides active and sustained protection against microorganisms and ensures that they die on contact with the surface. Smart Protec is thus a valuable addition to conventional risk minimisation.

Modular design of cleanrooms

+ Modular design

Our room systems are distinguished by their modular design that allows for quick adaptation to changes in process conditions or ambient conditions. Designed to have minimal joints, this GMP-certified design thus not only offers optimum flexibility but also meets the highest aesthetic and structural demands.

Compliance to DIN ISO standards

+ Made in Germany

“Made in Germany” is our promise of quality that will meet the high demands of our customers.

We manufacture our products in accordance with processes certified to DIN ISO standards, taking into account international standards and guidelines for cleanroom technology. Our standards meet the high demands of our target groups.

Innovation, expertise, flexibility: It's our responsibility.

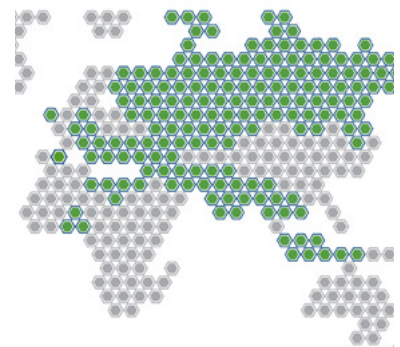

The system solutions from Viessmann Technologies for cleanroom technology are constantly reviewed by renowned institutions that certify the excellent properties of our products without exception. Whether they are made of glass, coated steel, stainless steel or ceramic – our room components and system solutions fully meet the requirements of each individual application.

TAKE ADVANTAGE OF THESE BENEFITS

- + “Made in Germany” quality – proven and seamless.
- + Delivery reliability – You can take our word for it!
- + A local market presence and international reach
- + Industry knowledge and technical expertise
- + Hospital experts, architects, engineers, and technicians ensure the expertise and quality of our products
- + Collaboration and joint research projects with the Chair for Hygiene and Cleanroom Technology at Albstadt-Sigmaringen University
- + Certifications according to:
 - DIN-EN-ISO 9001 2015
 - DIN-EN-ISO 14001
 - GMP appraisal
 - DRRI (German Cleanroom Institute)
 - Fire protection
 - Noise protection
 - Surface hygiene and impermeability

Viessmann Technologies is constantly growing and has implemented more than 1300 projects in more than 30 countries since 2003. Longstanding customers and international successes are proof that we will find the right solution for every need!
