

# THE ONLY IT SOLUTION TO YOUR BUSINESS CHALLENGES

**Because managing your business does not stop at your warehouse doorstep, LSI offers you a logistics solution allowing you to send and receive your parcels, raw materials, etc... or to optimise the storage of your warehouse.**

**LSI LOGISTICS** is a complete software solution, interfaced with the main ERP systems on the market.

It allows, within the warehouse, to carry out all types of operations on the company's stocks : consultation, entry, exit, change of location, order preparation, goods receipt, inventory...

It operates on portable terminals that are permanently connected to the company's computer network thanks to wireless coverage of the warehouse. Operations are therefore carried out in real time in your information system. Data security is increased by the massive use of the barcode scanner on the portable terminals.

# LOGISTICS

## FEATURES

- Raw material reception
- Real-time stock queries
- Change of location
- Order picking
- Packaging orders
- Inventories
- Production declarations

## BENEFITS

- Smooth flows and processes

- Traceability of operations
- Optimisation of warehouse storage
- Reduction of order picking time

# THE ONLY IT SOLUTION TO YOUR BUSINESS CHALLENGES

**To meet the various standards and requirements of your customers, LSI offers a weighing solution integrated with your tools production and storage management.**

**LSI WEIGHING** is interfaced with the major ERP systems on the market and works with high volume scales, load cells, smaller scales and mobile scales. All your product compositions are reliably produced.

You can, when receiving goods or preparing orders, adjust the stock with precise quantities.

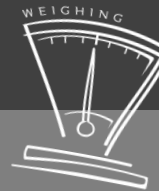

**LSI WEIGHING** works on portable terminals such as tablets that are permanently connected to the company's computer network. The operations are therefore carried out in real time in your information system. Data security is increased by the use of a barcode scanner linked to the tablet.
