

SUN CARE
CABANA
SUN

Brand Profile

- ✓ Cabana Sun is a tanning brand, targeted at young people between 18 and 30 years old who love tanned skin and enjoy outdoor and social activity
- ✓ Cabana Sun offers a beautiful natural tan, without sacrificing sun protection so consumers can enjoy the best of both worlds
- ✓ Cabana Sun is a trademark of Linco Care Ltd, a British manufacturer of sun and skin care products

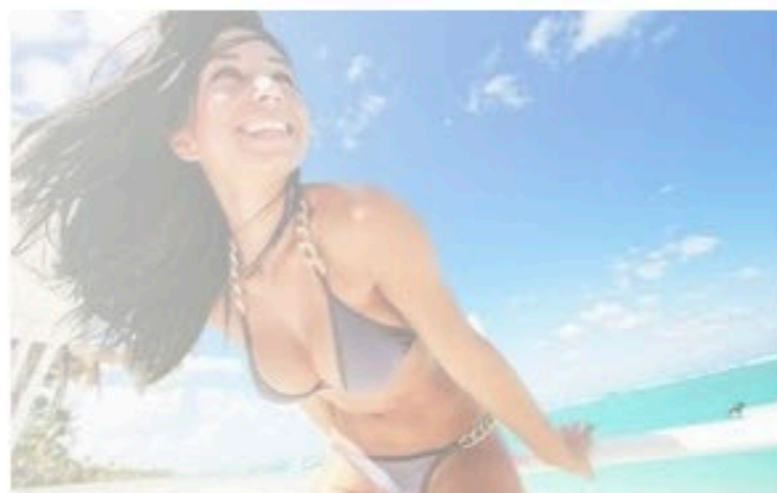

About Us

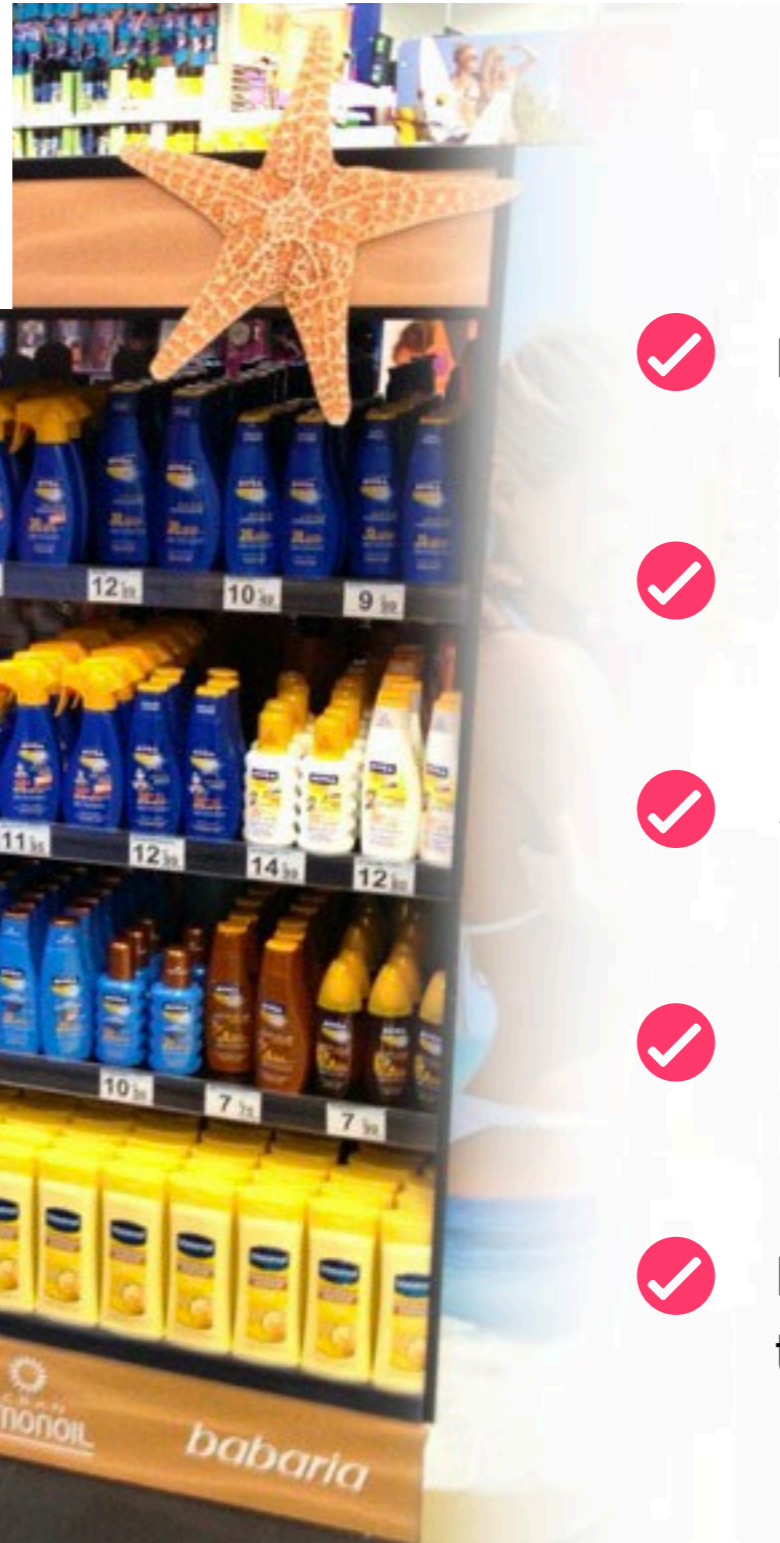

- ✔ Combines the best of both worlds, tanning and protection
- ✔ Largest assortment of oil products
- ✔ UVA EU compliant

Our Target Audience

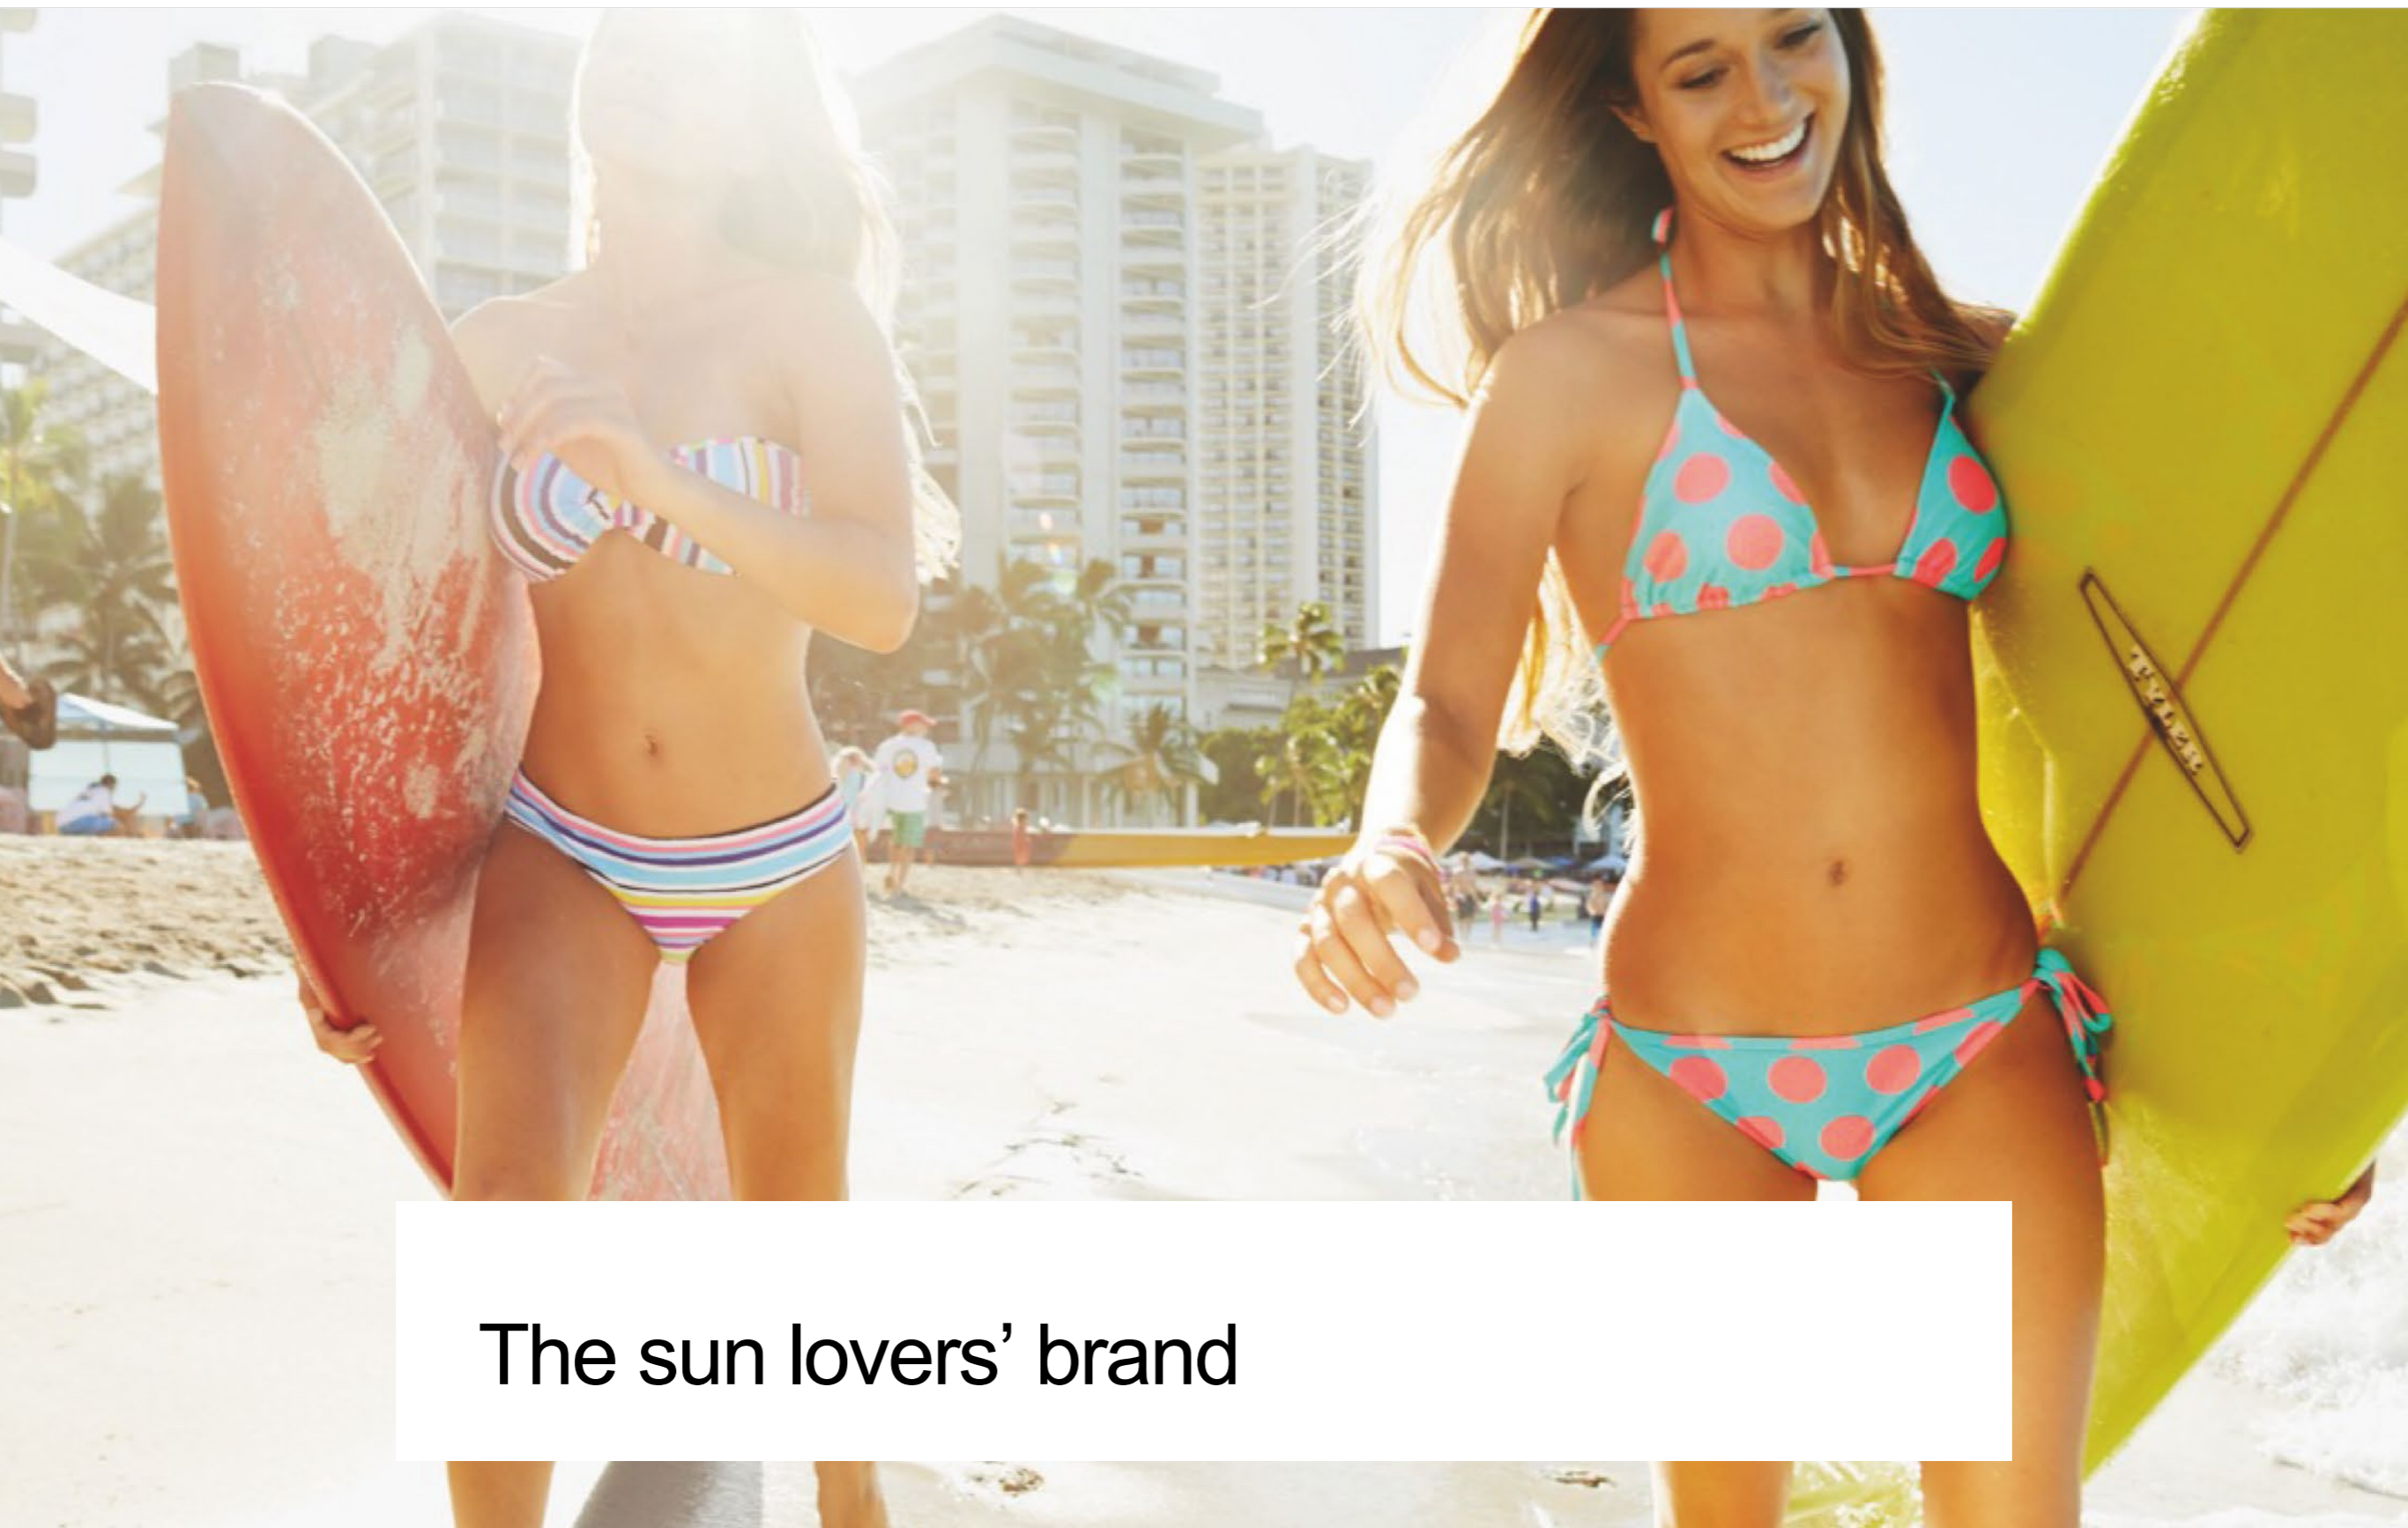

- ✓ Primarily for young people between 18 and 30 years old
- ✓ Cabana is a unisex brand most popular with girls
- ✓ Anyone striving for a healthy, natural tan along with reliable protection

Market Positioning

- ✓ Predominantly a tanning brand
- ✓ 85% of the Cabana Sun range is in a spray format
- ✓ Affordable brand suitable for young people
- ✓ Largest assortment of oils on the sun care market
- ✓ Expanded range based on market trends

The sun lovers' brand

Benefits of The Sun

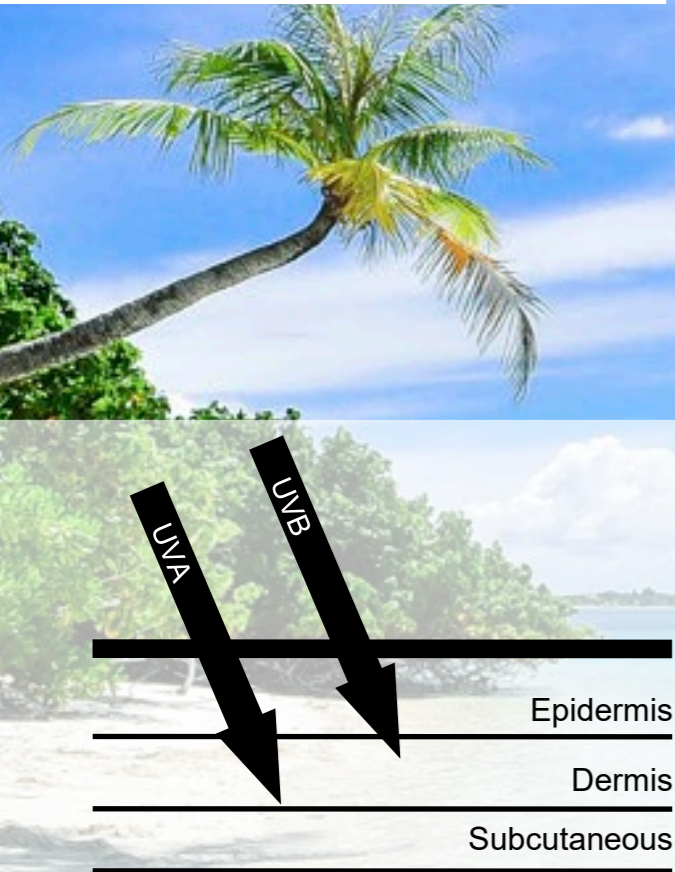

We get most of our Vitamin D from the sun and lack of this essential vitamin can result in serious bone deformities such as rickets in children and osteoporosis in adults.

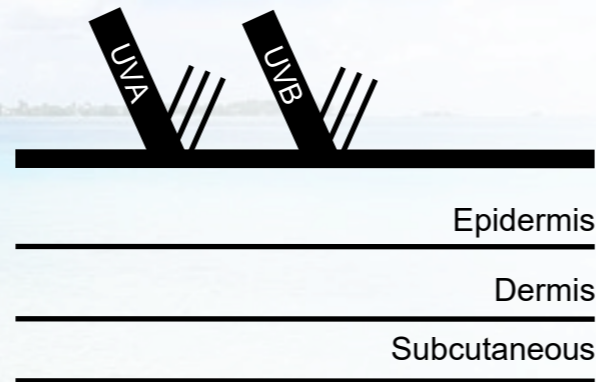

Sunshine causes the release of endorphins such as serotonin, which is proven to not only improve your mood and your energy levels, but also to reduce symptoms of stress and anxiety.

UVA & UVB Rays

Without protection UVA and UVB rays penetrate and damage your skin.

A Broad Spectrum sunscreen protects your skin from both UVA and UVB rays.

UVA *EU COMPLIANT*

- ✓ UVA rays penetrate the skin deeper than UVB rays and are primarily responsible for premature skin ageing. UVA rays have also been shown to cause skin damage at the cellular level.
- ✓ UVB rays damage the outer layers of the skin. They are the main cause of sunburn and play a key role in the development of skin cancer.

SPF Ratings

- ✓ Below is the approximate percentage of UVB rays blocked depending on SPF rating. The difference seems minimal, but a higher SPF helps if you are fair skinned or have a history of skin cancer.

- **SPF 15 = 93%**
- **SPF 30 = 97%**
- **SPF 50 = 98%**

- ✓ SPF ratings are significantly decreased if you don't apply enough sunscreen. Most people only apply 1/3 of the sunscreen they need. Make sure you use enough and don't neglect hard to reach and easily forgotten place like your ears, feet and upper back.

Remember,
no sunscreen
blocks 100% of UV
rays

A woman with long brown hair, wearing a dark bikini, is sitting on a white sandy beach. She is seen from behind, looking out at a clear blue ocean under a bright sky. A thatched umbrella is partially visible in the foreground, casting a shadow over her. The overall scene is a tropical beach setting.
