## Our team R&D Testing Equipment

Sort	Equipment Name	QTY	Description
Testing Equipment	Refractive index detector 折光率仪	1	Used for measuring the refraction rate of oil materials to determine the purity of materials
	Electric centrifuge 电动离心机	1	Determine the stability of the material to see if it will be stratified.
	Digital conductivity meter 数显电导率仪	1	Measure the electrical conductivity of the material body to determine the degree of impurity content in the material body
	Electric blast drying oven 电热鼓风干燥箱	1	Used for drying beaker, material, heat test, etc
	Digital display rotational viscometer 数显旋转粘度计	1	Used to measure the viscosity of the material and determine whether it meets the standard requirements
	The refrigerator 电冰箱	1	Used for cold storage of raw materials and cold resistance test
	Rotary vane vacuum pump 旋片式真空泵	1	Used for pumping air from vacuum drying oven.
	Super thermostatic water tank 超级恒温水箱	1	Used for constant temperature of roche foam apparatus
	Roche foam apparatus 罗氏泡沫仪	1	Used for foam determination of washing products
	Electric thermostatic incubator 电热恒温培养箱	1	Culture of bacteria.
	Biochemical incubator 生化培养箱	1	Used of cultivating bacteria.
	Electrically heated vertical pressure steam sterilizer 电加热立式压力蒸汽灭菌锅	1	Disinfection of tools used for microinspection experiments
