DEESS®

IPL TECHNOLOGY

IPL (Intense Pulsed Light) has been used for clinical treatments for more than 10 years in countries from all over the world. It's a safe and effective technology, millions of customers gave good feedback. IPL brings customers comfortable and painless treatment.

PRINCIPLES OF BIOSTIMULATION

The light energy acts on the skin, stimulates fibroblasts to produce new collagen fibers and elastic fibers, and restores skin elasticity. At the same time, the photothermal effect can strengthen blood vessel function, improve microcirculation, enhance skin immunity and resistance, and achieve the effects of firming, lifting, shrinking pores, and rejuvenating skin.

PRINCIPLE OF PHOTOPYROLYSIS

The light energy acts on the skin and is absorbed by the pigment group (melanin or hemoglobin) of the lesion tissue, and the temperature rises. Under the premise of not harming the normal skin, the pigment group is disintegrated or broken, and is excreted with the circulatory system to achieve the therapeutic effect.

HOW DOES RF & LED WORK?

When the RF energy penetrates into dermis, the electric energy is transferred into thermal energy.The inner temperature of the tissue increases, then the heated collagen fibers shrink immediately and stimulate to accelerate regeneration of collagen protein over a long term, with the results of wrinkles reduction, pore shrinking and skin tightening.

LED technology enhances treatment results by transferring spectrum light energy into heat energy. Yellow light is for skin rejuvenation,while red light is for wrinkle reduction.

HOW DOES MICRO CURRENT WORK?

Microcurrent makes the electricity stimulating in-depth subcutaneous tissue to muscle(stimulate muscle activities), and enhance lymph drainage, which are helpful for repairing skinelasticity fiber, drainage excessive water, toxin and pigment out,as a result of face slimming, crow's feet reduction, black eye circle disappear.

SAPPHIRE IPL SERIES

GP592

1.Sapphire ice cooling hair removal

High energy sapphire lamp, ice 8*C feeling comfortable hair removal, no black spots.

2. Hair Removal + Skin Rejuvenation

Covering wave band of skin rejuvenation, remove hair and rejuvenate skin at the same time, enjoy smoothness and softness with just one device.

3. Longer Lifetime

Breaking through the previous limitation of 350,000 flashes, with unlimited flashes, it can continuously emit light without stuck.

4. Suitable for the whole body

- 7 minutes for the whole body
- Visible effect after 4 treatment

Professional Technology

IPL, short for intense pulsed light, is a popular and well-known treatment in the beauty field around the world for more than 20 years. It's a kind of professional, safe, and painless treatment.

Sapphire cooling technology

Clever cooling technology reduces the heat out put from the device to protect the skin. This also makes each treatment painless and non-invasive.

Why we choose Sapphire?

1.Higher conductivity and light transmittance
2.Painless and non-invasive
3.30% more effective than normal ice cooling

Visible obvious effect after 4 treatments

1.2 in 1: hair removal, skin rejuvenation
2.Lifetime: unlimited
3.5 levels
4.Working modes: manual and automatic
5.Fast: 7 minutes for whole body

RF & EMS HOME BEAUTY DEVICE

GP520

EMS + RF + RED YELLOW LIGHTS

EMS: Provides pulse waves with electric wave energy, which can get deep into the skin base, activate ATP of subcutaneous cells, promote regeneration of collagen at the bottom of skin, and make the skin young and glorious from the inside out.
RF + Red Yellow Lights: With the special RF transmitter, the electric energy can be transformed into internal energy and heat energy, which can penetrate into the whole dermis, stimulate the long-term regeneration and reconstruction of collagen, and achieve the effect of skin tightening and wrinkle removal.

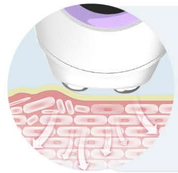

1.Dual modes

EMS --- Face lifting and skin tightening;
RF+Red light + Yellow light --- Skin rejuvenation and whitening.

2.S136 medical poles

S136 medical poles, made of stainless steel, safe and corrosion-resistant. Bipolar RF, double effects, reshapes age reversing watery skin.

3.Temperature stable, depth controlled

The epidermis is protected when it acts on deeper skin tissue. The penetration depth is 1/2 of the distance between the two poles, and the effective treatment depth is 2-4mm.

4.Safe and efficient, comfortable experience

Energy concentrated, controllable depth and temperature, skin protected. Current only flows through the distance between the two poles, painless, safe and comfortable.

PRODUCT FUNCTIONS ➤

- SKIN REJUVENATION
- WRINKLE REDUCTION
- FACE LIFTING
- EYE CARE
