

BEYOND
LIGHTING FACTORY

INDOOR
CATALOGUE

ESTABLISHED IN QATAR **in 2011**

Established in Qatar in 2011, Beyond Lighting embarked on a journey to enhance the experience of lighting. In 2020, we evolved from a trusted solution provider to a manufacturer with global aspirations, specializing in innovative and sustainable lighting solutions.

We believe that lighting has the power to create immersive environments, enhance well-being, and contribute to a sustainable future for all. Driven by this belief, our company has gained a reputation for delivering top-quality products and engineering services in the lighting domain, by utilizing the best components, cutting-edge technologies, and the highest grades of materials.

BEYOND LIGHTING FACTORY

By promoting ourselves as a manufacturer that harnesses the power of the finest components, groundbreaking technologies, and creative solutions, we aim to revolutionize the lighting industry and cast a positive impact across the world. Our rich history and achievements serve as the foundation upon which we continue to build, as we strive to meet and exceed the needs and expectations of clients worldwide.

As part of our development plan, we have been inspired after 10 years of experience and know-how in the lighting and solar lighting industry to start our own factory , Beyond Lighting Factory, a 3500 square meter premises in industrial area, zone 81 street 11.

The company has always ensured the highest quality standards while paying close attention to technological advancement and the idea of environmental sustainability.

From design to production & distribution,

Beyond Lighting monitors the product development process at every stage. The high-tech machines and sophisticated automation techniques are a component of an ambitious project that BL can be proud of.

Fully automated work phases that require the least amount of human participation, include high-tech laser cutting equipment, rolling machines, bending machines, metal rolling and cutting machines, and all forms of laboratory testing.

INSPIRED BY QATAR

DEVELOPMENT

PROSPERITY

PROGRESS

With a strong foundation in the Qatari market, Beyond Lighting has illuminated more than 150 projects in Qatar and the Middle East, including projects for the FIFA World Cup held in Qatar. We provided lighting solutions that met the highest world standards for prestigious undertakings such as Al Bayt Stadium, Ahmed Bin Ali Stadium, and Doha Port, which achieved the highest grades of GSAS (Global Sustainability Assessment System) certification. Our expertise in delivering top-quality, sustainable lighting for such high-profile projects further showcases our capabilities to deliver to world-class standards.

Light source Life	60,000h

DAISY SERIES is an anti-glare downlight with honeycomb grill. It adopts high lumen light source, deep reflector and low glare UGR<19, which provides a comfortable visual experience. The aluminum profile provides excellent thermal dissipation and ensures a long lifespan. DALI, 10-1V driver are available to provide excellent dimming effect.

It is designed for general lighting applications in offices, schools, hotels etc. It is also widely used for public areas, such as stairway, lobby, reception, corridors etc.

OLEANDER SERIES

OLEANDER SERIES single head and double head provided for wide choice. Adjustable lighting direction offers various lighting orientation. OLEANDER is a recess-mounted LED that offers outstanding lumen packages for spaces that require a large amount of light. This luminaire is indicated for lighting from high ceilings and for retail stores due to its adjustable factor.

CACTUS SERIES consists of a linear recessed downlight that offers two beam options: a Symmetric Beam (referred to as CACTUS SYM) and an Asymmetric Beam (referred to as CACTUS ASS). This lighting fixture features an aluminum die-casting frame with a UV-resistant white powder coating finish, ensuring efficient thermal control. It utilizes a CREE XP-G high-power SMD light source, delivering impressive brightness, CRI, and minimal color deviation. The design incorporates modular lenses and multi-louver reflectors to reduce glare, achieving a UGR<19 and creating a unique and visually pleasing light distribution.

QUADRO SERIES

QUADRO SERIES is a new LED panel light that adopts secondary optical design. The PMMA optic lens combined with special designed PC shade can achieve a more uniform light and larger emitting area, so that users can enjoy more comfortable visual experience. Powder spraying surface treatment is employed in the Light source fixture which makes the Light source corrosion resistant. Designed for grid ceiling commercial applications such as offices & schools, shopping centers, super markets, retailer shops, hospitals, laboratory, dust-free workshop etc.

QUADRO BACKLIT PANEL SERIES with external driver, adopts high quality SMD led with optical lens to provide a uniform light effect, high efficiency.

Available in 10-1V and DALI dimming. It is available in different installation ways: embedded into ceiling, suspended with hanging wires, surface mounted in a concrete ceiling by using surface mounting frame.

It is widely used in offices, schools, shopping mall, super markets, retailer shops, hospital, laboratory, dust-free workshop etc.

Anti-glare design, UGR<19.

BAMBOO SERIES is an ideal alternative to fluorescent Light sources. It adopts high lumen SMD chip, the high transmittance PC cover makes a uniform and soft light output. With waterproof joint at both ends, it can be linkable. Special clip-on bracket design makes an easier installation. The installation angle is adjustable with different scales. This luminaire can be used in farm, factory, warehouse, workshop, and other lighting area with high humidity and dusty places. Pendant/ Surface mounted installation.

BATTEN SERIES is a waterproof batten LED fixtures that is ideal for outdoor use due to its high waterproof rating. However, it also offers dust and physical impact protection when used indoors.

This fixture is known for its durability, long lifespan ease of maintenance, and its ability to provide excellent lighting. Our top-notch linear solutions and competitive pricing further enhance our market presence.

- Integrated diffuser and Driver tray design.
- Milky/frosted diffuser.
- Marine grade accessories SS 316.
- Linkable connection available.

LINEA SERIES is a new linkable design light with anti-glare and UGR<19. It adopts high lumen efficiency SMD LED with even light output, aluminum light body providing excellent thermal management. Pendant with steel rope, pendant with round ceiling plate, surface mounted, wall mounted, recessed and track installation are all available. With Corner/ Cross/ Straight/ T shaped connectors for multiple shape design. It is mainly used for traditional suspended installation such as workshop, utility rooms, garages and more.

MIRROR LINEA SERIES

MIRROR LINEA SERIES is a slim and refined led mirror light. It adopts lighter weight fireproof material to ensure better heat resistance and corrosion resistance. There are three color options of white, silver, and gold to suit different usage environments. The side shape is the shape of water droplets, which is elegant and delicate.

Ambient Temp.	-30°C ~ 50°C
Ambient Humidity	10% ~ 90%

HIGH BAY GLOW SERIES is a cost-effective and compact high bay with super high efficacy 160lm/W, 200lm/W, 210lm/W. Together with twist central sensor makes the high bay solution more energy-saving and with higher performance. Optimized compact housing structure ensures excellent heat dissipation function with operating temperature: -30°C to +50°C.

- Product Features:
- Intelligent control: Twist microwave motion sensor and PIR sensor, 1-10V dimmable.
 - Multiple installations: loop hanging, ceiling mounting.
 - PC and ALU reflector are optional.

HIGH BAY TECH series features a snow-white body that pairs seamlessly with a PC diffuser, making it an outstanding choice for various commercial settings like shopping malls, spacious plazas, and large docking areas. The integration of a PC diffuser not only enhances efficacy, reaching up to 145lm/w, but also minimizes glare with a low UGR<22. Its straightforward and elegant appearance offers a solution for spaces with high aesthetic demands.

STRIPS AND FLEX

How does cove lighting contribute to the enhancement of a space?

Cove lighting, characterized by its indirect illumination approach, plays a key role in generating a gentle and soothing ambient radiance through reflected light. This subtle lighting effect is easy on the eyes and discreetly integrates into the surroundings, avoiding drawing undue attention to itself. Additionally, cove lighting minimizes contrast in the space while elevating overall light levels. The advent of linear LED lighting sources has further improved the efficiency and brightness of cove lighting solutions, often replacing the need for downlights. The slender profile of linear LEDs opens up possibilities for implementing coves even in confined spaces.

What factors require careful consideration in implementing cove lighting?

- Ensuring uniformity of cove light distribution.
- Determining the optimal extent of light throw.
- Achieving a soft and gradual transition from light to dark.
- Eliminating hot spots to maintain even illumination.
- Employing sound cove construction techniques.

LED SHEET

This LED sheet functions as a backlight system with low energy consumption and a high Lumen output. It offers flexibility for various applications by allowing customization of module length, horizontal and vertical module spacing, and module direction for both single and double-sided use. This lighting solution is suitable for illuminating graphics from behind and is particularly effective for large-sized and curved lighting boxes.

Product Features:

- Ultra-thin flexible LED sheet
- Cutttable matrix at 6 LEDs per segment
- Constant Voltage 24V DC input

Dimensions

Unit: mm

Notes:

1. Shown as diagram above. Every single LED can be cut vertically and horizontally.
2. For installation convenience, one type of wire is provided. When it is going to be connected with power, the only way to read the sign on the board where it shows positive and negative not the color of the wires. Negative and positive is shown as the diagram above. White wire is for positive. Gray wire is for negative. The LED will turn on if it is right. Otherwise repeat with notice. Or Check with the Connection Diagram.

What is exterior or façade lighting, and what purpose does it serve?

Illuminating the exteriors of our buildings is integral to establishing visually appealing urban landscapes. In the contemporary setting, buildings are expected to be iconic landmarks, making a distinctive impression during both day and night. Meticulously crafted nighttime illumination on the facades, which respects the building's architecture and context while managing light spill, is crucial in creating an image that is appreciated by everyone.

Façade lighting can be categorized into two types:

- Direct lighting
- Indirect lighting

What factors need thorough evaluation?

- Choice between direct or indirect lighting.
- Resistance to weather conditions.
- Distribution of light.
- Seamless integration into façade details and considerations for maintenance.

STRIP LIGHT 8.6 W/m

IP68

24Vdc

5 YRS
Warranty

8.6
W/m

Upon request

1-10V

PHYSICAL

Dimensions	L5000xW8mm/Pc
------------	---------------

ELECTRICAL

Light source	LED
Lumen output	810lm/m
CRI	>80
CCT	3000K
Driver	DC12/24V

Product Features:

- High quality FPC, authentic 3M tape
- Self-encapsulated design 2835 LED
- Light source lifetime:50K hours(L70)
- Meet (EU)2019/2020 ErP regulations
- Min. Bending Diameter: 60mm
- Max. length(M): 5M

NEON LED STRIP 12 W/m

IP67

24Vdc

5 YRS
Warranty

12
W/m

Upon request

1-10V

Material	High quality FPC
Roll	5m
Beam Angle	110°-140°-170°
Input voltage	24Vdc
CCT	2700K,3000K,4000K,6000K
Light source	LED
Lumen	890lm/m
CRI	≥80
Ambient Temp.	-20°C ~ 50°C

Optical test Diagram

Installation accessories set (PC mounting clips, screws)

Optional accessories

Image	Description
	Aluminum profile: L2000xW11.7xH0.5mm
	TC-type 10mm moldable profile
	Cutting accessories set (Front & end cap, power cord)

Product Features

IP67 fully encapsulated, flexible LED strip for linear outdoor and indoor, LED circuit completely encapsulated with UV silicone sheath.

DMX controlled LED strip use special IC chip to address each section of LEDs to be programmed to the users preference and compatible with DMX512 protocol. Allows to create millions of colors by mixing red, green and blue colors.

- High quality FPC
- Self-encapsulated LED
- Light source lifetime:50K hours
- Light source removable
- Meets (EU) 2019/2020 ERP regulations
- Horizontal bending
- High quality silicone material
- Min.Bending Diameter: 140mm
- Single-ended power supply maximum length:10m

NEON SIDE BEND LED STRIP 11.5 W/m

IP67

IK08

24Vdc

5 YRS
Warranty

11.5
W/m

Upon request

1-10V

Material	High quality FPC, UV and salt water resistant
Finish	White(outside) & Milky finish(over light emission)
Dimensions	L5000xW10xH10mm
Beam Angle	140°
Input Voltage	24Vdc
Power	11.52 W/m
Light source	LED
Lumen	330 lm/m
CRI	≥80
CCT	3000K - 4000K - 6000K
Driver	24Vdc remote driver to be ordered separately
Cuttingn unit	50mm
Ambient Temp.	-20°C ~ 50°C

Product Features

IP67 fully encapsulated, flexible LED strip for linear outdoor and indoor, LED circuit completely encapsulated with UV silicone sheath, no yellowish after years.

- High quality FPC, UV & salt water resistant
- Dot free and homogeneous light emission surface
- Self-encapsulated LED
- Light source lifetime:50K hours
- Vertical bending
- High quality silicone material
- Min.Bending Diameter: 140mm
- Single-ended power supply maximum length:10m
- Cutttable each 50mm
