CATALOGUE

ESTABLISHED IN QATAR **in 2011**

Established in Qatar in 2011, Beyond Lighting embarked on a journey to enhance the experience of lighting. In 2020, we evolved from a trusted solution provider to a manufacturer with global aspirations, specializing in innovative and sustainable lighting solutions.

We believe that lighting has the power to create immersive environments, enhance well-being, and contribute to a sustainable future for all. Driven by this belief, our company has gained a reputation for delivering top-quality products and engineering services in the lighting domain, by utilizing the best components, cutting-edge technologies, and the highest grades of materials.

BEYOND LIGHTING FACTORY

By promoting ourselves as a manufacturer that harnesses the power of the finest components, groundbreaking technologies, and creative solutions, we aim to revolutionize the lighting industry and cast a positive impact across the world. Our rich history and achievements serve as the foundation upon which we continue to build, as we strive to meet and exceed the needs and expectations of clients worldwide.

As part of our development plan, we have been inspired after 10 years of experience and know-how in the lighting and solar lighting industry to start our own factory , Beyond Lighting Factory, a 3500 square meter premises in industrial area, zone 81 street 11.

The company has always ensured the highest quality standards while paying close attention to technological advancement and the idea of environmental sustainability.

From design to production & distribution,

Beyond Lighting monitors the product development process at every stage. The high-tech machines and sophisticated automation techniques are a component of an ambitious project that BL can be proud of.

Fully automated work phases that require the least amount of human participation, include high-tech laser cutting equipment, rolling machines, bending machines, metal rolling and cutting machines, and all forms of laboratory testing.

INSPIRED BY QATAR

DEVELOPMENT

PROSPERITY

PROGRESS

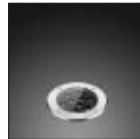

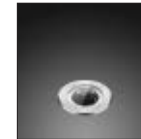

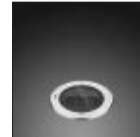

With a strong foundation in the Qatari market, Beyond Lighting has illuminated more than 150 projects in Qatar and the Middle East, including projects for the FIFA World Cup held in Qatar. We provided lighting solutions that met the highest world standards for prestigious undertakings such as Al Bayt Stadium, Ahmed Bin Ali Stadium, and Doha Port, which achieved the highest grades of GSAS (Global Sustainability Assessment System) certification. Our expertise in delivering top-quality, sustainable lighting for such high-profile projects further showcases our capabilities to deliver to world-class standards.

SIDRA SERIES

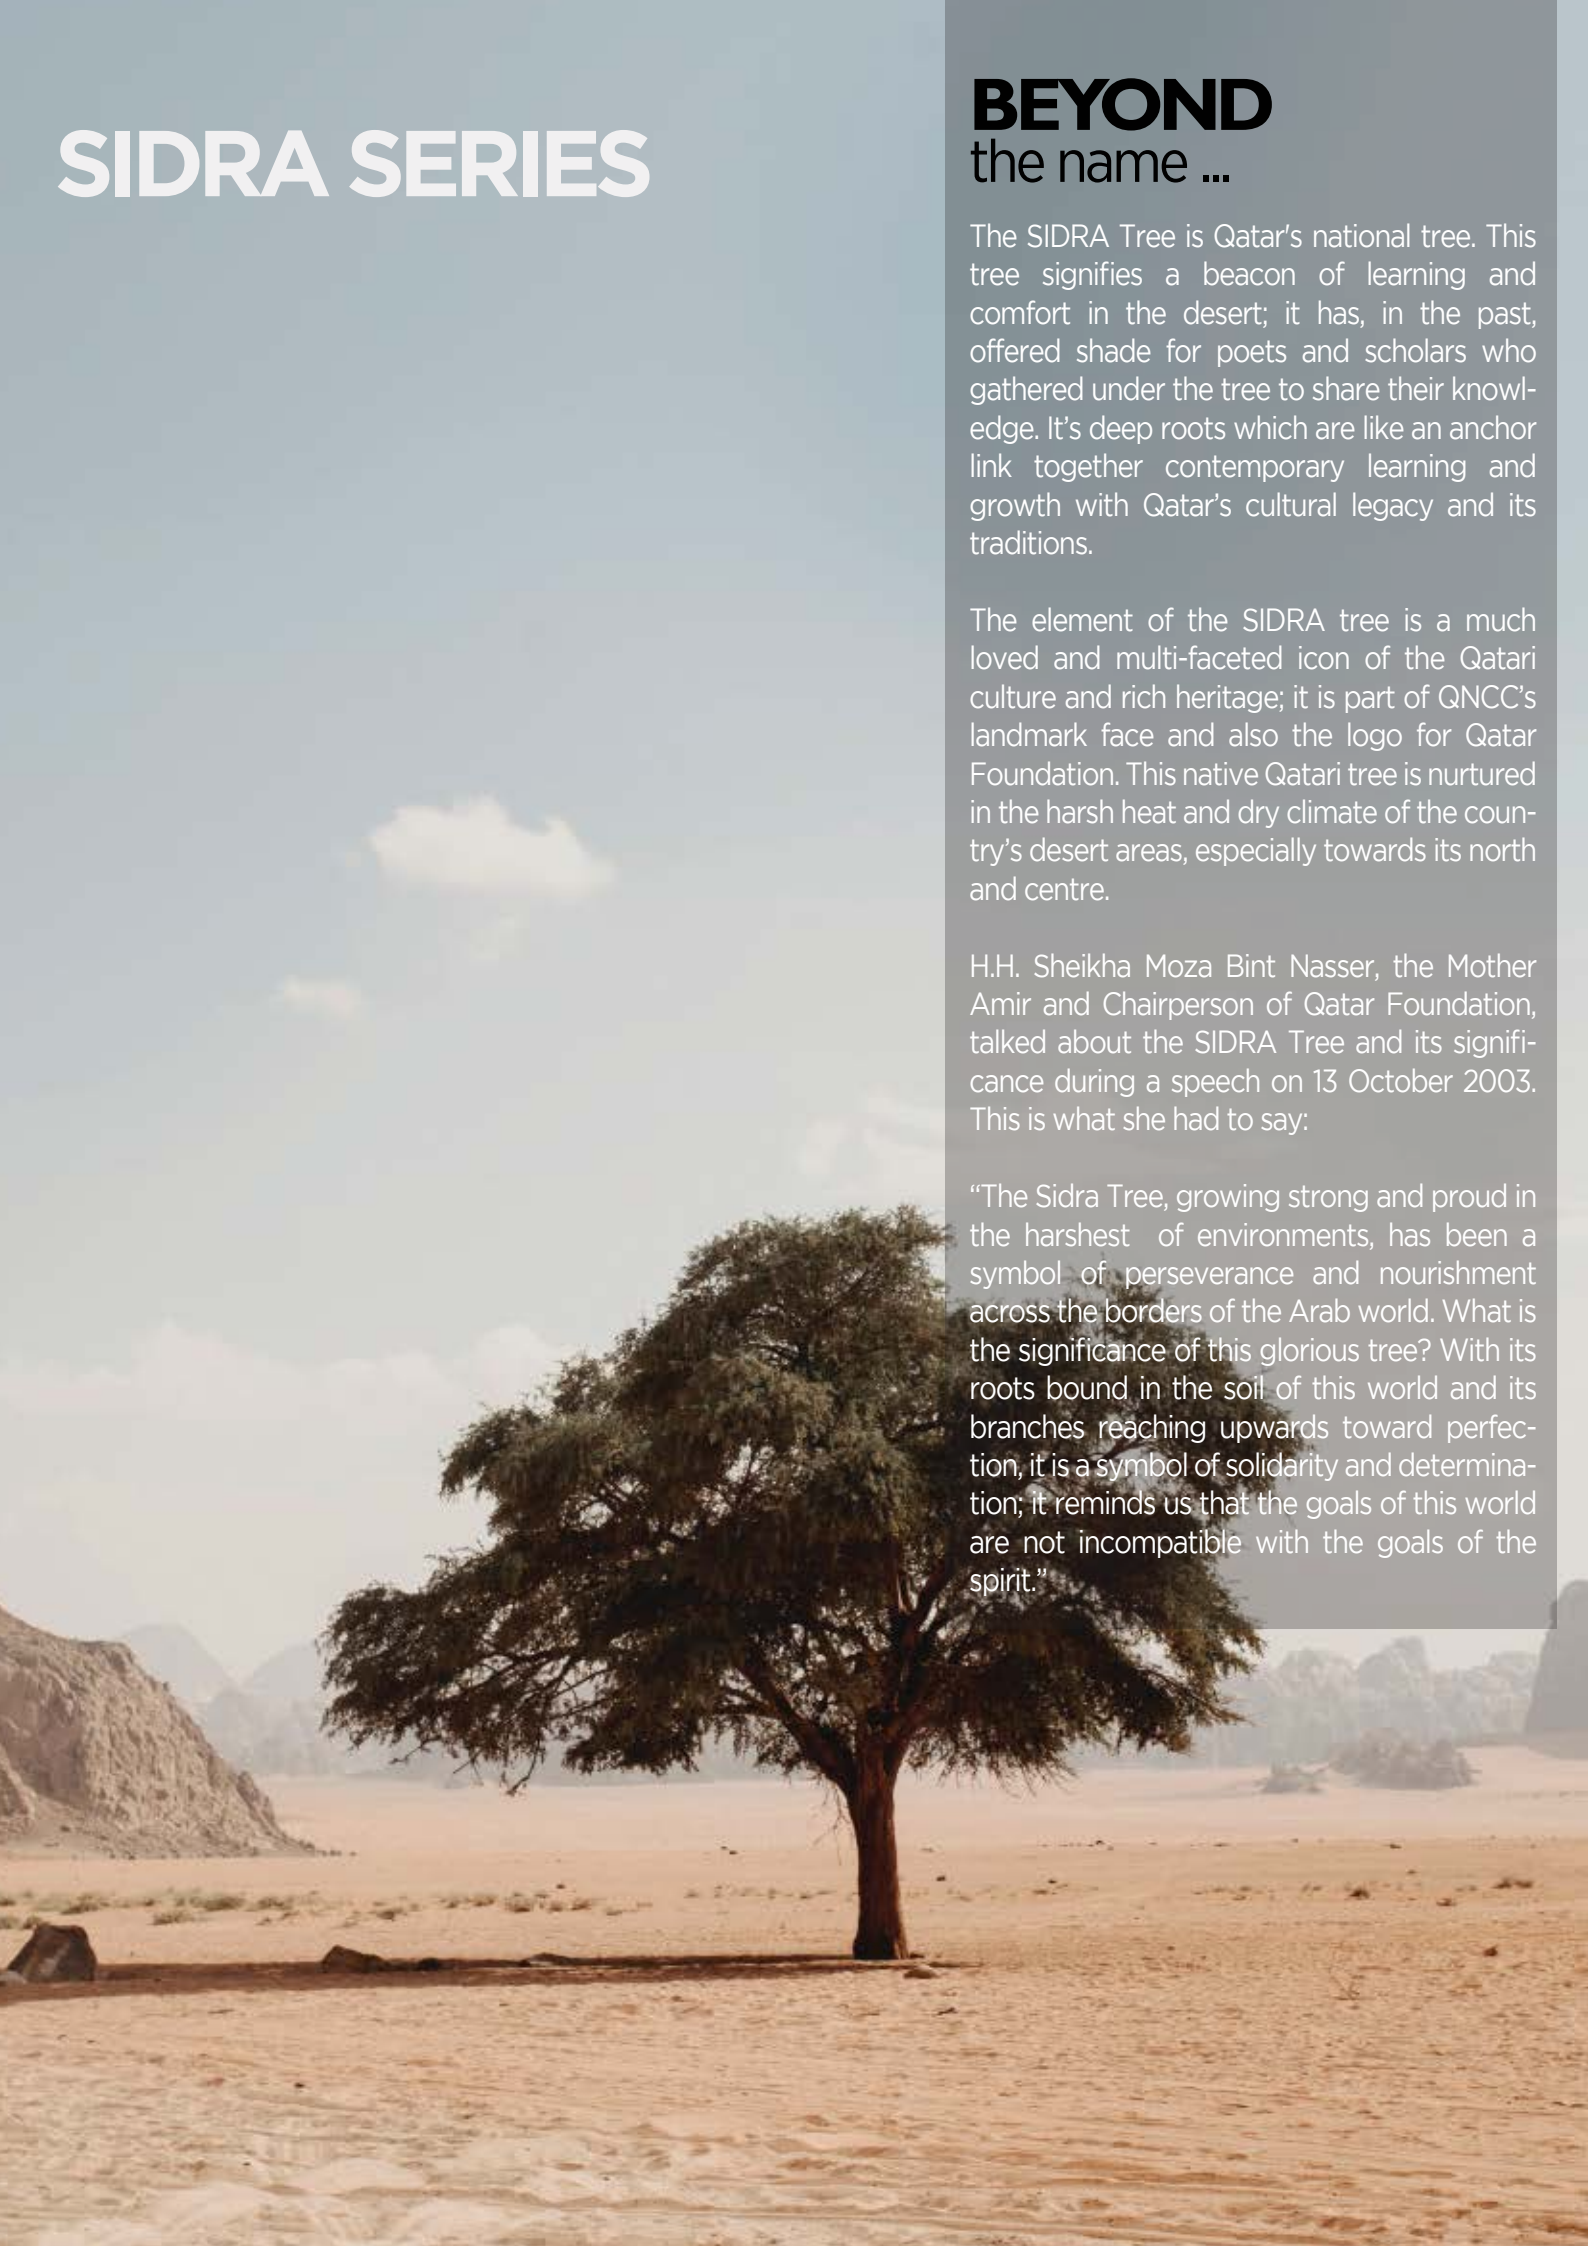

BEYOND the name ...

The SIDRA Tree is Qatar's national tree. This tree signifies a beacon of learning and comfort in the desert; it has, in the past, offered shade for poets and scholars who gathered under the tree to share their knowledge. It's deep roots which are like an anchor link together contemporary learning and growth with Qatar's cultural legacy and its traditions.

The element of the SIDRA tree is a much loved and multi-faceted icon of the Qatari culture and rich heritage; it is part of QNCC's landmark face and also the logo for Qatar Foundation. This native Qatari tree is nurtured in the harsh heat and dry climate of the country's desert areas, especially towards its north and centre.

H.H. Sheikha Moza Bint Nasser, the Mother Amir and Chairperson of Qatar Foundation, talked about the SIDRA Tree and its significance during a speech on 13 October 2003. This is what she had to say:

"The Sidra Tree, growing strong and proud in the harshest of environments, has been a symbol of perseverance and nourishment across the borders of the Arab world. What is the significance of this glorious tree? With its roots bound in the soil of this world and its branches reaching upwards toward perfection, it is a symbol of solidarity and determination; it reminds us that the goals of this world are not incompatible with the goals of the spirit."

SIDRA FIXED series is specially designed to deliver low-glare lighting, thanks to the round meshed grill, to façades, columns, monuments and trees with minimal installation depth. The fixture is made of a combination of 316L stainless steel and die-cast Aluminum. It has an optical PMMA secondary light distribution technology, viewing angle, light-gathering effects that can be adjusted by various lens according to demands and could be supplied with an optional honeycomb louvre and/or anti-slip glass.

QATAF

BEYOND the name ...

The QATAF is Qatar's national flower and grows along the country's coastal line. QATAF, also known as Lemonium or Sea Lavender, has pink or lilac flowers that grow in clusters from a bright redbud and can be seen in Qatar from the months of March to May. The flowers are decorated almost everywhere around the city to have a beautiful view

This flower symbolizes success, beauty, sympathy, and remembrance. The profound meaning of Limonium conveys "I miss you" when you give these flowers to someone you are fond of. Limonium blooms in spring and summer. They come in an incredible range of colors such as blue, lilac, yellow, white, pink, and purple.

QATAF series is a range of compact recessed marker lights, with an IP67 protection rating. The power supply is built into the structure, so they can be connected directly to the power line, making installation easier. The body is made of AISI 316 L steel with lateral light emission to indicate pathways and pedestrian zones.

The luminaries are available with different light sectors for various on-site lighting situations. The light from the luminaries is directed immediately above ground level onto the surface to be illuminated, thus illuminating walkways and traffic areas or highlighting potential hazards such as stairs and steps.

ZEKREET SERIES (Screwless)

ZEKREET is a series of spot lights to be mounted on floor, wall, spike, tree with belt system or on a pole system. Available in various sizes, rotatable and inclinable on the vertical axis, they are designed for lighting small facades, small trees, bushes, statues, columns and other architectural elements in general, thanks to a wide range of optics and wattages. ZEKREET comes with a series of accessories that ensure different type of mounting and beam control.

ZEKREET SERIES

ZEKREET is a series of spot lights to be mounted on floor, wall, spike, tree with belt system or on a pole system. Available in various sizes, rotatable and inclinable on the vertical axis, they are designed for lighting small facades, small trees, bushes, statues, columns and other architectural elements in general, thanks to a wide range of optics and wattages. ZEKREET comes with a series of accessories that ensure different type of mounting and beam control.

VIVID SPOTLIGHT SERIES

VIVID SPOTLIGHT SERIES features a robust die-cast copper-free aluminum body renowned for its high corrosion resistance, complemented by a durable powder coating with phosphochromating pre-finish. Stainless steel screws ensure secure assembly, while the transformer operates efficiently with an electronic power supply at 220/240V 50/60Hz, built directly into the unit. A silicone rubber gasket provides reliable sealing, and tempered glass ensures strength and safety. The fixture's design allows for full rotation of 360° horizontally and +90° vertically, offering versatile positioning options.

High efficacy • Innovative • Durable

BEYOND the name ...

SAQR means Falcon in English. The falcon is Qatar's national bird, which is highly appreciated and loved in Arabic countries. The Falcon is related to heritage and culture, and it represents courage and dignity. In Qatar, there are 6 different kinds of falcons; the Amur falcon, Sooty falcon, Lanner falcon, Saqr falcon, Peregrine falcon, and the Barbary falcon. The falcon is a very important bird in Qatar as it had been used as a hunting tool because of its sharp eyesight, and is associated with being noble and wealthy. It is a popular bird but has to be cared for appropriately and undergo intensive training. Falconry is an integral part of the heritage and culture of Qatar with falconers forming a very special bond with their falcons. In 2012, a hunting competition was founded; Al Galayel.

Products Benefits & Features

- Superior efficacy, up to 155 lm/W.
- 70% energy saving, short ROI period.
- Up to 100,000 hrs @ L70, low maintenance cost.
- World-class, approbated quality components.
- Tool-less opening of driver box, ease of maintenance.
- High-grade aluminum housing with stainless steel screws marine grade to ensure high quality and reliable operation.
- Support horizontal and vertical mounted, suitable for different light poles.
- Excellent outlook, robust and durable design.
- Lifetime of more than 100,000 hours.
- Easy and fast installation.
- Wide temperature operating range.
- IK10, IP66.
- Smart city simplified integration options.
- Wide choice of optics.
- 95% of the material used are recyclable materials.
- 5 years warranty.

Installation Manual

Installation & connection instructions

- STEP 1: Open the package and check the product.
In case of any damage, contact us.
- STEP 2: Fasten the fitter onto street light with screws provided and adjust the fitter in the desired tilt angle.
- STEP 3: Open the clips and Insert the pole and external power cord into the luminaire. Tighten the M16 connector.
- STEP 4: Connect the cable to Knife switch or terminal block, make sure to connect the cable correctly.
Brown-Live, Blue- Neutral, Yellow/Green-Ground.
Fix the luminaire and pole by allen wrench.
- STEP 5: Close the cover and clips.
Switch the voltage on and check to see that the street light works properly.

Recommended torque: $17\text{Nm} \pm 1\text{Nm}$

Caution

- Installation and maintenance must be performed by professionals only.
- Please ensure the pole is strong enough and the screws are tightened.
- The ground wire must be securely connected.
- Please make sure the LED fixture is working with correct input voltage.
- Cut off the power before maintenance.
- Do not use chemicals or corrosive cleaner to clean the fixture.
- If the external flexible cable or cord of this luminaire is damaged, it shall be exclusively replaced by a qualified person in order to avoid a hazard.
- The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.
- Torque setting in newton meters to be applied to any bolts which fixes the luminaire to its support.

Adjustable tilt angle: $\pm 0-5-10-15^\circ$

FLOOD LIGHT SERIES

THAQAB SERIES

THAQAB
Floodlight 30-400W

REY SERIES

REY
Floodlight 100-300W

THAQAB SERIES

THAQAB series of projectors to be mounted on pole system, wall, floor. Available in several sizes, rotatable and inclinable on the vertical axis, they are designed for the lighting of parking lots, cycle paths, squares, façades, green areas, perimeter areas and other architectural elements in general thanks to a wide range of optics and wattages. It comes with a series of accessories that ensure different type of mounting.

Product Benefits:

- Up to 100, 000hrs @ L70, low maintenance cost.
- World class, approbated quality components (LEDs /Driver /etc.)
- Equipped with vent to avoid internal fogging and frosting.
- Wide choice of optics to suit more applications (asymmetrical and symmetrical)
- Buckle design makes it very easy for further maintenance.

QUADRANT BOLLARD series stands out as a dependable option for pathways, landscaped areas, and various public spaces, featuring a square frame, complementary column choices, and a four-way light distribution.

- Glare is effectively minimized through a concealed light source.
- The 4 way light distribution not only efficiently illuminates pathways and areas but also introduces a distinctive visual effect.
- Various height options and a coordinating column make it suitable for high-end architectural projects.
- Its minimalistic design ensures seamless integration with diverse architectural styles.
- The bollard is characterized by easy installation and maintenance.

SOLAR TECH

SWEEP SOLAR BOLLARD

SWEEP SOLAR bollard represents a groundbreaking LED solar bollard that has been elevated in terms of aesthetics and creativity. With an IP66 rating, a mono-crystalline solar panel, and UV-resistant PC material, this bollard, featuring an architectural design, has gained significant popularity in various settings such as pathways, gardens, sidewalks, buildings and more.

Key Features: IP66 & IK07, unique and elegant appearance, professional SET1,SET2,SET3 Lighting distribution, high efficiency mono-crystalline solar panel, long lifespan LifeP04 Battery, 8 hour charging, working 2-3 days.

DHOW SOLAR SMART POLE

DHOW SOLAR SMART POLE features integrated solar tube technology to prevent dust accumulation, represents a cutting-edge fusion of renewable energy and advanced functionality. Designed to meet the demands of modern urban landscapes, this innovative pole integrates seamlessly into smart city infrastructure. Beyond its primary function of generating clean energy, it also incorporates additional features such as speaker and camera, enhancing its utility and versatility.

With its ability to harness solar power efficiently while providing surveillance and audio capabilities, it represents a great shift towards more intelligent, environmentally conscious infrastructure solutions.

ZEKREET MULTI POLE is an example of sophistication and functionality in outdoor lighting, it features multiple spotlights strategically positioned on the pole, offering illumination in multiple directions. The seamless integration of these spotlights ensures a comprehensive lighting solution, brightening up every corner with precision and flair. Beyond its exceptional functionality, it stands as a testament to exquisite design, seamlessly blending aesthetics and practicality. Its contemporary form adds a touch of elegance to any environment, making it not just a lighting solution but a statement piece that enhances the visual appearance of outdoor spaces.

LUNA POLE series serves as the focal point in outdoor landscapes, enhancing the visual appeal. When incorporated into a park or pathway, it not only illuminates various elements of the landscape but also enhances safety by offering consistent ambient lighting, thereby improving visibility for pedestrians.

- Contemporary, architectural design, smooth housing without any screws exposed.
- Super high efficiency to 150lm/w, lumen packages ranging from 11250 - 4500lm.
- A variety of mounting configurations, optic distributions and lumen packages.
- Tool-less opening and incorporation of automatic disconnect for easy, safe access and simple electrical testing or maintenance operations.
- Protection Class I or Class II.
- Two lens configurations: clear and diffuse.

TORCH POLE aligns with the contemporary trend of urban diversity through its sleek curvature. It is conveniently used in courtyards, private and public gardens, streets and walkways, offering lumen packages ranging from 4800-12000lm. To meet the demands of different outdoor scenarios, **TORCH POLE** boasts a signifying robust durability against external impacts. This resilience makes **TORCH POLE** a reliable choice for outdoor spaces, capable of withstanding the challenges posed by weather conditions. Moreover, **TORCH POLE** provides a wide range of optics, allowing users to customize the lighting experience based on the requirements of each setting.

MAHA

BEYOND the name ...

MAHA has been considered a symbol of beauty by the inhabitants of the Arabian Peninsula for centuries. With their huge horns and elegant body, they are of great cultural importance in the Gulf. As the MAHA is the largest antelope in the region, it has great endurance that enables it to live in one of the most harsh natural environments in the world.

Qatar took to preserve the MAHA, what was known as the Maha Operation (Resettlement of MAHA), which paved the way for the breeding of significant numbers of these animals while restricting their freedom, and then they were kept in special groups until they were finally released into the wild in 1982.

It is where MAHA breeds in Qatar, and after a tour within this reserve, visitors will be able to understand the nature of this elegant Oryx and appreciate its importance

MAHA surface series is a refined design and an ideal lighting solution for multiple outdoor locations, including building exteriors, outdoor walkways, garages, and pathways. Notably energy-efficient, this fixture delivers a bright light output, guaranteeing optimal visibility and comfort. Moreover, its full cut-off asymmetrical optic design facilitates efficient light control, preventing any upward light emission and meeting the rigorous market standards.

BEYOND the name ...

Al Koot Fort most commonly known as the Doha Fort, is a historical military fortress located in the heart of Doha, Qatar's capital city. It was built in 1927 by Sheikh Abdulla bin Qassim Al Thani, better known as Sheikh Abdullah bin Jassim Al Thani, who ruled Qatar from 1913 until 1949, after Sheikh Mohammed bin Jassim Al Thani, Sheikh Abdullah's brother, abdicated in favor of him. The fort was later converted into a museum. Qatari traditional handicrafts, products and photos of daily life with illustrations are housed in the fort. Exhibits and artworks include handicrafts, gypsum and wooden ornaments, fishing equipment and boats, historical photos and paintings including oil paintings of craft workers and daily life.

The Al Koot Fort is located in the Al Bidda neighborhood, in the midst of the famous Souq Waqif, near Doha Corniche, and is now a preferred landmark, museum and tourist spot, most especially for foreigners.

KOOT ADJUSTABLE SERIES

KOOT ADJUSTABLE series consists of a range of LED sources to deliver the desired light effect to façades, columns, bridges, monuments, and signs. The LEDs used come in 3 different tones of white, as well as blue, red, green, amber and RGB. Several lenses from 6 to 40 degrees are available.

THERMAL MANAGEMENT

All fixtures are designed to withstand ambient temperatures of at least 50°C. The LEDs are mounted on metal core PCBs, which are mounted the Aluminum body of the fixture so that the entire fixture acts as a heat sink.

This unique design can be adjusted easily from the outside without the need to open it, using an Allen key.

KOOT BLADE is a recessed luminaire with 180° light emissions, an ideal lighting solution for arches and windows. This type of luminaire is designed to be installed inside a recessed area, providing a sleek and seamless appearance that complements the architecture of the space. The 180° light emission ensures that light is evenly distributed in all 3 directions, effectively illuminating the entire surrounding area. This feature is especially useful for arches and windows, as it can provide a soft and diffused glow that accentuates the curves and contours of these architectural elements. Additionally, a recessed luminaire with 180° light emissions can be used to create a dramatic effect by highlighting the texture and details of the surrounding surfaces, adding depth and dimension to the space.

Ambient Temp.	-25°C ~ 50°C
Ambient Humidity	10% ~ 90%
Light source Life	80,000 h

KOOT PRO consists of a range of LED sources to deliver the desired light effect to façades, columns, bridges, monuments, and signs. The LEDs used come in single colors, as well as RGBW.

THERMAL MANAGEMENT

All fixtures are designed to withstand ambient temperatures of at least 50 °C with excellent heat conductivity.

Range	Power (W)	CCT (K)	LED Quantity	Beam angle	Lumen (lm)
KOOT PRO 1	20W	Single	3 pcs	1.5°, 1.5x40°	1200lm
KOOT PRO 2	40W	RGBW	3 pcs	4°	1200lm
KOOT PRO 3	50W	Single	6 pcs	1.5°, 1.5x40°	3000lm
KOOT PRO 4	80W	RGBW	6 pcs	4°	2400lm
KOOT PRO 5	100W	Single	12 pcs	1.5°, 1.5x40°	6000lm
KOOT PRO 6	160W	RGBW	12 pcs	4°	4800lm

Light source Life	50,000 h

GLOW RAIL LINEAR (SQ) is an LED handrail lighting system designed to enhance standard handrails crafted from stainless steel and aluminum. Offering a spectrum of colors ranging from 2700 to 6500K and blue, the system is not only visually versatile but also features an impressive IP65 waterproof rating, ensuring resilience in diverse settings. The system incorporates secure 3M waterproof internal connectors for added reliability. Powered by a constant voltage LED driver, it operates efficiently, maintaining a consistent performance. Furthermore, the system provides flexibility through customization options, allowing for personalized sizes, shapes, and beam angles based on individual preferences and requirements.

Suitable for square handrails with dimensions $\geq 50 \times 50$ mm and a wall thickness ranging from 0.8 to 3 mm.

$\geq 50 \times 50$ mm

Wall Thickness T: 0.8-3mm

GLOW RAIL DOT is an LED handrail lighting system designed to enhance standard handrails crafted from stainless steel and aluminum. Offering a spectrum of colors ranging from 2700 to 6500K and blue, the system is not only visually versatile but also features an impressive IP67 waterproof rating, ensuring resilience in diverse settings. The system incorporates secure 3M waterproof internal connectors for added reliability. Powered by a constant voltage LED driver, it operates efficiently, maintaining a consistent performance. Furthermore, the system provides flexibility through customization options, allowing for personalized sizes, shapes, and beam angles based on individual preferences and requirements.

Suitable for square handrails with dimensions $\geq 50 \times 50 \text{ mm}$ and a wall thickness ranging from 0.8 to 3mm, for a $\varnothing 30 \text{ mm}$ hole.
