of Activity

Gammaplast has a **modern and functional headquarter**, located in the town of Castagnole delle Lanze, in the province of Asti (Piedmont) near the A21 motorway.

THE PRODUCTION AREA

- The production site of Castagnole delle Lanze is about 10,000 square meters, of which 8,000 covered.
- The activity of the society is entirely organized in the covered spaces in which the administrative, commercial and graphical offices are present is the inside industrial section of which the productive chain and the warehouse for the storage of the goods take part.

PRODUCTION PLANTS

The production facilities are state-of-the-art, designed in collaboration with the supplier to Gammaplast specifications, and guarantee production flexibility. Significant development investments have recently been made.

Gammplast has always paid attention to the needs of workers in outdoor workplaces, who are constantly in contact with products because of their work in the workshop, such as oils and fats from cars or other elements potentially dangerous to the person, the interior of cars and the working environment.

The products developed by the company increase the **safety** and **efficiency** of the work. They are developed, designed and customized based on the needs of the individual customer with a great focus on technical and aesthetic characteristics. These products meet **safety**, **hygiene** and **protection** requirements.

Gammaplast is strongly committed to the standards set by the autonomous control bodies for environmental impact control and quality management for the sector in which it operates.

CERTIFICATIONS

- Gammaplast's ongoing commitment to business management and its products is documented and certified by independent inspection bodies. The possession of such certifications is not only an important recognition but an element of guarantee, safety and reliability of customers.
- Currently, the Company holds the following certifications:
 - **Certified «OK Compost!»** Shoppers and Seat Covers, products guaranteed as biodegradable in the impact of industrial composting;
 - **ISO 9001:2015 certificate**, quality management system for the automotive sector;
 - **Reach Regulation** - for the registration, evaluation, authorization and restriction of chemicals.
- All items are intended for a second life. The relevant **international recycling code** is always printed to allow clear and immediate recognition of the type of material of which the recyclable object is made.
- Gammaplast undertakes to recycle all products representing packaging, while for the rest of its production, the Company is a member of the **POLIECO Consortium**, which aims to encourage the withdrawal of polyethylene-based goods at the end of their life cycle.

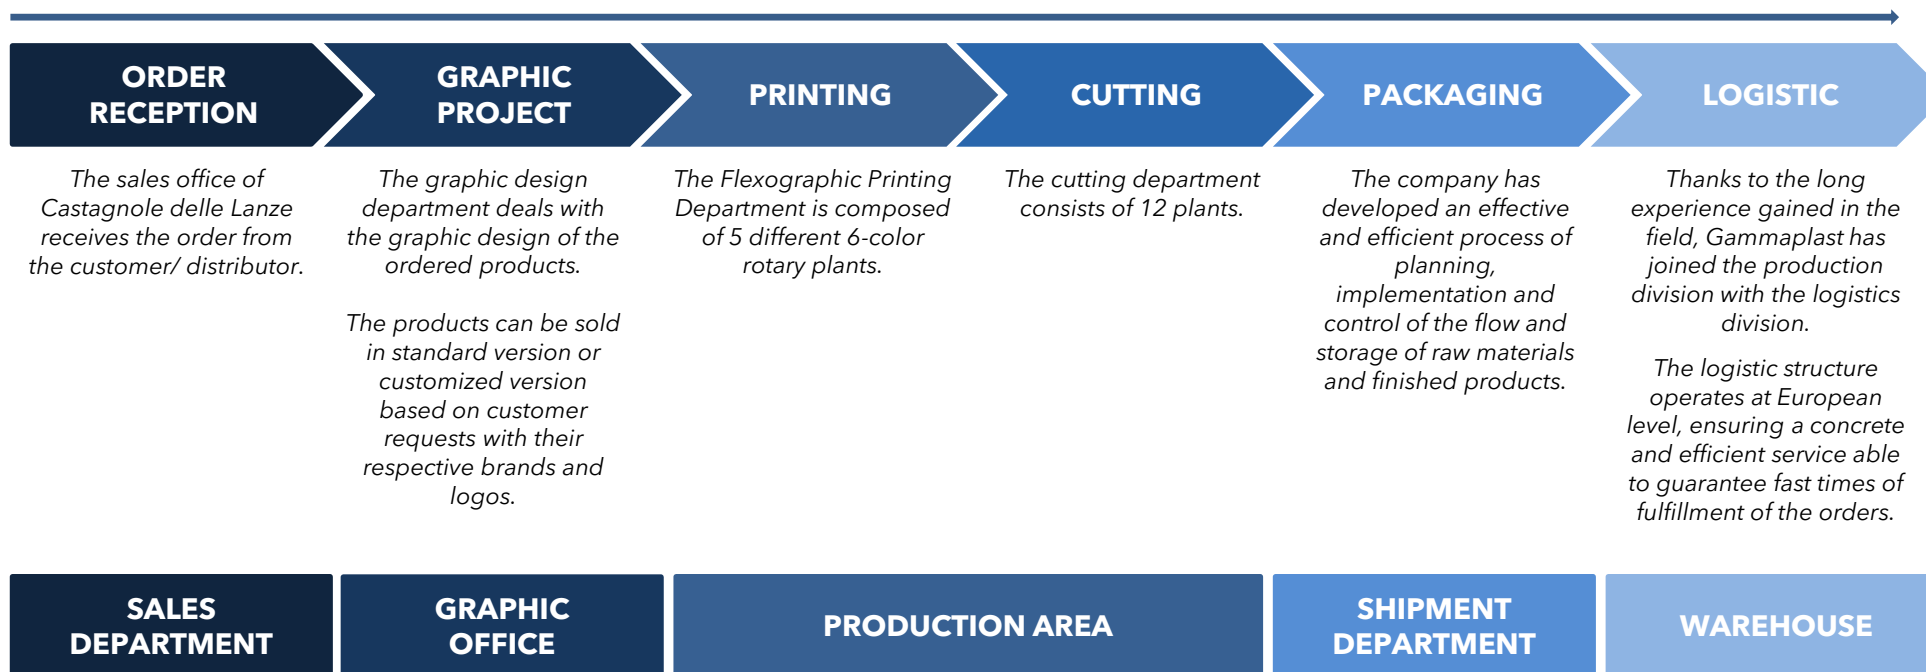

ECOCARE LINE

- Despite all the care and attention already devoted to ecology, Gammaplast has studied an additional line in an even more environmentally sustainable perspective: the **ECOCARE** line, made with particular protection of the environment and care of the raw materials used, so that the final consumer can take advantage of this production range that guarantees a very low environmental impact.
- Gammaplast is strongly committed to the environment to ensure the biodegradability of the products sold, participating in the controls on the composition of raw materials (certification of compostability according to **UNI EN 13432:2002**, license code S481).
- The **paper** used by the Company is **FSC certified**: international, independent and third-party certification, specific for the forestry sector and products - woody and non-woody, which ensures production from forests managed in a responsible manner, with high environmental, social and economic benefits.

Gammaplast, thanks to important investments in new industrial machinery and a solid business model, guarantees high quality products and a reduced time to market (from design to delivery of customized products in 10-15 days).

From order to shipment in 10-15 working days

- Gammaplast's production times are very efficient with shipping times ranging from 5 working days from receipt of the order for the goods in stock, 10 working days for generic materials and prints and about 15 working days for products that require customization in size or brands.
- The Company has several direct logistics contracts and warehouse management on behalf of customers and distributors in order to minimize the total cost of the product and reduce delivery times. On request, they are also managed in stock and logistics of items that are not part of the company's production.

The wide range of services offered and the high production flexibility allow Gammplast to meet and customize even the most particular needs of customers, both from the point of view of logistics management alone and from the production point of view.

CONTACTS AND ORDERS

- Gammplast serves 700 customers and handles over 8,000 orders per year.
- Gammplast is able to process orders of very variable sizes, from 100 to 30,000 euros, with an average order of 1,000 euros.
- The contact with the customer starts from the Company's sales offices through different channels.

SALES CHANNELS

- The sales network consists mainly of distributors, dealers in the automotive sector or similar and purchasing groups.
- Direct sales to car manufacturers and industries have specific supply contracts.

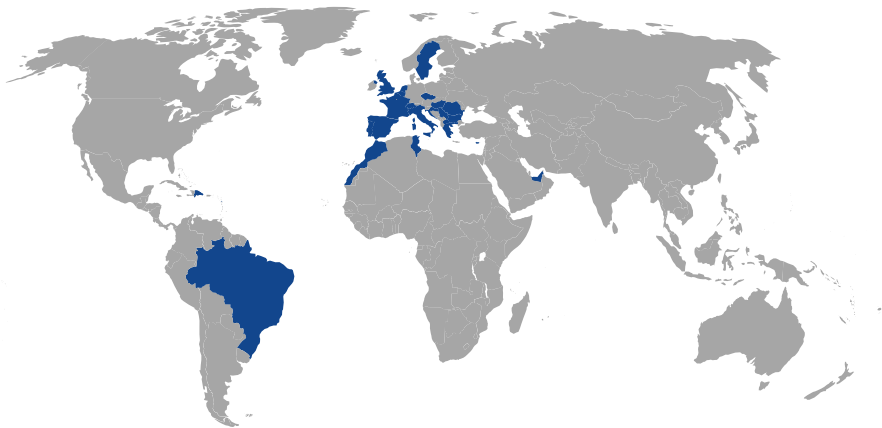

Gammaplast products differ from the competition in their high quality, high customization and wide range of offerings. Customers are mainly important automotive brands active in the Italian territory in different sectors such as automotive, packaging, transport.

Thanks to an efficient and extensive sales network, Gammplast is able to serve its customers in Italy and internationally.

GAMMAPLAST WORLDWIDE

- Gammplast products are also sold internationally through operators active in the automotive sector, directly and indirectly.
- In particular, products are sold in Europe, North Africa, the Middle East and South America through exclusive importers or medium and large distributors.
- The process of internationalization of sales just begun, will be one of the important elements of the growth process of the coming years.

GAMMAPLAST BRASIL

- Gammplast in 2018, started a further developing sales network in Brazil, with which it distributes its plastics products to the leading car manufacturers / retailers / service centres in the country.
- The presence on the Brazilian territory of Gammplast has allowed to expand its sales network and to distribute the products on the territory of Latin America.
- In 2018, the company made deals with 10 industry-leading automakers.
- In addition, for the coming years, other trade agreements with other major car manufacturers are under negotiation.

In particular, the company collaborates with the **Fenabrave** dealership association, which has around 7,000 dealerships registered.
