

Clutch Kits Durability and Driving Comfort

ABSEL clutch kits offer superior durability thanks to high-quality materials and an anti-corrosion coating, providing excellent protection against wear. The damping springs effectively reduce vibrations, ensuring a smoother driving experience, while precise engineering maintains stable torque transmission. Opting for a complete clutch kit replacement ensures all components wear evenly, preventing premature damage to newly installed parts and significantly extending the lifespan of the entire system.

Sensors Precision and Performance You Can Trust

Top-tier sensors offer high precision, durability, and reliability, ensuring optimal vehicle performance and safety. Designed for harsh conditions, they provide accurate data, extend lifespan, and reduce maintenance costs. Compatible with advanced systems, they enhance fuel efficiency and support critical safety features.

Autochemistry Reliable System Care

ABSEL car chemistry includes products designed for professional maintenance of engines, transmissions, and braking systems of vehicles. This category comprises efficient and safe formulations for cleaning and flushing injectors, carburetors, oil, and fuel systems, as well as brake system cleaners and aerosols to facilitate engine starting.

Radiators Efficient and Reliable Heat Transfer

ABSEL radiators are manufactured using advanced aluminum brazing technology in protective atmosphere furnaces, ensuring the strength and durability of the construction.

- ENGINE RADIATORS
- AC CONDENSORS
- ENGINE OIL COOLERS
- HEATERS
- INTERCOOLERS

TOP QUALITY

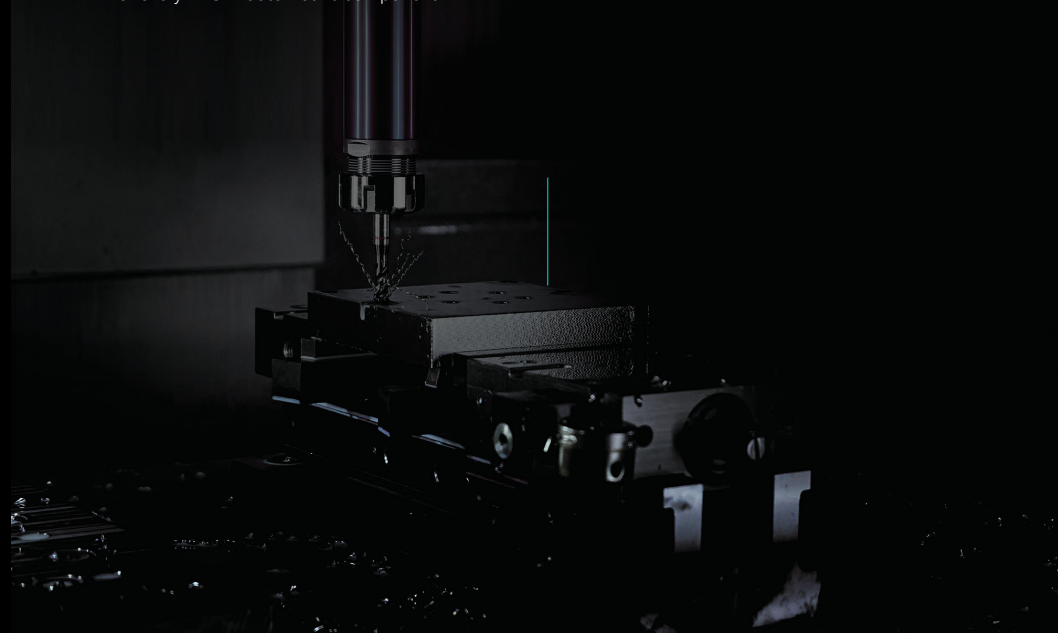

GUARANTEED

Guaranteed Reliability

All our products are manufactured at facilities closely collaborating with OEM producers and certified according to international standards IATF 16949, ISO 9001, and ISO 14001.

Technological collaboration with industry leaders ensures the quality and reliability of every ABSEL automotive component.

AUTOMOTIVE COMPONENTS AND TECHNICAL FLUIDS

POWER IN MOTION. QUALITY IN PARTS.

Filters Clean Engine With Absel Filters

A wide range of ABSEL car filters covers basically any brand of both European and Asian cars, be they passenger vehicles or trucks.

OIL FILTERS
FUEL FILTERS
AIR FILTERS
CABIN FILTERS

Batteries Discover a World of New Energy

ABSEL batteries offer higher vibration resistance compared to conventional batteries and demonstrate excellent performance in extreme weather conditions.

Spark Plugs Maximize the Engine's Potential

ABSEL spark plugs with advanced electrode technology guarantee smoother acceleration, improved fuel economy, lower emissions and longer lifespan.

POWER
PLATINUM
IRIDIUM

Bulbs Brighter. Further. Safer.

A wide range of halogen, xenon, and LED headlight bulbs, from bulbs fully compliant with automaker standards to bulbs with up to +150% increased light intensity. The manufacturing facility in South Korea ensures high quality and long lifespan.

Suspension and Steering Steerability and Reliability in the Most Demanding Conditions

Ball joints of suspension and steering parts are made of hardened alloy steel, carefully covered with EPDM rubber dust covers, which guarantees wear resistance in changeable and aggressive conditions on the road.

SKU 3500+

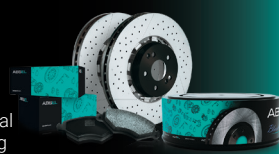

Brake System Safety and Comfort of Your Every Driving

High-grade steel combined with cutting-edge composite materials and heat-resistant anti-corrosion coating ensure short braking path, high driving comfort, and long lifespan.

Black Collection

A vibrant series of brake discs in an exclusive plastic packaging, which not only ensures reliable protection against moisture, corrosion, and external damages but also facilitates convenient unpacking and repackaging of the discs.

Shock Absorbers, Air Springs and Coil Springs Comfort Without Limits

Shock Absorbers By reducing stress on other suspension components, ABSEL shock absorbers prevent wear and tear on tires, brake system components and suspension components, extending the life of the vehicle and providing savings on maintenance and repairs.

Air Springs A special formulation of improved acid-resistant rubber and high-quality cord materials provide users with excellent operational reliability in challenging road conditions.

Coil Springs Suspension springs by ABSEL are manufactured using cold winding technology from 54SiCr6 grade steel and fully comply with the European quality standard EN 10089, which ensures high quality and durability.

Pulleys, Tensioners and Timing Belt Kits Smooth Running of Your Engine

High-grade Japanese bearings, highly plastic grease, ensuring low noise level, and assembly technology in ISO 6 - ISO 7 class clean rooms, guarantee stable performance during the entire service life

POPULAR PRODUCT

Timing Belt Kits
Kits include ABSEL tensioners/pulleys and DAYCO, GATES or Contitech belts.

Water pumps Perfect Compatibility

ABSEL water pumps fully meet Original Equipment (OE) standards, ensuring consistent and uniform coolant distribution. They are highly resistant to corrosion and wear. Efficient bearings reduce energy consumption for the water pump drive.

WIDE PRODUCT RANGE

Antifreeze and coolants Reliable Protection Against Overheating and Freezing

ABSEL antifreeze products are made from high-quality monoethylene glycol and special additives that reliably protect the internal components of the cooling system from corrosion. They ensure stable engine performance during sudden changes in ambient temperature, preventing overheating and freezing.

Wiper blades Clean Windshield in Any Weather

In any weather—rain, snow, or frost—ABSEL wiper blades help clear the windshield, providing drivers with a clear view of the road ahead. This is particularly important during poor visibility conditions, as it can reduce the risk of accidents and collisions. The ABSEL range includes ready-made kits and single universal wipers from 350 to 750 mm.

Silent

All-Season

Long Life

Windshield washer fluids Effective Solution for Any Season

ABSEL windshield washer fluids, available with grapefruit, melon, and bubble gum aroma, quickly and effectively remove snow, ice, dirt, and road salt from vehicle windows and headlights. They leave no streaks or residue, enhancing road safety by improving visibility while driving. The formulas meet all safety standards and are harmless to the driver, headlight plastics, and paint coatings.
