

Autoventil A.D. Užice showcases engine valve innovations at Automechanika Frankfurt

Užice, Serbia – September 2024 – Autoventil A.D. Užice, a long-standing manufacturer of engine valves and valve guides with more than 70 years of tradition, successfully presented its latest product innovations at Automechanika Frankfurt, the leading international trade fair for the automotive industry.

At the 2024 exhibition, Autoventil highlighted its advanced production technologies and high-quality engine valves designed for passenger cars, trucks, buses, and industrial vehicles. The company's solutions are widely recognized for their precision, durability, and compliance with international quality standards (ISO 9001 and ISO/TS 16949).

“Automechanika Frankfurt is an excellent opportunity to connect with our existing partners and to meet new distributors and customers from around the world,” said Goran Pijevic, Company Owner at Autoventil A.D. “We are proud to represent Serbian engineering and to demonstrate that our products can compete at the highest global level.”

Autoventil exports to more than 80 countries worldwide, including the European Union, Turkey, Canada, and Algeria. Participation at Automechanika underlines the company's commitment to continuous growth, innovation, and building long-term international partnerships.
