

BG AC Evaporator Cleaning Service

*Restores Heating & Cooling Efficiency
Eliminates Odors*

BG AC Evaporator Cleaning Service:

BG AC Evaporator Cleaning Service, using BG Frigi-Clean® (PN 712M), will dissolve and remove the accumulated bacteria, mold, spores, fungi and road grime from the evaporator. This service will eliminate odours, control contaminants in the system, and enhance the performance of AC system that contribute so much to the driving enjoyment.

BEFORE: Odors, bacteria, mold, spores, fungi, road grime, nicotine oils and debris accumulate in your car's air conditioning evaporator.

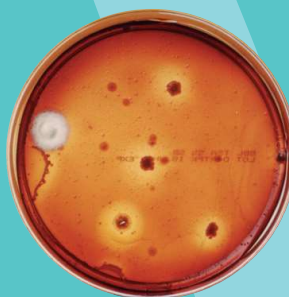

AFTER: BG Climate Control Service restores heating/cooling efficiency and freshens interior air.

BG Frigi-Clean®

It is a unique cleaning solution designed to quickly and effectively remove foul odours, bacteria, mold, spores, fungi, road grime, nicotine oils and debris that accumulate in the car's air conditioning evaporator. BG Frigi-Clean is injected directly into the evaporator case. It foams up to completely fill the evaporator core where it also blast away bug parts, pet hair, nicotine residue and other garbage. BG Frigi Clean is biodegradable, non-toxic, non-corrosive.

(48 Pcs per Carton)

BG Frigi-Quiet® FOR R-1234yf

Utilizes unique, anti-wear technology to ensure quieter, cooler compressor operation and will prolong compressor life. It has excellent oxidative stability, is hydrolytically stable, and offers many advantages over typical PAG and Ester oils, even under the harshest of conditions. Can be safely used in compressors requiring oil viscosities from ISO 46 to ISO 100. Recommended for use in R-1234yf and R-134a systems only.

PN 917-2

BG Mechanical Additive Injector Tool

The BG Mechanical Additive injector Tool is the perfect choice for manually adding additive to a charged air conditioning system. This quick and easy tool is designed for use without charging stations or manifold gauge sets. 59 ml capacity.

(24 Pcs per Carton)

BG Automotive Interior Sanitising Fogger

BG Automotive Sanitising Fogger contains a powerful sanitiser and odor-eliminator its designed to quickly contact and neutralize smells in the vehicle interior. A simple, easy-to-apply system ensures effective surface contact and wide dispersal of its unique odour-eliminating ingredients.

Vehicle interiors and carpets can absorb all kinds of lingerances. Food, spilled liquids, and musty air particles will collect and concentrate, making your driving experience less than pleasant. Permanently removing these offensive odours requires a safe but highly effective odour eliminator. One that deals with the source of the smells one and for all.

Benefits

- Removes foul odours associated with bacteria, mold, Fungi and road grime
- Removes nicotine oil and debris from the AC evaporator system
- Restores heating/cooling efficiency and refreshes interior air
- Keeps evaporator for a long lasting operation
- Powerful long lasting deodorizers keep interior smelling fresh and clean
