

Autel unveils its next-generation diagnostic platform – the MaxiSys Ultra S2 – at Automechanika Dubai 2025.

Supported by Autel's AI-powered assistant "Max," the Ultra S2 series, including MS919S2 and MS909S2, delivers near OEM-level performance with faster processing, enhanced PID data analysis, and intelligent fault detection.

Visitors are invited to experience live demonstrations and training sessions at Autel's interactive booth , where the Ultra S2 series will take center stage in a hands-on learning environment.
