RUDSON® Vehicle-Specific Line: OE-XLP Antifreeze + Coolant

Original Equipment Compatibility with Extended Life Protection

American Manufacturing Co. (AMC) proudly introduces its **RUDSON® Vehicle-Specific Line**, featuring **OE-XLP Antifreeze + Coolant**. This formula is engineered to meet the **exact specifications of your vehicle's original equipment** while delivering **extended life protection** for long-lasting engine performance.

RUDSON® OE-XLP provides reliable defense against extreme temperatures, corrosion, and system wear, ensuring optimal engine health and durability. Designed for today's demanding automotive environments, it offers the perfect combination of OEM compliance and extended maintenance intervals, giving both professionals and vehicle owners confidence in their cooling system.

Key Benefits:

- **Original Equipment Compatibility:** Fully meets manufacturer specifications
- **Extended Life Protection:** Reduces frequency of coolant changes
- **Corrosion & Cavitation Defense:** Protects critical engine components
- **Extreme Temperature Stability:** Reliable in hot or freezing conditions
- **Versatile Application:** Ideal for passenger and commercial vehicles

“RUDSON® OE-XLP is the foundation of our **Vehicle-Specific Line**, providing engineered protection that aligns with OEM standards while extending service life,” said **Ruddy Gascon, CEO at AMC**.

The RUDSON® Vehicle-Specific Line will be featured at **Automechanika 2025, Stand Z2-F39**.

About American Manufacturing Co. (AMC)

For over 30 years, AMC has served the automotive and industrial chemical markets, offering premium products and turnkey solutions for private label and proprietary manufacturing. AMC specializes in advanced formulations, innovative packaging, and high-quality production standards designed to meet customer needs worldwide.
