

FOR IMMEDIATE RELEASE
Miami, FL – November 18, 2025

RUDSON® EV+ Antifreeze + Coolant

Advanced Protection for Electric & Hybrid Vehicles

American Manufacturing Co. (AMC) proudly introduces **RUDSON® EV+ Antifreeze + Coolant**, a next-generation solution engineered specifically for **electric and hybrid vehicle cooling systems**. Designed to deliver superior thermal stability and protection, EV+ safeguards critical components such as **battery packs, power electronics, inverters, and electric motors**, ensuring optimal performance in demanding conditions.

EV+ provides **long-lasting defense against extreme temperatures, corrosion, and material degradation**, while maintaining full compatibility with electric and hybrid vehicle cooling system requirements. By using EV+, professionals and vehicle owners can help **extend the life of essential components**, improve efficiency, and ensure long-term reliability.

Key Benefits:

- **Engineered for Electric & Hybrid Vehicles:** Tailored protection for modern EV and hybrid systems
- **Extended Life Protection:** Reduces maintenance cycles and prolongs system performance
- **Superior Thermal Stability:** Maintains optimal heat transfer under extreme conditions
- **Corrosion & Cavitation Protection:** Safeguards critical components from wear and degradation
- **OEM Material Compatibility:** Works seamlessly with manufacturer-specified system materials

“RUDSON® EV+ is part of our commitment to **advanced vehicle-specific solutions**, ensuring that electric and hybrid vehicles receive the same high-quality protection that conventional engines enjoy,” said **Ruddy Gascon, CEO at AMC**.

The RUDSON® EV+ Antifreeze + Coolant will be featured at **Automechanika 2025, Stand Z2-F39**, alongside the RUDSON® Vehicle-Specific OE-XLP Antifreeze + Coolant.

About American Manufacturing Co. (AMC)

For over 30 years, AMC has served the automotive and industrial chemical markets, offering premium products and turnkey solutions for private label and proprietary manufacturing. AMC specializes in advanced formulations, innovative packaging, and high-quality production standards designed to meet customer needs worldwide.
