HEAVY EQUIPMENT FILTER SERIES

BE HEAVY!

PRODUCT TYPES

AIR FILTER

The Air Filter plays vital role by filtering contaminated air prior to the air entering the intake system and the engine. This ensures that only a clean air (contaminant free air) is mixed with the fuel before entering the combustion chamber.

OIL FILTER

Provides clean lubricant oil in the engine, thus reducing premature wear and tear in all frictional parts.

FUEL FILTER

Keeps the fuel system clean that will prolong the life span of the injector and maintain higher fuel efficiency.

CABIN AIR FILTER

Protects passenger from airborne contaminants, such as pollen, dust, smoke, bacteria, and virus.

HYDRAULIC FILTER

Protects and prolong the life span by keeping the hydraulic system clean.

FUEL/WATER SEPARATOR

Removes water contamination to ensure clean fuel delivered to the engine.

COOLANT FILTER

Protects the cooling system against corrosion.

AIR / OIL SEPARATOR

Removes residual oil from the air on the outline of compressor to enhance machine life.

WATER/EDM FILTER

Optimizes performance of the wire-cut machine system.
