

ADVANCE AUTO SUPPLY COMPANY PROFILE

Weatherstrip & Inner fender liner from Thailand

Advance Auto Supply Co.,Ltd.

one of the leading autopart business in Thailand which we specialize in manufacturer of Rubber weatherstrip and Plastic inner fender. We were established in 1980 as an inbound business starting with the sale of aftermarket auto part. Began to start our own production in 1986 with first plant was rubber part and then plastic inner fender. Over 35 years of experience, profession expertise, flow distribution network and strong background of client in Thailand, we realize that we would like to expand our business and step into an export world class in rubber part and plastic part business.

Our main productions are for 60s model cars (classic/vintage car) up to present (modern car) for Japanese truck, light truck, pick up and passenger car which cover all Japanese brand such like Nissan, Toyota, Isuzu, Mazda, Mitsubishi, Honda, Hino and more. Now with our new rubber extrusion Technology and plastic vacuum thermo-forming on 3500 square meters ,we can produce overall around 50,000 units per month and continued development our production to meet customer's requirements. We also can make tooling according to customer sample for all rubber and plastic parts.

Today we vigilant about building long-term customer confidence in our products, technology and we commitment to develop our services to be top exporter in auto weatherstrip and inner fender liner parts in Thailand.
