## PRESS RELEASE

### Introducing E-Series PRO X

The INDASA Group unveils new PRO X professional tool range, a new dimension to machine sanding and polishing.

The PRO X power tools have been developed for the trade professional to create the perfect finish, every time. The advanced innovative technology and robust design combine to maximise sanding performance. Built with precision and efficiency in mind, this cutting-edge line of power tools is designed to elevate the work of trade professionals to new levels of excellence.

Each tool within the PRO X range represents INDASA's commitment to superior performance. Rigorously tested and designed, these tools deliver remarkable power, precision, and durability – traits that are indispensable for achieving superior results.

Andrew Tindall (Group Commercial Director) said “we acknowledge that in many cases the responsibility for preparation lies with the person producing the finish. Having the best possible equipment has never been so critical - we're not just offering tools, we're offering a new standard of excellence that professionals can rely on.”

The PRO X range is set to redefine the way professionals approach their projects. Smart features, intuitive controls, and ergonomic designs streamline workflows, minimise downtime, and optimise overall efficiency:

**E-Series PRO XS sander 150-3/5:** high power and low maintenance 400W brushless motor electric sander (available in 3 mm and 5 mm orbit).

- Ergonomic design – ensures comfortable handling and ease of use
- Mechanical speed dial – sustained and controllable speed
- Pad brake – safeguards operator and workpiece

**E-Series PRO XP random orbital polisher 125-15:** hologram free finish random orbital action polisher.

- Rubber ergonomic design – maximum comfort
- Soft start and mechanical speed dial – sustained and controllable speed
- Clear RPM range – identify suitable speed

**E-Series PRO X smart repair kit:** multipurpose machine ideal for spot sanding and polishing small repairs.

- Cordless tool – lightweight and portable throughout the bodyshop
- Quick change system – alternate from rotary to eccentric action
- LED speed indicator – displays different working levels

When asked to comment on the forthcoming development, Humberto Placido (Group Technical Manager) said “PRO X will be a game-changer. With the tools' innovative features, unparalleled performance, and dedication to quality, this range will not only meet needs but also elevate output.”

The eagerly awaited PRO X tool range are now available. To purchase please contact your local INDASA distributor or learn more about the range by visiting [www.indasa-abrasives.com](http://www.indasa-abrasives.com)

Note to journalists, high-resolution images are available upon request.
